Morrison, John L. Ryan, 1992-09-11 Bacterial Endotoxic Lipopolysaccharides provides an up to date two volume review of the latest information regarding bacterial lipopolysaccharide structure and activities These volumes cover the biochemistry pharmacology and pathophysiologic properties of endotoxins The volumes also thoroughly discuss the strengths and weaknesses of new therapies for septic shock that are based on an immunological attack on endotoxins and the cytokines induced by endotoxins All scientists involved in endotoxin research clinical infectious disease specialists and medical students interested in the pathogenesis of septic shock will find Bacterial Endotoxic Lipopolysaccharides invaluable as a reference resource **Bacterial Endotoxins** International Endotoxin Society, 1991 **Therapeutic Antibodies** John Landon, Tim Chard, 2012-12-06 Several aspects of clinical medicine are poised on the edge of a new era with the introduction of therapeutic antibodies This revolution has been made possible by major advances in immune technology which are now beginning to mature into clinical practice This volume is aimed at all clinicians involved with this form of treatment especially accident and emergency physicians clinical immunologists and pharmacologists It covers both the basic technology and also all the main clinical areas of application septic shock auto immune disease and cancer The future of therapeutic antibodies is also discussed including exciting new developments in catalytic antibodies This is the first occasion on which all these topics have been brought together in a single volume thus making it an important reference source for physicians and researchers in this fast moving area
