Choice Controversy:

School Choice and Social Controversy Stephen D. Sugarman, Frank R. Kemerer, 2011-12-01 In this important new volume distinguished legal and public policy scholars address issues that are critical to the successful drafting and implementation of school choice programs yet are usually overlooked in the choice debate They explore whether school choice is a threat or an opportunity to the many children who are largely deprived of choice today and they offer a variety of perspectives with some authors enthusiastic others more skeptical The book begins with a discussion of the types and extent of school choice what is known about its consequences and how politics has influenced its development It then focuses on three important public policy issues how school choice can revolutionize the way schools are financed what policy interventions are necessary to increase the supply of choice schools and how choice programs can be held accountable to parents and the state without undermining institutional autonomy The book addresses legal issues including whether public and private choice schools will be required to observe student and teacher rights generally recognized in traditional public schools how the religion and speech clauses of the First Amendment may affect the participation of religious schools in school choice programs whether school choice will enhance or aggravate opportunities for racial justice what the implications of school choice are for teacher unions and collective bargaining and whether children with disabilities will be accommodated in school choice programs under federal disability law Throughout the book the authors offer recommendations for public policy development The contributors are Jeffrey Henig Robert Bulman and David L Kirp Paul T Hill Robert M O Neil Jesse H Choper Betsy Levin William G Buss and Laura F Rothstein Stephen D Sugarman is Agnes Roddy Robb Professor of Law at the University of California Berkeley Frank R Kemerer is Regents Professor and director of the Center for Educational Controversies Towards a Discourse of Reconciliation Pamela Lapage, Hugh Sockett, 2004-01-14 For the last 100 years people have argued vigorously about a vast number of educational issues At the heart of the arguments lies the question What is the purpose of education This conflict of educational purpose has seen rifts between academics educators politicians and parents The authors of this book don't believe the conflicts need to be so hysterical nor that the oppositions are incompatible Rather that it is in the manner in which debate is conducted that is so damaging In this book the authors contend that there are political social moral and civic needs for a new stance to debate the way forward Examining a number of key controversies in educational discourse the book suggests ways in which controversies may be reconciled by looking for interrelations mutual dependencies and links of importance It develops current debate and provides suggestions for developing nurturing and supportive learning communities and so lead to educational change *Addiction and Choice* Nick Heather, Gabriel Segal, 2017 Views on addiction are often polarised either addiction is a matter of choice or addicts simply can't help themselves But perhaps addiction falls between the two This book contains views from philosophy neuroscience psychiatry psychology and the law exploring this middle ground between free choice and no choice *Hearing*

Age of Fracture Daniel T. Rodgers, 2012-09-03 In the last quarter of the twentieth century the ideas that most Americans lived by started to fragment Mid century concepts of national consensus managed markets gender and racial identities citizen obligation and historical memory became more fluid Flexible markets pushed aside Keynesian macroeconomic structures Racial and gender solidarity divided into multiple identities community responsibility shrank to smaller circles In this wide ranging narrative Daniel Rodgers shows how the collective purposes and meanings that had framed social debate became unhinged and uncertain Age of Fracture offers a powerful reinterpretation of the ways in which the decades surrounding the 1980s changed America Through a contagion of visions and metaphors on both the intellectual right and the intellectual left earlier notions of history and society that stressed solidity collective institutions and social circumstances gave way to a more individualized human nature that emphasized choice agency performance and desire On a broad canvas that includes Michel Foucault Ronald Reagan Judith Butler Charles Murray

Jeffrey Sachs and many more Rodgers explains how structures of power came to seem less important than market choice and fluid selves Cutting across the social and political arenas of late twentieth century life and thought from economic theory and the culture wars to disputes over poverty color blindness and sisterhood Rodgers reveals how our categories of social reality have been fractured and destabilized As we survey the intellectual wreckage of this war of ideas we better understand the emergence of our present age of uncertainty

Economy in Society Jacek Tittenbrun,2011-07-12 This book offers an in depth analysis of sociology e g such classics as Weber Parsons and Homans and its adjacent social sciences with special reference to economics including public choice theory property rights theory the Austrian school and others This discussion submits many fresh observations giving the theories under consideration their due it at the same time exposes their flaws In addition the book contains a constructive programme of the research field in question termed socio economic structuralism which involves many theoretical innovations notions of ownership and class This positive theory draws on but is far from mimicking achievements of the thinkers considered in the remaining parts of the book

