time Although many of the pathways in the microbial nitrogen cycle were described more than a century ago additional fundamental pathways have been discovered only recently These findings imply that we still have much to learn about the microbial nitrogen cycle the organisms responsible for it and their interactions in natural and human environments Progress in nitrogen cycle research has been facilitated by recent rapid technological advances especially in genomics and isotopic approaches In this Research Topic we reviewed the leading edge of nitrogen cycle research based on these approaches as well as by exploring microbial processes in modern ecosystems
