world and commercial and aesthetic pressures during the colonial period of European expansion From the sixteenth century onwards passion for collecting became a major influence on the concept of chinoiserie Finally John Carswell shows how the combined efforts of scholars collectors and archaeologists have illuminated how why and when blue and white developed and has made such a major impact on world civilization The stunning illustrations are from museums and private collections around the world and include some never before published The book also includes a very special unpublished material from a mysterious fourteenth century shipwreck in the Red Sea Seen by only a handful of experts the findings from this shipwreck are very important for art history and are published here for the first time Full details with line drawings and complete mini catalogue of this material are given in the book [Library of Congress Subject Headings](#) Library of Congress. Forts and Fortification in Wallacea Sue O'Connor,Andrew McWilliam,Sally Brockwell,2020-09-07 This volume presents ground breaking research on fortified sites in three parts of Wallacea by a highly regarded group of scholars from Australia Europe Southeast Asia and the United States In addition to surveying and dating defensive sites in often remote and difficult terrain the chapters provide an important and scholarly set of archaeological and ethnohistoric studies that investigate the origin of forts in Wallacea Socio political instability from climate events the materialisation of indigenous belief systems and the substantial impact of imperial expansion and European colonialism are examined and comprise a significant addition to our knowledge of conflict and warfare in an under studied part of the Indo Pacific The archaeological record for past conflict is

frequently ambiguous and the contribution of warfare to social development is mired in debate and paradox Authors demonstrate that forts and other defensive constructions are costly and complicated structures that while designed and built to protect a community from a threat of imminent violence had and have complicated life histories as a result of their architectural permanence strategic locations and traditional cultural and political significance Understanding why conflict outbreaks like human colonisation often appear in the past as a punctuated event can best be approached through long term records of conflict and violence involving archaeology and allied historical disciplines as has been successfully done here The volume is essential reading for archaeologists cultural heritage managers and those with an interest in conflict studies Professor Geoffrey Clark College of Asia and the Pacific The Australian National University Canberra Catalogues of Reproductions of Objects of Art, in Metal, Plaster, and Fictile Ivory, Chromolithography, Etching, and Photography ,1869

Cooke,2022-09-13 A bold reorientation of art history that bridges the divide between fine art and material culture through an examination of objects and their uses Art history is often viewed through cultural or national lenses that define some works as fine art while relegating others to the category of craft Global Objects points the way to an interconnected history of art examining a broad array of functional aesthetic objects that transcend geographic and temporal boundaries and challenging preconceived ideas about what is and is not art Avoiding traditional binaries such as East versus West and fine art versus decorative art Edward Cooke looks at the production consumption and circulation of objects made from clay fiber wood and nonferrous base metals Carefully considering the materials and process of making and connecting process to product and people he demonstrates how objects act on those who look at use and acquire them He reveals how objects retain aspects of their local fabrication while absorbing additional meanings in subtle and unexpected ways as they move through space and time In emphasizing multiple centers of art production amid constantly changing contexts Cooke moves beyond regional histories driven by geography nation state time period or medium Beautifully illustrated Global Objects traces the social lives of objects from creation to purchase and from use to experienced meaning charting exciting new directions in art history
