Choosing The Right Formula Initial Report:

Choosing the Right Formula National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Formula Allocations, 2001-09-07 The workshop was a direct outgrowth of a previous study by the CNSTAT Panel on Estimates of Poverty for Small Geographic Areas That panel established under a 1994 act of Congress began its work with a very specific mission to evaluate the suitability of the U S Census Bureau's small area estimates of poor school age children for use in the allocation of funds to counties and school districts under Title I of the Elementary and Secondary Education Act In carrying out their assignment panel members came to realize that the properties of data sources and statistical procedures used to produce formula estimates interacting with formula features such as thresholds and hold harmless provisions can produce consequences that may not have been anticipated or intended It also became evident that there is a trade off between the goals of providing a reasonable amount of stability in funding from one year to the next and redirecting funds to different jurisdictions as true needs change In one instance for example the annual appropriation included a 100 percent hold harmless provision ensuring that no recipient would receive less than the year before However there was no increase in the total appropriation with the result that new estimates showing changes in the distribution of program needs across areas had no effect on the allocations *Choosing the Right Formula* provides an account of the presentations and discussions at the workshop The first three chapters cover the overview case studies and methodological sessions respectively Chapter 4 summarizes the issues discussed in the roundtable and concluding sessions with emphasis on the identification of questions that might be addressed in a panel study

Statistical Issues in Allocating Funds by Formula National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Formula Allocations, 2003-02-24 In 2000 the federal government distributed over 260 billion of funding to state and local governments via 180 formula programs These programs promote a wide spectrum of economic and social objectives such as improving educational outcomes and increasing accessibility to medical care and many are designed to compensate for differences in fiscal capacity that affect governments abilities to address identified needs Large amounts of state revenues are also distributed through formula allocation programs to counties cities and other jurisdictions *Statistical Issues in Allocating Funds by Formula* identifies key issues concerning the design and use of these formulas and advances recommendations for improving the process In addition to the more narrow issues relating to formula design and input data the book discusses broader issues created by the interaction of the political process and the use of formulas to allocate funds *Statistical Issues in Allocating Funds by Formula* is only up to date guide for policymakers who design fund allocation programs Congress members who are crafting legislation for these programs and federal employees who are in charge of distributing the funds will find this book indispensable

Data for Resource Allocation, Planning, and Evaluation, 2004-07-09 The Ryan White Comprehensive AIDS Resources Emergency CARE Act gives funding to cities states and other public and private entities to provide care and support services to individuals with HIV and AIDS who have low incomes and little or no insurance The CARE Act is a discretionary program that relies on annual appropriations from Congress to provide care for low income uninsured or underinsured individuals who have no other resources to pay for care Despite its successes funding has been insufficient to address all of the inequalities and gaps in coverage for people with HIV In response to a congressional mandate an Institute of Medicine committee was formed to reevaluate whether CARE allocation strategies are an equitable and efficient way of distributing resources to jurisdictions with the greatest needs and to assess whether quality of care can be refined and expanded Measuring What Matters Allocation Planning and Quality Assessment for the Ryan White CARE Act proposes several types of analyses that could be used to guide the evaluation and improvement of allocation formulas as well as a framework for assessing quality of care provided to HIV infected persons Fiscal Year 2004 Budget United States. Congress. Senate. Committee on Indian Affairs (1993-), 2003 **Public Financing and Delivery of HIV/AIDS Care** Institute of Medicine, Board on Health Promotion and Disease Prevention, Committee on the Public Financing and Delivery of HIV Care, 2005-11-04 Each year it is estimated that approximately 40 000 people in the U S are newly infected with HIV In the late 1990s the number of deaths from AIDS dropped 43% as a result of highly active antiretroviral therapy Unfortunately the complex system currently in place for financing and delivering publicly financed HIV care undermines the significant advances that have been made in the development of new technologies to treat it Many HIV patients experience delays in access to other services that would support adhering to treatment As a result each year opportunities are missed that could reduce the mortality morbidity and disability suffered by individuals with HIV infections Public Financing and Delivery of HIV AIDS Care examines the current standard of care for HIV patients and assesses the extent the system currently used for financing and delivering care allows individuals with HIV to actually receive it The book recommends an expanded federal program for the treatment of individuals with HIV administered at the state level This program would provide timely access and consistent benefits with a strong focus on comprehensive and continuous care and access to antiretroviral therapy It could help improve the quality of life of HIV AIDS patients as well as reduce the number of deaths among those infected
