Diseases caused by bacteria viruses and certain parasites have thus far been suggested as the main culprit for declining aquaculture production and are thus deemed responsible for huge losses amounting to billions of dollars annually There are a number of fish diseases that are of utmost importance due to their debilitating effects on both cultured and marine fish and includes Streptococcosis caused by a number of Streptococcus spp Furunculosis Vibriosis Edwasiellosis Mycobacteriosis Nocardiosis to name a few The need to prevent and counteract the effect of these diseases is therefore of paramount importance In recent years we saw the increase in studies focusing on fish diseases particularly on those involved in unveiling the etiological agents of the diseases and how to properly treat or eradicate them which often involved chemotherapy or administration of antibiotics To lessen the use of antibiotics which arguably brings with it harmful side effects a lot have been put into the development of effective prophylactic methods against fish diseases such as vaccines and also on finding efficient and reliable means of diagnosing the disease The volume covers in detail the various diseases in fish and shellfish caused by bacteria and viruses The contributing authors of each section have had extensive experience with fish diseases and have outlined what we need to know regarding a particular disease in a manner that is both easy to understand and apply In Chapter 1 the various methods for disease diagnosis prevention including vaccination and treatment of fish diseases are discussed Chapter 2 includes and presents the various ways fish and shellfish protect themselves or fight off disease causing pathogens through their immune systems Chapters 3 and 4 describe the diseases caused by bacterial pathogens in inland water or freshwater and marine water respectively These chapters include the identification of bacterial species responsible for the diseases and how to properly diagnose and treat them Chapter 5 presents fish diseases caused by viral pathogens their etiological agents diagnosis and treatment *Bacterial Diseases of Fish* M. V. Gorlenko, 1965

Austin, 1986-12 This work is about the biological aspects of the bacterial taxa which cause diseases in fish Diseases are considered in the context of the environment of the fish and of water and coverage includes aspects of the microbiology of water and fish Information on the structure of fish is added to familiarize readers with general fish anatomy *Fish Diseases and Disorders: Viral, bacterial, and fungal infections* P.
