## **Back To Bismarck Eastern European Health Care In Systems Transition:**

*Back to Bismarck* Jörgen Marrée, P. P. Groenewegen, 1997 As communism fell in Europe a period of transformations began in several areas This work examines the changes in health care in the former German Democratic Republic the Czech and Slovak Republics Hungary and Poland The book consists of two parts the first containing a general description and analysis of the health care systems of the countries studied The appraisal of what has been achieved is made possible by comparison with the state of the health care structure before the collapse of communist rule In the second part a more detailed description of developments is given

**Health Reforms in Post-Communist Eastern Europe** Tamara Popic, 2023-01-01 This book provides the first in depth study of healthcare reforms in post communist Eastern Europe Combining insights from comparative politics and public policy analysis it examines health reforms in Slovenia the Czech Republic and Poland between 1989 and 2019 The book argues that the post communist transformation of healthcare policy has entailed a process of policy learning and that the countries reform pathways were shaped by a series of initiatives aimed at applying market oriented policy ideas in healthcare The success of these initiatives has been influenced by three factors policy legacies political competition and institutional configurations The book offers a novel comparison of health reform in the region and policy changes more generally It will appeal to scholars and students of public policy health policy and European politics

Health Policy and European Union Enlargement McKee, 2004-04-01 While there may be consensus on the broader issues of the core objectives of the health care system expectations differ between EU countries and European national policy makers This book seeks firstly to assess the impact of the enlargement process and then to analyse the challenges that lie ahead in the field of health and health policy

Health and Social Change in Russia and Eastern Europe William C. Cockerham, 2002-05-03 For the first time life expectancy is declining in an industrialized society In this pioneering work William C Cockerham examines the social causes of the decline in life expectancy beginning in the 1960s including Russia Poland Hungary Romania Bulgaria the Czech Republic and East Germany Health and Social Change in Russia and Eastern Europe argues that the roots of this change are mainly social rather than biomedical the result of poor policy decisions stress and an unhealthy diet Cockerham presents a theory of postmodern social change that goes beyond the borders of Eastern Europe

Market Integration and Public Services in the European Union Marise Cremona, 2011-03-03 Offering an analysis of the most pressing issues relating to the interaction between market integration and the provision of public services in the EU this book addresses the underlying systemic issues confronting core tensions at the heart of the EU's social and economic policy

*Handbook on the Political Economy of Health Systems* Joan Costa-Font, Alberto Batinti, Gilberto Turati, 2023-06-01 This ground breaking Handbook brings together a number of chapters into one comprehensive book on the timely subject matter of the political economy of health and health care The book contains up to date discussion on the state of the art of the key questions of the subject matter and it provides a unique understanding of

health policy making by drawing on an interdisciplinary approach to political economy      Welfare, Choice and Solidarity in Transition János Kornai, Karen Eggleston, 2001-05-31 Reform of the welfare sector is an important yet difficult challenge for all countries in transition from socialist central planning to market oriented democracies Here a scholar of the economics of socialism and post socialist transition and a health economist take on this challenge This 2001 book offers health sector reform recommendations for ten countries of Eastern Europe drawn consistently from a set of explicit guiding principles After discussing sector specific characteristics lessons of international experience and the main set of initial conditions the authors advocate reforms based on organized public financing for basic care private financing for supplementary care pluralistic delivery of services and managed competition Policymakers need to achieve a balance both assuring social solidarity through universal access to basic health services and expanding individual choice and responsibility through voluntary supplemental insurance The authors also consider the problems that undermine effectiveness of market based competition in the health sector      **The Europeanization of Central and Eastern Europe** Frank Schimmelfennig, Ulrich Sedelmeier, 2005 This book demonstrates the importance of the credibility and the costs of accession conditionality for the adoption of EU rules in Central and Eastern Europe      Health Law and the European Union Tamara K. Hervey, Jean V. McHale, 2004-11-04 How does the law of the European Union affect health law and policy At first sight it seems limited However despite its restricted formal competence the EU has recently become increasingly involved in the health field Litigation based on EU law has resulted in a right to receive health care services across national boundaries which may have huge practical implications for national health systems The EU has promulgated legislation regulating clinical research and the marketing of pharmaceuticals patients rights are affected by EU legislation on data protection and product liability the qualifications of health care professionals are legally recognised across the EU and the EU has acted to promote public health This book explores the various impacts of measures of EU law on national health law and policy Through elaboration of selected examples the authors show that within the EU health law cannot be regarded as a purely national affair