Implementing Education Policies Jonathan D. Jansen,Yusuf Sayed,2001 For the first time in South Africa a critical dialogue has been recorded between government policy makers and academic researchers on the subject of education policy and practice Implementing education policies attends to problems politics and possibilities of implementing the policy goals of the first post apartheid government established in 1994 The value of this book lies in several insider accounts of the policy process told through the voices of the legislators politicians and bureaucrats concerned with steering national value commitments through the education system Running parallel to these practitioner accounts lie a number of critical analyses of the technical capabilities and political designs that explain the trajectory of education reform in the 1990s The dialogue brings together in a developing country context different experiences and analyses of one of the most intractable problems facing all national education systems the persistent gap between policy ideals and practical realities This volume is essential reading for all academics and students of education at higher education institutions as well as teachers researchers and policy makers

Handbook of Decision Making Goktug Morcol,2006-11-01 Handbook of Decision Making includes the wisdom of the long theological and philosophical traditions of human society as well as a systematic exploration of the implications of contemporary evolutionary theories Common patterns in decision making styles are identified as well as the common variations that different contexts may generate The text covers the multiplicity of mainstream decision making styles such as cost benefit analysis and linear programming It also explains alternative and emerging methods such as geographic information systems Q methodology and narrative policy analysis Practical applications are discussed using decision making practices in budgeting public administration and governance drug trafficking and information systems

Handbook on Theories of Governance Christopher Ansell,Jacob Torfing,2016-06-24 In the past two decades governance theories have arisen semi independently across multiple disciplines In law and regulation planning democratic theory economics public

management and international relations among other disciplines scholars have sought to describe new strategies of governing As a result the notion of governance is now one of the most frequently used social science concepts in the world No single theory encompasses this diverse body of work but rather multiple theories with different aims and perspectives The Handbook on Theories of Governance collects these theories of governance together as an analytical resource for governing in an increasingly complex fragmented and dynamic society *The Social Sciences and Rationality* Hudson

Meadwell,2017-10-19 In recent decades rational choice theory has emerged as the single most powerful controversial claimant to provide a unified theoretical framework for all the social sciences In its simplest form the theory postulates that humans are purposive beings who pursue their goals in a rational efficient manner seeking the greatest benefit at the lowest cost This volume brings together prominent scholars working in several social science disciplines and the philosophy of science to debate the promise and problems of rational choice theory As rational choice theory has spread from its home base in economics to other disciplines it has come under fierce criticism To its critics the extension of the explanatory model mistakenly assumes that the logic of economic rationality can explain non economic behavior and at its worst commits the ethnocentric error of imposing Western concepts of rationality on non Western societies and cultures This volume includes strong advocates as well as forceful critics of the rational choice approach However in contrast to previous debates all the contributors share a commitment to open constructive and knowledgeable dialogue Well known advocates of rational choice theory Michael Hechter Michael Smith Chris Manfredi explicitly ponder some of its serious limitations while equally well known critics Ian Shapiro Mario Bunge strike a surprisingly conciliatory tone in contemplating its legitimate uses Vociferous critics of neoclassical economics Bunge favorably discuss sociological proponents of rational choice theory while two economists who are not particularly anti mainstream Robin Rowley George Grantham critically assess the problems of such assumptions in their discipline Philosophers Storrs McCall and sociologists John Hall alike reflect on the variable meaning of rationality in explaining social behavior In the introduction and conclusion the editors survey the current state of the debate and show how open constructive dialogue enables us to move beyond hackneyed accusations and dismissals that have characterized much previous debate **The Human Factor in Social Capital Management** Paul C. Manning,William

Sun,2015-02-13 This book covers the management of social capital processes as they are accomplished understood experienced and shaped by owner managers It aims to develop a deeper understanding of management processes and to contribute to a greater congruence between lived social capital perspectives and experiences and theoretical and empirical literature Education and the Scandinavian Welfare State in the Year 2000 Arild Tjeldvoll,2013-10-31 This significant contribution to comparative education presents an authoritative discussion of the recent changes in Denmark Finland Iceland Norway and Sweden The implementation of a democratic educational policy in Scandinavia has been affected by the dominance of the Protestant Church mass immigration from Third World nations a growing belief in rugged individualism

