

An aerial photograph of an archaeological excavation site. Several workers in hard hats and casual clothing are working in a large, rectangular pit. The ground is uneven, with some areas covered in dirt and others with wooden planks or debris. In the background, there are two buildings: a white house with a gabled roof and a red building with a dark roof. The scene is set in a rural or semi-rural area with trees and a fence visible in the distance.

Back To The Earth An Introduction To Archaeology:

Back to the Earth John P. Staeck, 2002 Presents a brief overview of archaeology that provides an understanding of the basic concepts and core issues in contemporary archaeological theory methods of excavation and analysis and interpretation

Back to the Earth John Staeck, 2001-08-01 **Archaeology, Heritage and Tourism in West Africa** Samuel Oluwole Ogundele, 2024-10-11 West Africa is a rich storehouse of heritage resources belonging to different time periods Archaeologists attempt to exhume analyse and interpret aspects of human history found in artifacts and their contexts The longstanding assumption that archaeology is simply a science of the past with little thought for the present must be rejected This book makes a striking argument for a curricular revolution which taps into the strengths of such allied fields as heritage tourism and museum management which come together to constitute Cultural Resource Management CRM This account reveals in an inspiringly clear fashion that the era of conceptualising archaeology as a near complete academic exercise is over Trans disciplinary knowledge application such as that which is found in CRM has the capacity to create employment opportunities for archaeologists and other cultural resource management graduates in West Africa and beyond It is time to take a first step in constructing the pathways of progress in the competitive world of modern education **Critically**

Reading the Theory and Methods of Archaeology Guy Gibbon, 2013-09-12 Critically Reading the Theory and Methods of Archaeology stands out as the most thorough and practical guide to the essential critical reading and writing skills that all students instructors and practitioners should have It provides priceless insight for the here and now of the Theory and Methods of Archaeology classes and for a lifetime of reading learning teaching and writing Chapters focus on rigorous reasoning skills types of argument the main research orientations in archaeology the basic procedural framework that underlies all schools of archaeology and issues in archaeology raised by skeptical postmodernists **Graphing Culture**

Change in North American Archaeology R. Lee Lyman, 2021-06-10 Documentation analysis and explanation of culture change have long been goals of archaeology Scientific graphs facilitate the visual thinking that allow archaeologists to determine the relationship between variables and if well designed comprehend the processes implied by the relationship Different graph types suggest different ontologies and theories of change and particular techniques of parsing temporally continuous morphological variation of artefacts into types influence graph form North American archaeologists have grappled with finding a graph that effectively and efficiently displays culture change over time Line graphs bar graphs and numerous one off graph types were used between 1910 and 1950 after which spindle graphs displaying temporal frequency distributions of specimens within each of multiple artefact types emerged as the most readily deciphered diagram The variety of graph types used over the twentieth century indicate archaeologists often mixed elements of both Darwinian variational evolutionary change and Midas touch like transformational change Today there is minimal discussion of graph theory or graph grammar in introductory archaeology textbooks or advanced texts and elements of the two theories of evolution are

still mixed Culture has changed and archaeology provides unique access to the totality of humankind's cultural past. It is therefore crucial that graph theory construction and decipherment are revived in archaeological discussion.

Archaeology: An Introduction Kevin Greene, 2002-11-01 This fourth edition constitutes the most extensive reshaping of the text to date. In a lucid and accessible style Kevin Greene explains the discovery and excavation of sites, outlines major dating methods, gives clear explanations of scientific techniques and examines current theories and controversies. New features include a completely new user-friendly text design with initial chapter overviews and final conclusions, key references for each chapter, section, an annotated guide to further reading, a glossary, refreshed illustrations, case studies and examples, bibliography and full index, a new companion website built for this edition providing hyperlinks from contents list to individual chapter summaries which in turn link to key websites and other material, an important new chapter on current theory emphasizing the richness of sources of analogy or interpretation available today. This new edition provides students with a sound introduction to the field of archaeology and guides them towards further study.

Handbook of Pleistocene Archaeology of Africa Amanuel Beyin, David K. Wright, Jayne Wilkins, Deborah I. Olszewski, 2023-08-17 This handbook showcases an Africa-wide compendium of Stone Age archaeological sites and methodological advances that have improved our understanding of hominin lifeways and biogeography in the continent. The focal time spans the Pleistocene Epoch c. 2.5 million to 11,700 years ago, during which important human traits such as obligate bipedalism that freed the hands to engage in creative activities, a large brain relative to body size, language and social complexity developed in the general forms that they are found today. The handbook is the first of its kind and it is expected to play a significant role in human evolutionary research by collating the African Stone Age record which exists in a fragmented state along the lines of national boundaries and colonial experiences. Showcasing emerging conceptual and methodological advances in African Pleistocene archaeology, providing reference datasets for teaching and researching African prehistory, making Africa's Stone Age record accessible to researchers and students based in Africa who may not have access to journal publications where most new field discoveries are published. The Handbook features 128 chapters of which 116 are site entries grouped by the host countries and presented in an alphabetical order. A number of those site-related entries examine multiple archaeological localities lumped under specific projects or study areas. The rest of the contributions deal with methodological topics such as luminescence and radiocarbon dating, field data recovery, lithic analysis, micromorphology and hominin fossil and zooarchaeological records of Pleistocene Africa. The introductory chapter provides an historical overview of the development of Stone Age/Paleolithic archaeology in Africa, beginning in the mid-19th century and paleoenvironmental and chronological frameworks commonly used to structure the continent's Pleistocene record. By making a good amount of African Stone Age literature accessible to researchers and the public, we wish to promote interest in human evolutionary research in the continent and elsewhere. Awarded the 2025 The Best Book Award by The Society of Africanist Archaeologists.