**European Union Health Law** Tamara K. Hervey, Jean V. McHale, 2015-11-12 The first holistic and thematic study of EU health law and its implications through its own internal logics      Health Systems, Health Services and Inequality in Population Health Peter P. Groenewegen, Ilmo Keskimäki, Alastair H. Leyland, 2025-10-29 This open access book shows the scientific and policy added value of combining health systems health services and population health research In doing so the authors create awareness among researchers to look beyond the boundaries of their own discipline and promote cross disciplinary collaboration The book also gives an overview of what is known in the scientific literature about the relationships between the structure of health systems health service provision and utilisation and inequalities in population health Health inequalities are unjust and avoidable and as a focus of health policy in many governments are widely studied in public health research But studies of health inequalities too often ignore the role that health systems and health services play in the

production of inequalities in population health and as a consequence their potential to create or reduce inequalities in health. Studies of inequalities in health often incorporate the social determinants of health. The same societal structures that form the social determinants of health also determine the health system structure and their impact on access to and the provision of health services and the benefits of health service use to patients with different socioeconomic backgrounds. This means that attempts to reduce health inequalities by addressing the social determinants of health must also consider the potential pathway through the health system and the provision of health services. In the final chapter the authors discuss ways of breaking down the barriers between the three approaches. After reading this compact volume researchers will be more aware of the theoretical and methodological approaches in the three areas and more inclined to look beyond the boundaries of their own discipline. *Health Systems, Health Services and Inequality in Population Health* is essential reading for researchers in health systems research, health services research and population health research. In addition, the brief is relevant for health policy researchers, health impact researchers, health economists, epidemiologists, public health practitioners and professionals in health services planning and management.

*Providing HIV Care: Lessons from the Field for Nurses and Healthcare Practitioners* Michelle Croston, Ian Hodgson, 2021-05-05. This very first book helps nurses and healthcare practitioners working in the field of HIV care across Europe to have practical examples of how they could improve/adapt their services to improve outcomes for people living with HIV. It provides the reader with both knowledge on a variety of different HIV-related topic areas and also helps them to translate this learning into a clinical setting. The main focus of the book is to share best practice in HIV nursing with the aim of providing a practical guide from multiple countries to improve outcomes for people living with HIV. The book also acts as a resource to healthcare practitioners who are interested in working in many places in the world or carrying out research in HIV care.

**Runaway State-Building** Conor O'Dwyer, 2006-09-14. Here Conor O'Dwyer introduces the phenomenon of runaway state building as a consequence of patronage politics in underdeveloped noncompetitive party systems. Analyzing the cases of three newly democratized nations in Eastern Europe: Poland, the Czech Republic and Slovakia, O'Dwyer argues that competition among political parties constrains patronage-led state expansion. O'Dwyer uses democratization as a starting point, examining its effects on other aspects of political development. Focusing on the link between electoral competition and state building, he is able to draw parallels between the problems faced by these three nations and broader historical and contemporary problems of patronage politics, such as urban machines in nineteenth-century America and the Philippines after Marcos. This timely study provides political scientists and political reformers with insights into points in the democratization process where appropriate intervention can minimize runaway state building and cultivate efficient bureaucracy within a robust and competitive democratic system.

**International Impacts on Social Policy** Frank Nullmeier, Delia González de Reufels, Herbert Obinger, 2022-02-28. This open access book consists of 39 short essays that exemplify how interactions between inter- and trans-national

interdependencies and domestic factors have shaped the dynamics of social policy in various parts of the world at different points in time Each chapter highlights a specific type of interdependence which has been identified to provide us with a nuanced understanding of specific social policy developments at discrete points in history The volume is divided into four parts that are concerned with a particular type of cross border interrelation The four parts examine the impact on social policy of trade relations and economic crises violence international organisations and cross border communication and migration This book will be of interest to academics and postgraduate students in the field of social policy global history and welfare state research from diverse disciplines sociology political science history law and economics      **The Feminist**