newfound respect for privatization and the market economy and the increasing unemployment of the technical revolution Education has been unable to adapt rapidly enough to meet the changing needs of this transformed Scandinavia In this comprehensive collection of articles contributors present their findings thoughts and concerns for the Scandinavia of both the 90s and the future Political Conflict and Political Preferences Claudia Landwehr,2009-04-01 What is the effect of deliberation on political actors and when can we expect it to be successful Are mutual understanding and consensus realistic results of political decision making processes or is compromise the most we can hope for This book addresses what appear to be blind spots in theories of deliberative democracy the conceptual and empirical relationship between communication and political preferences and the institutional preconditions for preference change and co ordination It proposes a model of preference transformation through communication and develops a typology of modes of political interaction that distinguishes discussion deliberation debate and bargaining This serves as a framework for the analysis of a fundamental and highly polarising conflict the German decision over the import of embryonic stem cells Analysis of communicative interaction in different forums shows how a well justified and widely accepted compromise was achieved in a conflict that had appeared irresolvable in moral terms and irreducible in terms of interest *Risk in the Modern Age* NA NA,2019-06-12 Environmental decision making in recent decades has become increasingly dependent on scientific expertise Grounded in universal principles of knowledge these expert evaluations often depart from the assessments of ordinary members of the public Whether the issue is nuclear power genetic testing food safety or biodiversity conservation lay people are increasingly charging experts with being ignorant of local contextual considerations Scientists as well as many policy makers in turn contend that the public is hopelessly irrational in gauging environmental risks A growing group of social theorists has begun to take a keen interest in these disputes because risk captures central themes of late modernity Increasing individualization emerging new social movements and declining public trust in key institutions are notions that loom large in these debates Highlighting both theoretical and empirical perspectives this volume brings together a distinguished group of environmental sociologists who critique and extend current thinking on what it means to live in a risk society **The Disorder of Political Inquiry** Keith Topper,2009-07-01 Engaging the work of thinkers such as Rorty Taylor Bourdieu Bhaskar and Arendt and literature in political science and history and philosophy of science Topper proposes a pluralist normative and broadly pragmatist conception of political inquiry one alive to the notorious vagaries idiosyncrasies and uncertainties of political life **The Female Turn** Malin Ah-King,2023-01-04 This book traces the history of how evolutionary biology transformed its understanding of females from being coy reserved and sexually passive to having active sexual strategies and often mating with multiple males Why did it take so long to discover female active sexual strategies What prevented some researchers from engaging in sexually active females and what prompted others to develop this new knowledge The Female Turn provides a global overview of shifting perceptions about females in sexual selection research on a wide range of animals from

invertebrates to primates Evolutionary biologist and feminist science scholar Malin Ah King explores this history from a unique interdisciplinary vantage point Based on extensive knowledge of the scientific literature on sexual selection and in depth interviews with leading researchers pioneers and feminist scientists in the field her analysis engages with key theoretical approaches in gender studies of science Analyzing the researchers scientific interests theoretical frameworks specific study animals technological innovations methodologies and sometimes feminist insights reveals how these have shaped conclusions drawn about sex Thereby The Female Turn shows how certain researchers gained knowledge about active females whereas others missed ignored or delayed it that is how ignorance was produced Conflicting Missions? Tom Loveless,2011-04-01 Ask people whether teachers unions are good or bad for education and you are likely to receive a wide variety of opinions A 1998 Gallup Poll asked whether teachers unions helped hurt or made no difference in the quality of education in U S public schools Twenty seven percent responded that unions helped 26 percent that they hurt and 37 percent that they made no difference 10 percent of those surveyed said they did not know Although teachers unions were first organized in the nineteenth century and collective bargaining has been a fact of life in most communities since the 1960s the body of literature evaluating the impact of teachers unions on American education is surprisingly small Conflicting Missions helps close the knowledge gap by providing a clear balanced analysis of the role of teachers unions in education reform The volume emerges from a 1998 conference organized by the Program on Education Policy and Governance at Harvard University The contributors represent a broad array of disciplinary backgrounds and methodological approaches including some of the unions harshest critics and most loyal supporters In examining the relationship of teachers unions and educational reform the authors approach the subject from several directions They ask whether unions affect educational productivity most notably in terms of student achievement They analyze how teachers unions function as professional organizations concerned with the occupation of teaching as institutional actors defending interests within a bureaucratic system of education and as political actors wielding influence on legislation and elections Reflecting a variety of perspectives and opinions Conflicting Missions offers a balanced analysis of a controversial topic It is a useful starting point for readers who want to discover the complexity of teachers unions and their influence both positive and negative on the national effort to improve America s schools *Fuzziness and Approximate Reasoning* K. K. Dompere,Kofi Kissi Dompere,2009-03-25 This monograph is special in its orientation and contribution to current state of our understanding of decision choice process and knowledge production Its special orientation is to bring to the scientific community the discussions on the epistemic structure of the relationships among uncertainty expectations risk possibility probability and how the rules of fuzzy paradigm and the methods of fuzzy rationality bring new and different understanding to the relationships At the level of theory of knowledge it presents the structure and epistemic analysis of uncertainty expectations and risk in decision choice actions through the characteristics of substitution transformation and input output processes in categorial dynamics of actual

potential duality The interactive effects of rationality and expectation are examined around belief prospect time and conditions of belief justification where the relationship between possibility and probability as a sequential link between potential and actual is analyzed to provide some understanding of the role of relative costs and benefits in defining risk in both nature and society The concepts of possibilistic and probabilistic beliefs are explicated in relation to rationality and the decision choice process where the analytical relationship between uncertainty and expectation formation is presented leading to the introduction of two types of uncertainty composed of fuzzy uncertainty and stochastic uncertainty
