Decision Making Under Uncertainty and Constraints Martine Ceberio, Vladik Kreinovich, 2023-01-03 This book shows on numerous examples how to make decisions in realistic situations when we have both uncertainty and constraints In most these situations the book's emphasis is on the why question i.e. on a theoretical explanation for empirical formulas and techniques Such explanations are important they help understand why these techniques work well in some cases and not so

well in others and thus help practitioners decide whether a technique is appropriate for a given situation Example of applications described in the book ranges from science biosciences geosciences and physics to electrical and civil engineering education psychology and decision making and religion and of course include computer science AI in particular explainable AI and machine learning The book can be recommended to researchers and students in these application areas Many of the examples use general techniques that can be used in other application areas as well so it is also useful for practitioners and researchers in other areas who are looking for possible theoretical explanations of empirical formulas and techniques

Colonial Trauma and Postcolonial Anxieties Maureen Sioh, 2024-04-01. *Colonial Trauma and Postcolonial Anxieties* argues that economic decisions reflect unconscious anxieties about survival and dignity experienced in a cycle of repeat trauma tracing back to the original trauma of loss in colonialism. Readers will understand how emerging economies evaluate the costs and benefits of key economic policies in the postcolonial era using a psychoanalytical framework. While there are psychoanalytic studies of the economy and finance from a western perspective, there have been no sustained psychoanalytic studies from the perspective of East Asian economies, the fastest growing in the world. Scholars will also find the methodology combining archival research with field studies, including rare interviews with senior decision makers, useful in their own research, since it is rare to find studies of social theory that are empirically rich. This book will be of interest to policymakers and scholars of political economy, international development, human geography, postcolonial studies, psychoanalysis, and area studies, Southeast and East Asia. The book can also be used as a text for graduate and upper-level university courses.

The Matrix and Meaning of Character Nancy J. Dougherty, Jacqueline J. West, 2013-12-02. *Character* structures underlie everyone's personality. When rigidly defended, they limit us; yet as they become more flexible, they can reveal sources of animation, renewal, and authenticity. *The Matrix and Meaning of Character* guides the reader into an awareness of the archetypal depths that underlie character structures, presenting an original developmental model in which current analytic theories are synthesised. The authors examine nine character structures, animating them with fairy tales, mythic images, and case material, creating a bridge between the traditional language of psychopathology and the universal realm of image and symbol. This book will appeal to all analytical psychologists, psychoanalysts, and psychotherapists who want to strengthen their clinical expertise. It will help clinicians to extend their clinical insights beyond a strictly behavioural, medical, or cognitive approach, revealing the potential of the human spirit.

Beyond Pedagogy Brenda Trofanenko, 2014-07-11. *Beyond Pedagogy* reconsiders the public purpose of museums, explores issues standing at the intersection of public pedagogy, memory, and critical theory, focusing on the explicit and implicit educational imperative of art, natural history, and indigenous museums, cultural centers, memorial sites, heritage houses, and other cultural heritage sites that comprise the milieu of educating, learning, and knowing. Taken together, the various essays comprising this book demonstrate that a more nuanced examination of the role of cultural heritage institutions as pedagogical sites requires a critical gaze to understand the function of the authority and ways through which such

institutions educate Beyond Pedagogy also makes a vital point about the complexity of such institutions and the need to comprehend how pedagogy emerges not only as an end result of the museum's educational purpose but also in relation to the historically defined mandates that increasingly come to question the distinction between the knowledge we know and how we come to know it As such this volume expands our understandings of the ways in which pedagogy operates in the contexts of museums and heritage sites and the forms of knowledge knowing and being it conjures celebrates obscures and or silences in the process of producing among museum visitors particular notions of identity subjectivity and voice ones that more often than not reify rather than challenge traditional conceptualizations of the nation and its past present and future

Precarious Imaginaries of Beirut Judith Naeff, 2017-12-01 This book investigates a shared experience of time and space in the post civil war city of Beirut the suspended now Based on the close analysis of a large corpus of cultural objects including visual art literature architecture and cinema the book argues that last decades have witnessed a gradual shift in understanding this temporality from being a transitional phase to a more durable experience of precariousness The theoretically rich analyses take us on a journey through Beirut's real and imagined geographies from garbage dumps to real estate advertisements and from subterranean spaces to martyr's posters For scholars of cultural analysis urban studies cultural geography and critical theory the case of post 1990 Beirut offers a fascinating case of neoliberal urban renewal which challenges existing theories For scholars of Lebanon and Beirut this study complements existing work on post civil war Lebanese cultural production rooted in trauma studies by its focus on the city's continual exposure to violence

Postcolonial Issues in Australian Literature , **Liberalism** Mark Dice, 2018-11-13 It's as if we're living in an episode of the Twilight Zone Every day we are inundated by news reports trending topics on social media and new political movements promoting such bizarre beliefs about race gender sexuality and life in general that it's impossible in many cases to distinguish whether such ideas are serious or if they're a parody of what liberalism has become The political differences between liberals and conservatives used to be pretty well established but recently the tug of war between the Left and the Right took a dramatic and disturbing turn Modern liberalism has been replaced with new mind boggling agendas promoting the adoption of unscientific authoritarian and sociologically disastrous ideologies In attempts to accomplish their plans the Left are conspiring to end freedom of speech traditional families long cherished holidays and hope to implement a new world order Who is behind this madness What is their ultimate goal How far are they willing to go to achieve it And what can we do to stop them Bestselling author and media analyst Mark Dice takes you on a tour inside the minds of those constructing this new social landscape in his groundbreaking investigation Liberalism Find a Cure **Freud** M. Andrew Holowchak, 2012-09-13 Freud From Individual Psychology to Group Psychology by M Andrew Holowchak explores Freudian psychoanalysis as a full fledged science as it relates psychoanalytically to issues of individual psychology Individual psychology and group psychology Massenpsychologie It answers questions such as How effective did Freud

perceive individual psychology to be What is group psychology To what extent did Freud think psychoanalytic investigation of group pathology could be curative of social ills How seriously did Freud take metapsychological explanation and How important were auxiliary hypotheses borrowed often uncritically from other disciplines in the formation of group psychology In sketching out the development of individual psychology and group psychology Holowchak argues that for Freud psychoanalysis was always essentially a procedure for investigating unconscious phenomena that allowed for explication and understanding of both individual and group issues Part I of Freud focuses on individual psychology traces out the development of Freud's thought on clinical therapy and analyzing the various clinical methods and theories Freud employed over the years Holowchak critically examines the merit of Freudian psychoanalysis as a remedy for individual pathology Part II focuses on group psychology starting with an overview of the conditions influencing Freud's shift to group psychology issues and moving on to a psychoanalytic examination of other disciplines non sciences and sciences alike Finally Holowchak analyzes the worth of Freudian psychoanalysis as a remedy for group pathology Readers are given a comprehensive depiction as well as a critical analysis of the development of psychoanalysis in an easy to assimilate manner from Freud's early days in analytic therapy beginning with his stays with Charcot and Bernheim in France to his mature thinking where he develops notions such as the death drive and the structural model id ego and super ego to compensate for theoretical defects in his earlier thinking