**Challenge to the Socialist State in Yugoslavia** Zsófia Lóránd, 2018-09-27 This book tells the story of new Yugoslav feminism in the 1970s and 1980s reassessing the effects of state socialism on women's emancipation through the lens of the feminist critique This volume explores the history of the ideas defining a social movement analysing the major debates and arguments this milieu engaged in from the perspective of the history of political thought intellectual history and cultural history Twenty five years after the end of the Cold War societies in and scholars of East Central Europe still struggle to sort out the effects of state socialism on gender relations in the region What could tell us more about the subject than the ideas set out by the only organised and explicitly feminist opposition in the region who as academics artists writers and activists criticised the regime and demanded change      **Primary Care In The Driver'S Seat?** Saltman, Richard, Bankauskaite, Vaida, Vrangbaek, Karsten, 2005-12-01 Primary Care in the Driver's Seat studies the reforms of primary care in Europe as well as their impacts on the broader coordination mechanisms within European health care systems      **Health Politics in Europe** Ellen M. Immergut, Karen M. Anderson, Camilla Devitt, Tamara Popic, 2021 Health Politics in Europe A Handbook is a major new reference work which provides historical background and up to date information and analysis on health politics and health systems throughout Europe In particular it captures developments that have taken place since the end of the Cold War a turning point for many European health systems with most post communist transition countries privatizing their state run health systems and many Western European health systems experimenting with new public management and other market oriented health reforms Following three introductory stage setting chapters the handbook offers country cases divided into seven regional sections each of which begins with a short regional outlook chapter that highlights the region's common characteristics and divergent paths taken by the separate countries including comparative data on health system financing healthcare access and the political salience of health Each regional section contains at least one detailed main case followed by shorter treatments of the other countries in the region Country chapters feature a historical overview focusing on the country's progression through a series of political regimes and the consequences of this history for the health system an overview of the institutions and functioning of the contemporary health system and a political narrative tracing the politics of health policy since 1989 This political narrative the core of each country case examines key health reforms in order to

understand the political motivations and dynamics behind them and their impact on public opinion and political legitimacy The handbook s systematic structure makes it useful for country specific cross national and topical research and analysis

Youth and Social Change in Eastern Europe and the Former Soviet Union Charles Walker,Svetlana Stephenson,2013-09-13 Two decades have now passed since the revolutions of 1989 swept through Eastern Europe and precipitated the collapse of state socialism across the region engendering a period of massive social economic and political transformation This book explores the ways in which young people growing up in post socialist Eastern Europe and the former Soviet Union negotiate a range of identities and transitions in their personal lives against a backdrop of thoroughgoing transformation in their societies Drawing upon original empirical research in a range of countries the book s contributors explore the various freedoms and insecurities that have accompanied neo liberal transformation in post socialist countries in spheres as diverse as consumption migration political participation volunteering employment and family formation and examine the ways in which they have begun to re shape different aspects of young people s lives In addition while social change is a central theme of the issue all of the chapters in the collection indicate that the new opportunities and risks faced by young people continue both to underpin and to be shaped by familiar social and spatial divisions not only within and between the countries addressed but also between East and West This book was originally published as a special issue of Journal of Youth Studies

Market-Based Governance John D. Donahue,Joseph S. Nye,2004-05-26 A Brookings Institution Press and Visions of Governance for the 21st Century publication The latest in a series exploring twenty first century governance this new volume examines the use of market means to pursue public goals Market based governance includes both the delegation of traditionally governmental functions to private players and the importation into government of market style management approaches and mechanisms of accountability The contributors all from Harvard University assess market based governance from four perspectives The demand side deals with new revised or newly important forms of interaction between government and the market where the public sector is the customer Chapters in this section include Steve Kelman on federal procurement reform Karen Eggleston and Richard Zeckhauser on contracting for health care and Peter Frumkin The supply side section deals with unsettled questions about government s role as a provider rather than a purchaser within the market system Contributors include Georges de Menil Frederick Schauer and Virginia Wise A third section explores experiments with market based arrangements for orchestrating accountability outside government by altering the incentives that operate inside market institutions Chapters include Robert Stavins on market based environmental policy Archon Fung on social markets and Cary Coglianese and David Lazer The final section examines both the upside and the downside of the market based approach to improving governance Contributors include Elaine Kamarck John D Donahue Mark Moore and Robert Behn An introduction by John D Donahue frames market based governance as an effort to engineer into public work some of the intensive accountability that characterizes markets without surrendering the

extensive accountability of conventional government A preface by Joseph S Nye Jr sets the book in the context of a larger inquiry into the future of governance      *Current Legal Problems 2010* George Letsas, Colm O'Cinneide, 2011-01-30 This year's volume covers topics such as military detention English criminal law terrorism democracy human rights civil liberties the media and international law family law child welfare health feminism economic theory corporate law competition regulation contract law biotechnology biodiversity and more
