Resources in Education ,1985-06 *New Zealand Journal of Zoology* ,1989 **Evolutionary Biogeography** Juan Morrone,2009 Rather than favoring only one approach Juan J Morrone proposes a comprehensive treatment of the developments and theories of evolutionary biogeography Evolutionary biogeography uses distributional phylogenetic molecular and fossil data to assess the historical changes that have produced current biotic patterns Panbiogeography parsimony analysis of endemism cladistic biogeography and phylogeography are the four recent and most common approaches Many conceive of these methods as representing different schools but Morrone shows how each addresses different questions in the various steps of an evolutionary biogeographical analysis Panbiogeography and parsimony analysis of endemism are useful for identifying biotic components or areas of endemism Cladistic biogeography uses phylogenetic data to determine the relationships between these biotic components Further information on fossils phylogeographic patterns and molecular clocks can be incorporated to identify different cenocrons Finally available geological knowledge can help construct a geobiotic scenario that may explain how analyzed areas were put into contact and how the biotic components and cenocrons inhabiting them evolved Morrone compares these methods and employs case studies to make it clear which is best for the question at hand Set problems discussion sections and glossaries further enhance classroom use Publisher s description *Paleoecology* J. Robert Dodd,Robert J. Stanton,1991-01-16 Revised and updated it reflects the recent developments and changing emphasis in the field of paleoecology While the basic organization remains the same as the original edition there are several major changes including an extensive reorganization and shortening of Chapter 2 focusing now on environmental parameters rather than individual taxonomic groups greater use of tables with references to pertinent literature inclusion of a new chapter on taphonomy elimination of the chapter on skeletons as sedimentary particles removal of many of the recurring examples from the Neogene of the Kettleman Hills and inclusion of new references on all topics Older references have been kept and will serve to blend the historical and important milestones in the development of paleoecology with the most current research **Biogeography** Glen MacDonald,2002-02-28 Biogeography illustrates how environment space and time interact to control the large scale distribution of organisms This book can be used for these courses which can be offered in either department This title includes the key concepts related to the study of vegetation and animal distributions and the human impact on these distributions Introduction to World Vegetation P.E.
