Basic Documents On African Affairs:

Basic Documents on African Affairs Ian Brownlie, 1971 **The Organization of African Unity**, The political and spiritual affinity felt by black peoples may date back centuries but it was first formalized in Africa by a series of conferences at the beginning of the twentieth century In the postwar struggle for independence Africanness became a potent force Later in the early 1960s the flood of newly independent African states adopted a Pan African ideal in their common struggle against the remaining colonial and white dominated territories on the continent The launch of the Organization of African Unity OAU in 1963 was an impressive achievement by any standards and many commentators cited in this bibliography recognize this adding that the OAU s survival for thirty years is even more astonishing Overall however assessments of the OAU s activities have not been positive Lack of unanimity among member states has weakened the OAU s ability to deal with disputes While critical of OAU s ineffectiveness most writers marvel at the organization s resilience over three decades While Central and Eastern Europe fragment Africa is still represented by one organization with annual meetings continuing to be held and attended by foreign ministers prime ministers and presidents Chapters in this original and comprehensive bibliography include Literature on the OAU General Assessments The OAU in African Politics and The OAU in World Politics There are also extensive indexes of authors titles and subjects regarding the OAU Organization of African Unity is a critical resource for political scientists historians and Africa area specialists seeking to understand a changing continent *Basic Documents on African Affairs. Ed. by Ian Brownlie ,1971* *American Foreign Policy Basic Documents, 1977-1980* United States. Department of State. Office of the Historian, 1983 The African Human Rights System Vincent O. Nmejielle, 2021-09-13 This volume is a comprehensive treatment of the African human rights system in terms of the laws practice and institutions of the system The volume discusses analyzes and evaluates normative instruments of the African system the Charter of the Organization of the African Unity OAU and the African Charter on Human and Peoples Rights presenting article by article analysis of its provisions and those of the Protocol on the Establishment of the African Court on Human and Peoples Rights Similarly the OAU now the African Union the African Commission on Human and Peoples Rights and the proposed African Court on Human Rights as institutions of the system are discussed The book emphasizes a comparative approach and presents a summary of the UN the European and the Inter American human rights mechanisms with regard to their impact on the African system The role of NGOs in the African system is also considered as well as the controversial issue of human rights in pre colonial and colonial Africa **Determining Boundaries in a Conflicted World** Suzanne N. Lalonde, 2002-12-06 She argues that nothing justifies conferring such a binding status on the principle and that the uti possidetis applied in Yugoslavia was an entirely new version that can derive no legitimacy from colonial precedents While the doctrine may have considerable utility in some cases it is only principle among many that must be considered if future disputes are to be resolved so as to promote long term peace and stability Lalonde sounds a cautionary note showing

that the idea that *uti possidetis* provides a one size fits all legally incontestable solution to all territorial disputes is an illusion

International Law Reports Elihu Lauterpacht, C. J. Greenwood, Karen Lee, A. G. Oppenheimer, 2004-10-14 The International Law Reports is the only publication in the world wholly devoted to the regular and systematic reporting in English of decisions of international courts and arbitrators as well as judgments of national courts Since the Reports began in 1922 over 10 000 cases have been reported in full or digest form This new companion volume is an indispensable guide to the Reports themselves as well as being an essential compendium to the vast range of international law jurisprudence over the last eighty years The Table of Treaties covers in a single consolidation all treaties referred to in volumes 1 125 of the International Law Reports by date and treaty title It also indicates where the treaties may be found particularly useful in the case of early and bilateral treaties The Table is accompanied by indexes to the treaties by party and subject *African Boundaries* Ian Brownlie, 1979 **Peoples and Minorities in International Law** Catherine Brölmann, René Lefebvre, Marjoleine Zieck, 2023-12-11 The revival of group consciousness in Eastern European countries in the wake of the Cold War has put the protection of subnational groups high on the political agenda The present book bears witness to the renewed interest in the legal position of subnational groups in international law This book and the Conference at which provisional versions of most of the contributions were presented originate in perceived deficiencies of contemporary international law to protect subnational groups within a legal framework of which the principal subjects are states Divided into three parts the book commences with an analysis of the antagonistic relation between the right of peoples to self determination and the right of states to territorial integrity and the need to redefine these concepts in the post Cold War era The book continues with the highly controversial issue of the attribution of rights to subnational groups and the identification of subnational groups which would be entitled to such rights The second part deals with the identification and protection of peoples and minorities at different levels of organization viz subnational national and supranational This part is followed by an analysis of the modes and means by which international obligations vis vis subnational groups can be enforced Not only the judicial means are considered but also the justifiability of recourse to military means to the cause of subnational groups This book not only provides an in depth analysis of contemporary international law with respect to the protection of peoples and minorities but also of the law as it is developing in the post Cold War era **Governance and Border Security in Africa** Celestine Oyom Bassey, Oshita O. Oshita, 2010 The need therefore for effective governance through border security regimes arises from the intractable challenges of conflict management as a core objective of multilateral institutions and non governmental agencies in global governance Thus governance along the Frontier has come to be marked by density and complexity This density and complexity in frontier relations under score the disciplinary concern for border governance Book Jacket [Illusions of Location Theory: Consequences for Blue Economy in Africa](#) Francis Onditi, Douglas Yates, 2021-01-05 Illusions of Location Theory Consequences for Blue Economy in Africa questions the relevance of location theory in

