The Law, Policy and Politics of the UN Human Rights Council Bertrand G. Ramcharan, 2015-05-19 The UN Human Rights Council is the leading human rights organ of the United Nations and ten years after it was established it has attracted commendation as well as severe criticism Its universal periodic review is widely recognized as a valuable process of international cooperation to advance the universal implementation of human rights However it has been criticized for not acting effectively and fairly in dealing with situations of shocking violations of human rights in many parts of the world It is an international organ with the highest responsibilities to uphold universal values but at the same time it is a political organ of United Nations Member States and it shows the characteristics of both a values based body and a theatre of political drama It is the merit of this book to present the Human Rights Council in terms of its mandates roles and organization while seeking to remind the membership and the international community at large that the Council must be anchored in the modern human rights law of the Charter of which the author gives a superb presentation The book then proceeds to make the case that human rights are part of international constitutional law and this is exceedingly important at a time when universal values have come under stress from various quarters including from terrorist formations The argument of the book is essentially that the modern human rights law of the Charter and the human rights provisions of international constitutional law must take precedence for everyone everywhere

subsequent generations While the issue of affordable housing requires approaches adapted to the many specific African contexts the case of Somalia seems representative of a fragile context characterized by the uncertainty of the social political and economic situations and the lack of common shared legislative references and strategies The book aims to provide knowledge and propose a methodological framework developed from this particular situation that can serve as a template On the basis of this main objective the book deals with approaches and problems related to the creation of sustainable housing ecosystems activating and boosting local enterprises and stimulating foreign investors to revamp the national AEC sector and related manufacturing industries models for modular settlements and business models and assessment methodologies useful for evaluating a set of appropriate technological solutions Chapters 03 and 07 are available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com)
