When we talk about what freedom of speech means in America the discussion almost always centers on freedom rather than speech. Taking for granted that speech is an unambiguous and stable category we move to considering how much freedom speech should enjoy. But as Randall Bezanson demonstrates in *Speech Stories* speech is a much more complicated and dynamic notion than we often assume. In an age of rapidly accelerated changes in discourse combined with new technologies of communication the boundaries and substance of what we traditionally deem speech are being reconfigured in novel and confusing ways. In order to spark thought discussion and debate about these complexities and ambiguities Bezanson probes the stories behind seven controversial free speech cases decided by the Supreme Court. These stories touch upon the most controversial and significant of contemporary first amendment issues: government restrictions on hate speech and obscene and indecent speech pornography and the subordination of women; the constitutionality of campaign finance reform and the treatment to be accorded new technologies of communication under the Constitution. The result is a provocative engagement of the reader in thinking about the puzzles and paradoxes of our commitment to free expression.

Intensive Exposure Experiences in Second Language Learning Carmen Mu?z, 2012-10-01. Its chapters yield much needed evidence on the role of context of acquisition and highlight the unique role of intensive exposure in second language learning.

Speechwriting in Perspective Thomas H. Neale, Jean M. Bowers, 2003. Writing for the spoken word is a special discipline; it requires that speechwriters' products be written primarily although not exclusively to be heard, not read. Speeches are better cast in simple, direct and often short sentences that can be easily understood by listeners. Rhetorical devices such as repetition, variation, cadence and balance are available to and should be used by the speechwriter. It is important for speechwriters to analyse audiences according to factors such as age, gender, culture, profession and income level, size of audience, political affiliation, if any, and on the occasion, for or purpose of the speech. Most effective speeches do not exceed 20 minutes in length. After researching a topic speechwriters must prepare an outline from which the speech will be developed. They should strive to maintain a clear theme throughout the speech. Most speeches will have a three-part structure consisting of an introduction, a body and a conclusion. The accepted style of contemporary American public address is natural, direct, low key, casual and conversational. This puts the listeners at ease and promotes a sense of community between the audience and speaker.

Punctuation should reflect the sound structure of the speech reinforcing the rhythm and pace of actual speech Clarity of expression is as important a consideration in speech grammar as rigid adherence to the rules for written law This book presents the essentials of speechwriting Preface Speechwriting in Perspective A Brief Guide to Effective and Persuasive Communication Thomas H Neale Public Speaking and Speechwriting Selected References Jean M Bowers Index *The 1980 Guide to the Evaluation of Educational Experiences in the Armed Services: Coast Guard, Marine Corps, Navy, Dept. of Defense* American Council on Education,1980 **Brain Experience** C.R.
