Taking on Climate Change Through Green Taxation Dinis, Ana Arromba,David, Fátima,Pereira, Liliana,Dias, Sara Luís,2023-08-10 Since environmental issues entered the global agenda governments have directing businesses towards sustainability The term sustainability is commonly associated with a firm s environmental attentiveness although there are two other areas in which companies should be sustainable social to achieve an adequate relationship and fluid communication with their stakeholders and economic to accomplish transparent management and correct distribution of the wealth that is generated The growing demand for corporate transparency encourages the publication of sustainability or corporate social responsibility CSR reports providing information of a non financial nature concerning the social and environmental dimensions of business activity namely relations with local communities the protection of human rights corporate governance and adaptation to climate change Being no exception and following the European agenda for sustainability development several governments have implemented tax measures that promote sustainable consumption and production patterns to reduce energy dependence on external sources and efficiently achieve international targets among others within a context of neutrality of the tax system This is where environmental tax incentives come in underlying a

paradigm shift The relationship between tax policy and environmental policy is seen by governments as an opportunity to adjust the tax system to a more energy efficient economy in the use of resources For instance green tax incentives motivate investors to invest in green properties encouraging them to opt for greener solutions That is tax incentives should be viewed as a tool to empower taxpayers to change actions that may reduce carbon emissions and contribute to sustainability Taking on Climate Change Through Green Taxation provides applied research on increasing green tax literacy to build the capacity of companies to adopt sustainable practices in favor of environmental protection to raise companies awareness of sustainable reporting and to increase international discussion on the issue of environmental taxation and its impact on more sustainable business decisions Led by business experts with over 20 years of experience this book will cover topics such as corporate social responsibility environmental tax management and sustainable tax policy This resource is ideal for policymakers corporate governance and social responsibility professionals and researchers interested in taxation accounting auditing finance corporate governance and corporate social responsibility *The Yale Journal of International Law* ,1995 Tax Avoidance and European Law Mihaela Tofan,2022-06-07 Tax law is one of the legal fields with the most subtle influence on European integration and EU law The European economic cooperation project emerged with the customs union essentially a tax law concept and evolved alongside other topics of tax harmonization Still the existence of the EU tax law is disputed The research on the topic is significant as the integration of national economies and markets has increased substantially both within the EU and globally This has put a strain on domestic tax rules which are subject to the demands of the international taxation requirements This book explores the relationship between tax avoidance regulation and sovereignty within the European Union analyzing the impact of the effective regulatory methods for limiting and eliminating aggressive tax planning by multinational companies Focusing on analyzing good practice in fiscal regulation efficiency and the results generated by the tax jurisprudence both at national and European level its main objective is to present the argument for inter dependency between taxation and the current changes in the concept of sovereignty It highlights where fiscal regulation has led to uniform yet flexible solutions for the actual fight against companies abusive fiscal conduct when taking advantage of tax competition This text will be of value to academics researchers and advanced students in tax law and tax avoidance regulation and their intersection with sovereignty in the context of the European Union The CCH Journal of Asian Pacific Taxation ,1992 *Advanced Governing for Capital Flight* Walter Amedzro St-Hilaire,2020-04-13 This volume takes an in depth look at the economic issue of capital flight and outlines strategic methods to address the problem of international tax evasion and bank secrecy In order to address these issues the book explores the development prospects of tax evasion governance and identifies obstacles to the efficiency of current tax policies To overcome the capital flight issue all lines of attack need to be examined There is a need to establish responsibility to set priorities for action that significantly reduces the incentives for capital outflows of this kind and to seek international consensus International tax evasion has undermined the

credibility of political and administrative systems This volume lays the foundation for creating an institutional framework that provides transparency of control systems in the face of the guilty roles of tax evasion actors This requires an effort of economic intelligence that involves mobilizing statistical resources and exploiting them in order to finely identify deviating situations and risk Key features of the book Captures the richness and diversity of tax evasion strategies Provides an understanding of the prospects of capital flight policies Identifies stakeholders implications in order to provide a global solution to government Develops a rigorous approach to the problem of tax evasion and the capital flight process Advanced Governing for Capital Flight posits that when combined the initiatives offered in the volume will be the powerful blow to bank secrecy Aimed as much at the neophyte as at the insider who questions tax evasion strategies this book very ambitious by its specificity is intended primarily for those who will be called upon to work in the fields of tax evasion and capital flight policies
