The state:

Introduction:

In 21st Century, State is ever where. It is touching, directly or indirectly, all aspects of human existence. It has become omnipotent. This was not the case a few centuries ago. Back then state had limited role. It was primarily concerned with (i) law and order and (ii) revenue collection. From this very small role to today's all pervading role, the role of state has been expanding.

Definitions and Nature of State:

Many scholars have defined state in various ways. Even today modern day scholars attempt to define state taking into account its modern functions.

In 4th century B.C. **Aristotle**, who is regarded as 'Father of Political Science' had defined state. According to him, state is a union of families and villages having for its end a perfect and self-sufficing life, by which we mean a happy and honorable life.

According to some scholars, this definition is so comprehensive that it can hardly be improved upon. Aristotle's definition communicates the primary objectives of the state however we must study some more definitions of the State.

Holland: State is a Politically organized people of a definite territory.

Prof Woodrow Wilson, 'State is a People organized for law within a definite territory.'

Though these two definitions are short, they are inadequate also. Hence we must look at some more definitions

Dr. J.W.Garner, 'As a concept of Political Science, the State is a community of persons more or less numerous, permanently occupying a definite portion of territory, independent or nearly so, of external control and possessing an organized government to which the great body of inhabitants render habitual obedience.'

Prof. Harold Laski, 'The State is a territorial society divided into government and subjects claiming within its allotted physical area, a supremacy over all other institutions.'

If we analyse the two definitions, we can identify four elements which are essential to make a State. These are (i) Population (ii) territory (iii) government (iv) Sovereignty.

Today we live in the age of globalization and an age of international politics. Hence we must consider definition given by **Philimore** which takes into account the perspective of international law. According to him, 'State is a people permanently occupying a fixed territory, bound together by common laws, habits and customs into one body politics exerting through the medium of an organized government, independent sovereignty and control over people and things within its boundaries, capable of making war and peace and of entering into all international relations with the countries of the world.'

This definition extends the scope of state. The earlier Scholars focused on four elements. This definition adds the fifth dimension to international relations, war and peace etc.

Elements of the State:

As noted State has four constituent elements (i) Population (ii) Territory (iii) Government (iv) Sovereignty Each of these elements needs to be studied properly.

Protestant Mind of English Reformation, 1570-1640 Charles H. George,Katherine George,2015-12-08 From 1570 to 1640 Protestantism became the leading moral and intellectual force in England During these seven decades of rapid social

change the English Protestants were challenged to make morally and spiritually comprehensible a new pattern of civilization. In numerous sermons and tracts such men as Donne, Hall, Hooker, Laud, and Perkins explored the meaning of man and his society. The nature of the Protestant mind is a crucial question in modern historiography and sociology. Drawing on the writings of these important years, the authors find that the real genius of the Protestant mind was not Puritanism but the via media, the reconciliation of religious and social tensions. Puritanism, the authors show, is a word, not a thing. Originally published in 1961, *The Princeton Legacy Library* uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Education in Europe: Policies and Politics José Antonio Ibáñez-Martín, Gonzalo Jover, 2013-03-09. While analysing what it means to be European, Ortega y Gasset pointed out that European culture is defined by human's desire to find the most perfect way of being, a way that must be both firmly founded in history and clearly projected into the future. Ortega's idea had perhaps less currency when what European unity meant still boiled down to an economic community. Today, however, things have changed, and after a long, complex process we now face a new scenario ambitiously named European Union, one whose foundations, competencies, and aims are no longer simply economic but seek to foster a life in common without losing respect for the national identities of the member States. The legend, in fact, Jack Lang confessed that this statement was invented by him and perhaps is true. Says that near the end of his life Jean Monnet once answered a journalist's question affirming that if he had to do it all over again he would start with culture rather than with the economy.
