Basic College Math Margaret L. Lial, Pearson Learning Solutions, 2000-07. A Decade of Middle School Mathematics Curriculum Implementation Margaret R. Meyer, Cynthia W. Langrall, 2008-12-01. Associate Editors: Fran Arbaugh, University of Missouri Columbia; David C. Webb, University of Colorado at Boulder; and Murrel Brewer Hoover, WVSTEM Center, Marshall University. The purpose of this book is to document the work of the Show Me Project 1997-2007 and to highlight lessons learned about curriculum implementation. Although the Show Me Project was charged with promoting the dissemination and implementation of four distinct comprehensive curriculum programs: Connected Mathematics, Mathematics in Context, MathScape, and MathThematics, most of the lessons learned from this work are not curriculum specific. Rather, they cut across the four programs and share commonalities with standards-based curriculum reform at any level. We believe that documenting these lessons learned will be one of the legacies of the Show Me Project. We anticipate that the comprehensive nature of this work will attract readers from multiple audiences that include state and district mathematics supervisors, middle grades mathematics teachers, and administrators involved in curriculum reform, as well as mathematics teacher educators. Those about to embark on the review of curriculum materials will appreciate reading about the processes employed by other districts. Readers with interests in a particular curriculum program will be able to trace the curriculum-specific chapters to gain insights into how the design of the curricula relate to professional development, adoption, and implementation issues, and teachers' personal experience using the curriculum materials. Individuals who provide professional development at the middle grades level will find chapters that they can use for both general and focused discussions. Teachers at all stages of implementation will recognize their own experiences in reading and reflecting on the stories of teacher change. Mathematics educators will find ideas on how these curricula can be used in the preparation of preservice middle grades teachers. *Basic College Mathematics* Charles P. McKeague, 2003-02-01. Ralston, G. S. Young, 2012-12-06. The Conference Workshop of which these are the proceedings was held from 28 June to 1 July 1982 at Williams College, Williamstown, MA. The meeting was funded in its entirety by the Alfred P. Sloan Foundation. The conference program and the list of participants

follow this introduction The purpose of the conference was to discuss the re structuring of the first two years of college mathematics to provide some balance between the traditional calculus linear algebra sequence and discrete mathematics The remainder of this volume contains arguments both for and against such a change and some ideas as to what a new curriculum might look like A too brief summary of the deliberations at Williams is that while there were and are inevitable differences of opinion on details and nuance at least the attendees at this conference had no doubt that change in the lower division mathematics curriculum is desirable and is coming **Essentials for College Mathematics** Lawrence D.
