With Larry Hatcher's *Step by Step Basic Statistics Using SAS* Exercises, you apply what you learned in the companion text *Step by Step Basic Statistics Using SAS Student Guide*. Using the instruction provided, you soon will be creating data sets and performing statistical analyses to investigate specific research questions. The exercise data is inspired by studies in the social and behavioral sciences so your analyses and findings mirror real research. Each chapter presents two opportunities to explore the results of the analyses and to practice writing summary reports. For the first exercise, a complete solution is provided, including the SAS program output and analysis report as well as tables and figures. For the second exercise, you supply the solution.

Step-by-Step Basic Statistics Using SAS Larry Hatcher, 2003-04-02 Larry Hatcher's *Step by Step Basic Statistics Using SAS Student Guide* first introduces you to SAS software, then leads you through a variety of elementary statistical analyses that are commonly used in the social and behavioral sciences. With SAS, you can focus more on conceptual issues in statistical analysis and less on the mechanics of performing mathematical operations by hand. Main topics include how to use the SAS windowing environment to write and submit SAS programs, how to create SAS data sets and modify the variables that they contain, basic descriptive statistics, measures of central tendency and variability, frequency tables and graphs, correlation and regression, t tests, single sample, independent and paired samples analysis of variance, ANOVA, both one way and factorial, and the chi square test of independence. Even if you are new to statistics and computers, you soon will be recording research data, writing SAS programs, and interpreting the results. Reinforce what you've learned by completing the exercises in the companion text *Step by Step Basic Statistics Using SAS Exercises*.
