Bach Flower Remedy Repertoires Part One:

Bach Flower Remedy Repertoires - Part One. Dr. Douglas M. Baker ,2014-04-15 Bach Flower Remedy Repertoires Part One Agrimony to Impatiens Larch to White Chestnut It takes several years to become familiar with the dispensing of the Bach Flower Remedies and it is only then that the clinician becomes aware that there are always certain symptoms and signs which do not quite fit into the specific categories indicated in the traditional Bach allocations Some Remedies seem to overlap naturally and others seem to require a balancing component Still others seem to indicate chronicity and there are even others that are suggestive of acute disorders By using a repertoire we blanket an area of the patient s symptoms and thus more effectively reach the levels of causation In fact a repertoire is no less than a spectrum of treatment that can be applied to a range of symptoms that themselves form a spectrum This is why antibiotics are found to be very effective in certain instances when they are applied as a broad spectrum to cover a range of bacteria Man s symptoms are very like his flora of bacteria Remove one type of bacterium and you have created favourable conditions for another type to appear Similarly we find in practice that one often deals competently with a presenting symptom only to discover that when it is disposed of another related to it deeply takes its place We have deliberately linked the repertoires to their astrological correspondences because from experience we are finding that the majority of practitioners using Flower Remedies are also intimately involved in their studies and research with astrology Even the dispenser of Flower Remedies who is not an astrologer can quickly learn to identify the position of the planets in his patient s horoscope and through this simple knowledge he can select and try out the appropriate repertoire Quite frequently a patient will telephone to describe his symptoms and if you have the patient s horoscope it will give you considerable helpful information in the absence of being able to observe the patient s signs

Bach Flower Remedy Repertoires - Part Two Dr. Douglas M. Baker,2014-04-15 Bach Flower Remedy Repertoires Part Two Larch to White Chestnut It takes several years to become familiar with the dispensing of the Bach Flower Remedies and it is only then that the clinician becomes aware that there are always certain symptoms and signs which do not quite fit into the specific categories indicated in the traditional Bach allocations Some Remedies seem to overlap naturally and others seem to require a balancing component Still others seem to indicate chronicity and there are even others that are suggestive of acute disorders By using a repertoire we blanket an area of the patient s symptoms and thus more effectively reach the levels of causation In fact a repertoire is no less than a spectrum of treatment that can be applied to a range of symptoms that themselves form a spectrum This is why antibiotics are found to be very effective in certain instances when they are applied as a broad spectrum to cover a range of bacteria Man s symptoms are very like his flora of bacteria Remove one type of bacterium and you have created favourable conditions for another type to appear Similarly we find in practice that one often deals competently with a presenting symptom only to discover that when it is disposed of another related to it deeply takes its place We have deliberately linked the repertoires to

their astrological correspondences because from experience we are finding that the majority of practitioners using Flower Remedies are also intimately involved in their studies and research with astrology Even the dispenser of Flower Remedies who is not an astrologer can quickly learn to identify the position of the planets in his patient's horoscope and through this simple knowledge he can select and try out the appropriate repertoire Quite frequently a patient will telephone to describe his symptoms and if you have the patient's horoscope it will give you considerable helpful information in the absence of being able to observe the patient's signs
