Bad Choices:

Choices: Good Choices, Bad Choices and Blind Guesses Catherine Barry, 2015-09-23 A choice is just the first step of your future course. In some cases we even take that step with our eyes closed. Ever feel like you need a road map for your life? Imagine how your students must feel when not only do they need a map, they've also never been taught how to read a map. This session will take your students on a journey through the adventure of decision making. It is designed to break down the common situations that children and teens alike find themselves in when facing choices. Good Ethics and Bad Choices Jennifer S. Blumenthal-Barby, 2021-08-03 An analysis of how findings in behavioral economics challenge fundamental assumptions of medical ethics integrating the latest research in both fields. Bioethicists have long argued for rational persuasion to help patients with medical decisions. But the findings of behavioral economics popularized in Thaler and Sunstein's *Nudge* and other books show that arguments depending on rational thinking are unlikely to be successful and even that the idea of purely rational persuasion may be a fiction. In *Good Ethics and Bad Choices* Jennifer Blumenthal-Barby examines how behavioral economics challenges some of the most fundamental tenets of medical ethics. She not only integrates the latest research from both fields but also provides examples of how physicians apply concepts of behavioral economics in practice. Blumenthal-Barby analyzes ethical issues raised by nudging patient decision making and argues that the practice can improve patient decisions, prevent harm, and perhaps enhance autonomy. She then offers a more detailed ethical analysis of further questions that arise, including whether nudging amounts to manipulation, to what extent, and at what point these techniques should be used, when, and how their use would be wrong, and whether transparency about their use is required. She provides a snapshot of nudging in the weeds, reporting on practices she observed in clinical settings including psychiatry, pediatric critical care, and oncology. Warning that there is no single simple account of the ethics of nudging, Blumenthal-Barby offers a qualified defense, arguing that a nudge can be justified in part by the extent to which it makes patients better off. *Why Good People Make Bad Choices* Charles Lawrence Allen, 2006-12-01 *Why Good People Make Bad Choices* takes readers on a journey of self-discovery by way of new insights about the human condition. The text describes how to create integrity and recognize it in others, create peace of mind, transform unwanted behavior or thoughts, and more. *Bad Choices in Our Food System* Lydia Zepeda, 2021-02-08 Globally, our food system contributes to resource and habitat depletion, climate change, pollution, social injustice, economic hardship for small and medium farmers, and a public health crisis. The environmental, social, and public health costs of this current system are not properly acknowledged. Agriculture is the leading user of land and water and a significant contributor to greenhouse gases, while farmers and agricultural and food workers are struggling to make a living. Diet is implicated in one in five deaths worldwide, and diet-related illnesses are the leading cause of deaths in the US. Unhealthy diets occur across all countries and all income levels. Despite this, we are told it is the consumers' fault. Putting the blame on individuals deflects attention from the policies that

created the problems in the first place With a focus on US policies this book examines how our global food system has given us bad choices

Jewish Socratic Questions in an Age without Plato Yehuda Halper, 2021-11-01 Winner of the 2022 Goldstein Goren Book Award from the Goldstein Goren International Center for Jewish Thought at Ben Gurion University of the Negev Yehuda Halper examines Jewish depictions of Socrates and Socratic questioning of the divine among European and North African Jews of the 12th-15th centuries Without direct access to Plato their understanding of Socrates is indirect based on legendary material on fragmentary quotations from Plato or on Aristotle Out of these sources Jewish authors of this period formed two distinct views of Socrates one as a wise ascetic monotheist and the other as a vocal skeptic The latter view has its roots in Plato's Apology where Socrates describes his divine mandate to question all knowledge including knowledge of the divine After exploring how this and similar questions arise in the works of Judah Halevi and the Hebrew Averroes Halper traces how such open questioning of the divine arises in the works of Maimonides Jacob Anatoli Gersonides and Abraham Bibago

Newell, David A. Lagnado, David R. Shanks, 2022-05-19 Straight Choices provides a fascinating introduction to the psychology of decision making enhanced by discussion of relevant examples of decision problems faced in everyday life Thoroughly revised and updated throughout this edition provides an integrative account of the psychology of decision making and shows how psychological research can help us understand our uncertain world The book emphasizes the relationship between learning and decision making arguing that the best way to understand how and why decisions are made is in the context of the learning and knowledge acquisition which precedes them and the feedback which follows The mechanisms of learning and the structure of environments in which decisions are made are carefully examined to explore their impact on our choices The authors then consider whether we are all constrained to fall prey to cognitive biases or whether with sufficient exposure we can find optimal decision strategies and improve our decision making This edition highlights advances made in judgment and decision making research with additional coverage of behavioral insights nudging artificial intelligence and explanation based decision making Written in a non technical manner this book is an essential read for all students and researchers in cognitive psychology behavioral economics and the decision sciences as well as anyone interested in the nature of decision making The Subject of Care Eva Feder Kittay, Ellen K. Feder, 2003-10-01 All people spend a considerable portion of their lives either as dependents or the caretakers of dependents The fact of human dependency a function of youth severe illness disability or frail old age marks our lives not only as those who are cared for but as those who engage in the work of caring In spite of the time energy and resources material and emotional social and individual that dependency care requires these concerns rarely enter into philosophical legal and political discussions In The Subject of Care feminist scholars consider how acknowledgement of the fact of dependency changes our conceptions of law political theory and morality as well as our very conceptions of self Contributors develop feminist understandings of dependency reassessing the place dependency occupies in our lives and in a just social order

Manhood is a Mindset J. Colin Trisler, 2020-08-12 A boy doesn't become a man by accident. The truth is it takes a special kind of father or father figure to teach his son the practical wisdom he needs to build the mindset of a real man. In his book *Manhood Is a Mindset*, pastor and father J. Colin Trisler points his son to the example of Solomon, the wisest man who ever lived, and instructs him in the fatherly wisdom Solomon taught his son in Proverbs 1:9. His book is a text-driven exposition that follows Solomon's lead and reads as a personalized discourse as a series of letters from a father to his son. Trisler wrote these letters to instruct his son in the wisdom he needs to grow into a man who is prepared to go out into the real world and earn a good life for himself. He published these letters to support all those other fathers who are working just as hard to mold their inexperienced boys into strong and capable men who are prepared to meet their responsibilities to God, their families, their neighbors, and themselves.

Addiction and Art Patricia B. Santora, Margaret L. Dowell, Jack E. Henningfield, 2010-06-01 Highly Commended in Psychiatry 2011 BMA Medical Book Awards British Medical Association. Addiction to alcohol, tobacco, and other drugs is one of the major public health issues of our time. It accounts for one of every five deaths in the United States and costs approximately one-half trillion dollars per year in health care expenditures and lost productivity. Its human costs are untold and perhaps uncountable. *Addiction and Art* puts a human face on addiction through the creative work of individuals who have been touched by it. The art included here presents unique stories about addiction. Many pieces are stark representations of life on the edge. Others are disturbing contemplations of life, meaning, and death. Some even reflect the allure of addiction and a fondness for substance abuse. A panel of addiction scientists, artists, and professionals from the art world selected the 61 pieces included here from more than 1,000 submissions. Accompanied by a written statement from the artist, each creation is emblematic of the destructive power of addiction and the regenerative power of recovery. Stunning and occasionally unsettling, this unique portfolio reveals addiction art as a powerful complement to addiction science.
