The Nonprofit Sector Walter W Powell, Patricia Bromley, 2023-05-25 Timely unique and definitive not only chronicles the history of the nonprofit sector but also provides a broad but critical analysis of its current state Vartan Gregorian President Carnegie Corporation of New York The nonprofit sector has changed in fundamental ways in recent decades As the sector has grown in scope and size both domestically and internationally the boundaries between for profit governmental and charitable organizations have become intertwined Nonprofits are increasingly challenged on their roles in mitigating or exacerbating inequality And debates flare over the role of voluntary organizations in democratic and autocratic societies alike The Nonprofit Sector takes up these concerns and offers a cutting edge empirical and theoretical assessment of the state of the field This book now in its third edition brings together leading researchers economists historians philosophers political scientists and sociologists along with scholars from communication education law management and policy schools to investigate the impact of associational life Chapters consider the history of the nonprofit sector and of philanthropy the politics of the public sphere governance mission and engagement access and inclusion and global perspectives on nonprofit organizations Across this comprehensive range of topics The Nonprofit Sector makes an essential contribution to the study of civil society Praise for previous editions Takes a decidedly multidisciplinary approach invaluable Journal of Policy Analysis and Management A major contribution to the field Social Forces Becoming a Social Science Researcher Bruce Parrott, 2023-03-28 Becoming a Social Science Researcher is designed to help aspiring social scientists including credentialed scholars understand the formidable complexities of the research process Instead of explaining specific research techniques it concentrates on the philosophical sociological and psychological dimensions of social research These dimensions have received little coverage in guides written for social science researchers but they are arguably even more important than particular analytical techniques Truly sophisticated social science scholarship requires

that researchers understand the intellectual and social contexts in which they collect and interpret information While social science training in US graduate schools has become more systematic over the past two decades graduate training and published guidance still fall short in addressing this fundamental need

Television News and Human Rights in the US & UK Shawna M. Brandle, 2015-12-22 Does the CNN Effect exist Political communications scholars have debated the influence of television news coverage on international affairs since television news began especially in relation to the coverage of massive human rights violations These debates have only intensified in the last 20 years as new technologies have changed the nature of news and the news cycle But despite frequent assertion little research into the CNN Effect or whether television coverage of human rights violations causes state action exists Bridging across the disciplines of human right studies comparative politics and communication studies in a way that has not been done this book looks at television news coverage of human rights in the US and UK to answer the question of whether the CNN Effect actually exists Examining the human rights content in television news in the US and UK yields insights to what television news producers and policy makers consider to be human rights and what if anything audiences can learn about human rights from watching television news After reviewing 20 years of footage using three different types of content analyses of American television news broadcasts and two different types of British news broadcasts and comparing those results with human rights rankings and print news coverage of human rights Shawns M Brandle concludes that despite rhetoric from both countries in support of human rights there is not enough coverage of human rights in either country to argue that television media can spur state action on human rights issues More simply the violations will not be televised A welcome and timely book presenting an important examination of human rights coverage on television news

The Oxford Handbook of Political Methodology Janet M. Box-Steffensmeier, Henry E. Brady, David Collier, 2008 Political methodology has changed dramatically over the past thirty years and many new methods and techniques have been developed Both the Political Methodology Society and the Qualitative Multi Methods Section of the American Political Science Association have engaged in ongoing research and training programs that have advanced quantitative and qualitative methodology The Oxford Handbook of Political Methodology presents and synthesizes these developments The Handbook provides comprehensive overviews of diverse methodological approaches with an emphasis on three major themes First specific methodological tools should be at the service of improved conceptualization comprehension of meaning measurement and data collection They should increase analysts leverage in reasoning about causal relationships and evaluating them empirically by contributing to powerful research designs Second the authors explore the many different ways of addressing these tasks through case studies and large n designs with both quantitative and qualitative data and via techniques ranging from statistical modelling to process tracing Finally techniques can cut across traditional methodological boundaries and can be useful for many different kinds of researchers Many of the authors thus explore how their methods can inform and be used by scholars engaged in diverse

branches of methodology *Routledge Handbook of Interpretive Political Science* Mark Bevir, R. A. W. Rhodes, 2015-07-03