explaining the coastal hinterland continuum and the implications for the utilization of blue economy ecosystem in such a contested space in Africa. It pays more attention to territorial contestations, maritime disputes, vulnerabilities of landlocked states and expansionist policies as displayed through spatial organizational regimes. These areas of investigation have previously been largely studied from the narrow perspective of location, unduly focusing on comparative advantages of distance while neglecting the influence of forces such as technology, ideology and the power of mental mapping in spatial decision making. This volume puts forward the argument that the harmonious relationship between states and efficient exploitation of the blue economy ecosystem in ways that promote peace between states lies not only in the structural transformation of markets but also in bridging the spatial and social divide between the coastal and hinterland societies. Thus, this work proffers possibilities for a holistic regime for managing Africa's coastal hinterland continuum through innovative strategies such as SMART blue economies and the infusion of the geopolitical dimension into the management of maritime and territorial diplomacy. The combination of theoretical and empirical analysis buttressed by in-depth case studies of what works in the management of blue economy ecosystem and what does not work make this volume ideal for researchers, students and practitioners interested in African regional studies, African political economy, political geography, strategic military studies, governance of seas and oceans and maritime science diplomacy.

Boundaries and Secession in Africa and International Law Dirdeiry M. Ahmed, 2015-12-11. This book challenges the central assumption of the law of territory by establishing that *uti possidetis* is not a general principle of law and arguing that African customary rules were generated. It includes in-depth coverage of African secession with issues of human rights, law, self-determination and political science presented in a new light.

The Organization of African Unity and Peacekeeping Mack L. Gibson, 1974. Bondage of Boundaries and Identity Politics in Postcolonial Africa Ndlovu-Gatsheni, Sabelo J., Mhlanga, Brilliant, 2013-10-20. What has confounded African efforts to create cohesive, prosperous and just states in postcolonial Africa? What has been the long-term impact of the Berlin Conference of 1884-5 on African unity and African statehood? Why is postcolonial Africa haunted by various ethno-national conflicts? Is secession and irredentism the solution? Can we talk of ethno-futures for Africa? These are the kinds of fundamental questions that this important book addresses. Sabelo J. Ndlovu-Gatsheni and Brilliant Mhlanga's book introduces the metaphor of the northern problem to dramatise the fact that there is no major African postcolonial state that does not enclose within its borders a disgruntled minority that is complaining of marginalization, domination and suppression. The irony is that in 1963, at the formation of the OAU, postcolonial African leaders embraced the boundaries arbitrarily drawn by European colonialists and institutionalised the principle of inviolability of bondage of boundaries, thereby contributing to the problem of ethno-national conflicts. The successful struggle for independence of the Eritrean people and the secession of South Sudan in 2011 have encouraged other dominated and marginalised groups throughout Africa to view secession as an option. Ndlovu-Gatsheni and Mhlanga successfully assembled competent African scholars to deal exhaustively

with various empirical cases of ethno national conflicts throughout the African continent as well as engaging with such pertinent issues as Pan Africanism as a panacea to these problems This important book delves deeper into complex issues of space languages conflict security nation building war on terror secession migration citizenship militias liberation violence and Pan Africanism Government of the Shadows Eric Wilson,2009-01-20 This book uncovers the activities of clandestine governments It explores how covert political activity and transnational organised crime are linked and how they ultimately work to the advantage of state and corporate power Using a variety of case studies from the mafia in Italy to programmes for food and reconstruction in Iraq the authors illustrate that parapolitical structures are not deviant but central to the operation of global governments The creation of this parallel world economy the source of huge political and economic potential entices states to undertake new forms of regulation either through their own intelligence agencies or through the more shadowy world of criminal cartels *The Dynamic of Secession* Viva Ona Bartkus,1999-06-28 This book first published in 1999 offers an explanation for the occurrence of secessionist conflict based on a comparative study of numerous historical examples

Minorities and the Making of Postcolonial States in International Law Mohammad Shahabuddin,2021-06-10 A critical analysis of how international law operates in the ideology of the postcolonial state to marginalise minority groups

States and Power in Africa Jeffrey Herbst,2014-12-21 Originally published A2000 With new preface and revised chapter nine by the author Africa in the Post-Decolonization Era Richard E. Bissell,Michael S. Radu,1984-01-01 Addressing the changing problems and perspectives of Africa leading Africanists examine economic political and ideological trends in the sub Saharan region since the time of independence and assess their probable impact on the future of the subcontinent Contributors deal with such essential topics as the influence of ideology on the evolution of African politics the role of the military in African politics the decline in food production and economic crises as a direct threat to the continent s independence the problem of South Africa and the U S position with regard to South Africa and the failure of the African collective security system American Foreign Policy Current Documents ,1989
