Wyatt, 2016-09-06 This book is the result of several years teaching of blueprint reading in night schools and several years teaching of drafting preceding used for three years in blueprint and mimeographed tried out In it The material was form In this form it was thoroughly preparing it for book form the drawings have been carefully redrawn and the text improved upon as experience suggested to be desirable Essentially it is however a tried text one that has been used to teach the reading of drawings to one class of mixed trades one class of ship carpenters two classes of house carpenters and one class of machinists It has been designed to suit as wide a range of trades as possible Usually each new principle is illustrated by example both a machine and an architectural In recognition of the principle that we learn by doing a number of drawings are included to give practise in reading At the end of each chapter a number of questions are placed a few for the purpose of review but more to stimulate the study of the drawings The study of mechanical drawing has long been recognized as a sure method of learning to read drawings The Author knows it to be effective but round about long and tedious The Author finds shop sketching just as effective and much quicker It is essential that students have some method of expression of the principles discussed in the text and shop sketching provides this admirably When time permits the book can well be supplemented with the study of many blueprints supplied by the teacher or the students and much more sketching than called for herein can also be effectively required The Author believes the book to be well suited to individual study aside from its use as a class text When so used he urges that the shop sketching be not neglected and that the student seek criticism of his drawings by some draftsman Most of the drawings used herein have been designed especially to illustrate the text The

drawings For 8 Bench Grinder however are taken from the excellent little books First Year Lathe Work and How to Run a Lathe published by the South Bend Lathe Works The Author gratefully acknowledges the courteous privilege granted him to use them in this work THE AUTHOR TABLE OF CONTENTS Page Preface 3 I Introduction 7 II Kinds of Drawings III The Theory of Orthographic Projection IV Meaning of Various Kinds of Lines 17 V Foreshortened Lines Inclined Surfaces Auxiliary Projection 9 12 22 VI Scale Drawing Dimensions 27 VII Breaks Representing Drawings as Broken 35 VIII Sections 38 IX Bolts Screw Threads Machining or Finish 43 X Rivets Structural Steel 46 XI Architectural Conventions 49 XII Study of a Set of House Plans 55 XIII Study of the Bench Grinder 71 Mechanical drawing is a universal language understood by the artisans of all nations The drawings made by a skillful French draftsman are just as readable to an American draftsman as those made by his fellow draftsmen though he may know no French but his native one It is a language with rules of grammar just as any other language and a draftsman is a good or poor draftsman very largely or violates these rules as he observes It is a valuable business asset to many of us to be able to understand and speak French Spanish or some other language than our own It may be of no value to us to be fluent writers or speakers in the tongue Just so a great many men in this great industrial age are finding it necessary to understand the great universal language of mechanical drawing

black blue or maroon lines on a white background Another type of duplicating process rarely used to reproduce working drawings is the photostatic process in which a large camera reduces or enlarges a tracing or drawing The photostat has white lines on a dark background Businesses use this process to incorporate reduced size drawings into reports or records The standards and procedures prescribed for military drawings and blueprints are stated in military standards MIL STD and American National Standards Institute ANSI standards The Department of Defense Index of Specifications and Standards lists these standards it is issued on 31 July of each year The following list contains common MIL STD and ANSI standards listed by number and title that concern engineering drawings and blueprints
