Apollo's Eye Denis Cosgrove, 2003-10-17 This award winning science history explores our evolving image of the globe and how it has shifted our relationship to the world Long before we had the ability to photograph the earth from space to see our planet as it would be seen by the Greek god Apollo images of the earth as a globe had captured popular imagination In Apollo's Eye geographer Denis Cosgrove examines the historical implications for the West of conceiving and representing the earth as a globe a unified spherical body Cosgrove traces how ideas of globalism and globalization have shifted historically in relation to changing images of the earth from antiquity to the Space Age He connects the evolving image of a unified globe to politically powerful conceptions of human unity Winner of the Association of American Publishers Professional and Scholarly Publishing Award in Geography Earth Sciences

The Legacy of Apollo Jamie Claire Fumo, 2010-01-01 The wonderful breadth of Jamie Fumo's engaging examination of classical forms in the Middle Ages offers valuable new interpretations of Chaucer's work and rare insight into medieval tropes of narrative authority Suzanne Yeager Department of English Fordham University

Pagans and Christians in Late Antique Rome Michele Renee Salzman, Marianne Sághy, Rita Lizzi Testa, 2016

This book sheds new light on the religious and consequently social changes taking place in late antique Rome The essays in this volume argue that the once dominant notion of pagan Christian religious conflict cannot fully explain the texts and artifacts as well as the social religious and political realities of late antique Rome Together the essays demonstrate that the fourth century city was a more fluid vibrant and complex place than was previously thought Competition between diverse groups in Roman society be it pagans with Christians Christians with Christians or pagans with pagans did create tensions and hostility but it also allowed for coexistence and reduced the likelihood of overt violent physical conflict Competition and coexistence along with conflict emerge as still central paradigms for those who seek to understand the transformations of Rome from the age of Constantine through the early fifth century

Constantine, Divine Emperor of the Christian Golden Age Jonathan Bardill, 2012 Constantine was the first Roman emperor to convert to Christianity The book explores the emperor's image as conveyed through literature art and architecture and shows how Constantine reconciled the tradition of imperial divinity with his monotheistic faith It demonstrates how the traditional themes and imagery of kingship were exploited to portray the emperor as the saviour of his people and to assimilate him to Christ This is the first book to study simultaneously both archaeological and historical information to build a picture of the emperor's image and propaganda It is extensively illustrated Provided by publisher *A Select Library of the Nicene and Post-Nicene Fathers of the Christian Church* Philip Schaff, 1887 *The Works of N. Confessions The Enchiridion On Christian Doctrine and On the Trinity As a work of one of the most influential Church Fathers The City of God is a cornerstone of Western thought expounding on many profound questions of theology such as the suffering of the righteous the existence of evil the conflict between free will and divine omniscience and the doctrine of original sin **The City of God Volumes I & II Revised** Aurelius Augustine, 2019-08-27 One of Augustine's most famous works this book tells of the fall of the Roman Empire and the rise of the holy and righteous City of God from the ashes While building a utopia much like The Republic does Augustine uses sound theology to build the foundations of the city's morals and lawful authority Many theologians especially within the Catholic tradition owe their beginnings to the teachings of Augustine and this work is one of the starts of the field Now in larger print **The Image of the Feminine in the Poetry of W.B. Yeats and Angelos Sikelianos** Anastasia Psoni, 2018-12-19 Modernism as a powerful movement saw the literary and artistic traditions as well as pure science starting to evolve radically creating a crisis even chaos in culture and society Within this chaos myth offered an ordered picture of that world employing symbolic and poetic images Both W B Yeats and Angelos Sikelianos embraced myth and symbols because they liberate imagination and raise human consciousness bringing together humans and the cosmos Being opposed to the rigidity of scientific materialism that inhibits spiritual development the two poets were waiting for a new age and a new religion expecting that they themselves would inspire their community and usher in the change In their longing for a new age archaeology was a magnetic field for Yeats and Sikelianos as it was for many writers and thinkers After Sir Arthur Evans's discovery of the Minoan Civilization where women appeared so peacefully prominent the dream of re-creating a gynocentric mythology was no longer a fantasy In Yeats's and Sikelianos's gynocentric mythology the feminine figure appears in various forms and like in a drama it plays different roles Significantly a gynocentric mythology permeates the work of the two poets and this mythology is of pivotal importance in their poetry their poetics and even in their life as the intensity of their creative desire brought to them female personalities to inspire and guide them Indeed in Yeats's and Sikelianos's gynocentric mythology the image of the feminine holds a place within a historical context taking the reader into a larger social political and religious space **Gaia's Gift** Anne Primavesi, 2004-03-01 Gaia's Gift the second of Anne Primavesi's explorations of human relationships with the earth asks that we complete the ideological revolution set in motion by Copernicus and Darwin concerning human importance They challenged the notion of our God given centrality within the universe and within earth's evolutionary history Yet as our continuing exploitation of earth's resources and species demonstrates we remain wedded to the theological assumption that these are there for our sole use and benefit Now James Lovelock's scientific understanding of the existential reality of Gaia's gift of life again raises the question of our proper place within the universe It turns us decisively towards an understanding of ourselves as dependent on rather than in control of the whole earth community The Myth of Apollo and Daphne from Ovid to Quevedo Mary E. Barnard, 1987 The transformation of the myth of Apollo and Daphne in literary treatments from Ovid through the Spanish

Golden Age are studied in theme and variation showing how the protean figures of the myth meant different things to different ages each age fashioning the lovers in its own image The Myth of Apollo and Daphne focuses on the themes of love agon and the grotesque and their transformations as the writers through a kind of artificial mythopoeia invent variants for the tale altering the ancient model to create their new distinctive visions
