Spurring Job Growth Through Capital Formation While Protecting Investors United States. Congress. Senate. Committee on Banking, Housing, and Urban Affairs, 2013 **Corporate Governance The Future of Corporate Governance in Capital Markets Following the COVID-19 Crisis** OECD, 2021-06-30 This report provides an evidence based overview of developments in capital markets globally leading up to the COVID 19 crisis It then documents the impact of the crisis on the use of capital markets and the introduction of temporary corporate governance measures **Regional Economic Outlook, April 2017, Western Hemisphere Department** International Monetary Fund. Western Hemisphere Dept., 2017-05-19 With the global economy gaining some momentum economies of Latin America and the Caribbean are recovering from a recession at the regional level in 2016 This gradual improvement can be understood as tale of two adjustments external and fiscal that are ongoing in response to earlier shocks But headwinds from commodity terms of trade shocks and country specific domestic factors are fading paving the way for real GDP to grow by about 1 percent in 2017 Regional activity is expected to pick up further momentum in 2018 but at a slower pace than previously anticipated while

medium term growth is projected to remain modest at about 2.6 percent. The outlook is shaped by key shifts in the global economic and policy landscape where slow growth, low productivity and high income inequality are creating pressure for a shift toward inward looking policies in some advanced economies. Domestic fundamentals and developments however will continue to play a significant role in determining growth for the region. At the same time risks to the outlook have widened in a setting of higher global uncertainty. In this challenging external context countries should aim for completing fiscal and external adjustments to preserve or rebuild policy buffers. Charting a course toward higher sustainable and more equitable growth will also require strengthening structural reforms. Specifically closing infrastructure gaps, improving the business environment, governance and education outcomes and encouraging female labor participation are necessary to boost medium term growth and foster income convergence. Chapters in this report examine the ongoing external adjustment to terms of trade shifts, drivers of capital flows to the region, the role of the investor base and macroeconomic impact of migration and remittances.
