Backgrounds At Machinedetector Interface:

   Backgrounds At Machine-detector Interface - Proceedings Of The Second Workshop Thomas E Browder,S K Sahu,1998-09-02 At high luminosity bottom charm and factories synchrotron radiation and lost particles due to beam gas interaction cause huge backgrounds to detectors posing problems in trigger rates radiation damage and efficiency Studies of such effects have been made and are reported in this book   **Proceedings of the Second Workshop on Backgrounds at the Machine Detector Interface** ,1998   *Linear Collider Physics in the New Millennium* Keisuke Fujii,David J. Miller,Amarjit Soni,2005 The high energy electronOCopositron linear collider is expected to provide crucial clues to many of the fundamental questions of our time What is the nature of electroweak symmetry breaking Does a Standard Model Higgs boson exist or does nature take the route of supersymmetry technicolor or extra dimensions or none of the foregoing This invaluable book is a collection of articles written by experts on many of the most important topics which the linear collider will focus on It is aimed primarily at graduate students but will undoubtedly be useful also to any active researcher on the physics of the next generation linear collider   **Information Circular** ,1989   *Energy Research Abstracts* ,1995
   Beam Dynamics Issues of High-Luminosity Asymmetric Collider Rings Andrew Marienhoff Sessler,1990   **LBL Research Review** ,1991   **Moving Object Detection Using Background Subtraction** Soharab Hossain Shaikh,Khalid Saeed,Nabendu Chaki,2014-06-20 This Springer Brief presents a comprehensive survey of the existing methodologies of background subtraction methods It presents a framework for quantitative performance evaluation of different approaches and summarizes the public databases available for research purposes This well known methodology has applications in moving object detection from video captured with a stationery camera separating foreground and background objects and object classification and recognition The authors identify common challenges faced by researchers including gradual or sudden illumination change dynamic backgrounds and shadow and ghost regions This brief concludes with predictions on the future scope of the methods Clear and concise this brief equips readers to determine the most effective background subtraction method for a particular project It is a useful resource for professionals and researchers working in this field

G. Rodd,G. J. Suski,2014-05-23 Artificial Intelligence in Real Time Control documents the proceedings of the IFAC Workshop held in Clyne Castle Swansea UK 21 23 September 1988 It includes two keynote addresses that discussed architectural issues for expert systems in real time control the problem of representing knowledge and reasoning and the problems encountered in obtaining such information Other papers contained in these proceedings are representative of the major research bodies active throughout the world in the application of AI techniques in real time control although it was inevitable that a Europe based conference would highlight the work of the European groups While AI is clearly still in the process of establishing itself it is undoubtedly a major new area of engineering endeavor Practical experience is still relatively limited and many of the results discussed at this event were obtained through simulation or in a few cases from reduced practical experience The importance though lies in the fact that many countries are pouring extensive resources into the attempt to control difficult processes by using AI techniques The wide cross section of interest was demonstrated by the fact that many diverse industries were represented at the workshop ranging from power systems control to telecommunications and into the steel industry   **Advances in Multimodal Interfaces - ICMI 2000** Tieniu Tan,Yuanchun Shi,Wen Gao,2003-06-29 Multimodal Interfaces represents an emerging interdisciplinary research direction and has become one of the frontiers in Computer Science Multimodal interfaces aim at efficient convenient and natural interaction and communication between computers in their broadest sense and human users They will ultimately enable users to interact with computers using their everyday skills These proceedings include the papers accepted for presentation at the Third International Conference on Multimodal Interfaces ICMI 2000 held in Beijing China on 1416 O ctober 2000 The papers were selected from 172 contributions submitted worldwide Each paper was allocated for review to three members of the Program Committee which consisted of more than 40 leading researchers in the field Final decisions of 38 oral papers and 48 poster papers were made based on the reviewers comments and the desire for a balance of topics The decision to have a single track conference led to a competitive selection process and it is very likely that some good submissions are not included in this volume The papers collected here cover a wide range of topics such as affective and perceptual computing interfaces for wearable and mobile computing gestures and sign languages face and facial expression analysis multilingual interfaces virtual and augmented

reality speech and handwriting multimodal integration and application systems They represent some of the latest progress in multimodal interfaces research   Cross-Cultural Design.