Interpretive political science focuses on the meanings that shape actions and institutions and the ways in which they do so. This Handbook explores the implications of interpretive theory for the study of politics. It provides the first definitive survey of the field, edited by two of its pioneers. Written by leading scholars from a range of disciplinary backgrounds, the Handbook's 32 chapters are split into five parts which explore the contrast between interpretive theory and mainstream political science; the main forms of interpretive theory and the theoretical concepts associated with interpretive political science; the methods used by interpretive political scientists; the insights provided by interpretive political science on empirical topics; the implications of interpretive political science for professional practices such as policy analysis, planning, accountancy and public health. With an emphasis on the applications of interpretive political science to a range of topics and disciplines, this Handbook is an invaluable resource for students, scholars and practitioners in the areas of international relations, comparative politics, political sociology, political psychology and public administration.

China and India's Development Cooperation in Africa Philani Mthembu, 2018-03-27. Explaining the determinants of China and India's development cooperation in Africa cannot be achieved in simple terms. After collecting over 1000 development cooperation projects by China and India in Africa using AidData, this book applies the method of qualitative comparative analysis (QCA) to understand the motives behind their development cooperation. Mthembu posits that neither China nor India were solely motivated by one causal factor, whether strategic economic or humanitarian interests, or the size of their diaspora in Africa. China and India are driven by multiple and conjunctural factors in providing more development cooperation to some countries than others on the African continent. Only when some of these respective causal factors are combined is it evident that both countries disbursed high levels of development cooperation to some African countries.

Global Governance and Democracy Jan Wouters, Antoon Braeckman, Matthias Lievens, Emilie Bécault, 2015-09-25. Globalization needs effective global governance. The important question of whether this governance can also become democratic is, however, the subject of a political and academic debate that began only recently. This multidisciplinary book aims to move this conversation forward by drawing insights from international relations, political theory, international law and international political economy. Focusing on global environmental, economic security and human rights governance, it sheds new light on the democratic deficit of existing global governance structures and proposes a number of tools to overcome it.

The Changing Face of Representation Kim Fridkin, Patrick Kenney, 2014-03-24. Gender matters in communication media portrayals and citizens' attitudes toward senators.

New Critical Writings in Political Sociology Alan Scott, 2017-03-02. In the third and final volume of this series, we examine the implications of the accelerating globalization process for the nation state. Are globalization, the rise of regional and international institutions and the

international agreements on human rights actually reducing and transforming state sovereignty Clearly ethnic racial and religious identities remain salient but how do they correspond to intersect with and overflow continuous nation state spaces that are demarcated by legally recognized borders In what conditions do democratic state building projects actually enhance political civil and social rights and when do they tend to contribute to the consolidation of elite power Should democratic forces put their faith in a cosmopolitan vision of global citizenship especially when they tackle quintessentially international and transnational problems like peace aboriginal rights and the protection of the environment In this volume s collection of contemporary political sociologists key articles we present work that explores the exposure of the nation state and the post World War II world system to global forces **Netherlands Annual Review of Military Studies 2017** Paul A.L.

Regionalism and International Relations Beatrix Futák-Campbell, 2021-05-20 Building on the recent initiative to truly globalize the field of international relations this book provides an innovative interrogation of regionalism The book applies a globalizing framework to the study of regional worlds in order to move beyond the traditional conception of regionalism which views regions as competing blocs dominated by great powers Bringing together a wide range of case studies the book shows that regions are instead dynamic configurations of social and political identities in which a variety of actors including the less powerful interact and partake in regionalization processes and have done so through the centuries **Political Parties and Electoral Clientelism** Sergiu Gherghina, Miroslav Nemčok, 2023-09-26 Contemporary political parties often use state resources to win elections In this context electoral clientelism evolved from the straightforward vote buying to sophisticated exchanges in which the relationship between patrons parties or candidates and clients voters is sometimes difficult to grasp We address the question how do the distributive politics and electoral clientelism interact how these forms of interactions differ across various context and what implications they bring for the functioning of political systems The special issue provides theoretical methodological and empirical contributions to the burgeoning literature about the multifaceted feature of electoral clientelism It unfolds the complex relationship between distributive politics and clientelism and conceptualizes electoral clientelism as a dynamic process that occurs through different sequences It enriches the methodological tools aimed at investigating electoral clientelism Finally the special issue approaches clientelism from several perspectives and brings together substantive empirical evidence about the varieties of clientelism around the world
