A Place Against Time Paul Sillitoe, 2013-10-31 A Place Against Time is an ethnographically focused environmental study of Montane New Guinea where people were among the world's first to cultivate crops some ten millennia ago and where today an enduring agricultural condition continues. It arranges its account of climate, vegetation, topography and geology according to their relationship with the soils of the region occupied by Wola speakers in the Southern Highlands Province of Papua New Guinea in the Western Pacific. This book breaks new intellectual ground as an ethno-environmental investigation with a soils perspective, ethno-pedology being a little researched topic to date. The Rain Cloud Charles

Tomlinson, 2023-10-04 The Rain Cloud by Charles Tomlinson. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics, literary fiction and non-fiction to forgotten or yet undiscovered gems of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format. **Talking and Doing Science in the Early Years** Sue Dale

Tunnickliffe, 2013-05-29 Young children are intuitive emergent scientists; they observe, raise hypotheses, experiment and notice patterns. Most of our everyday actions at home and in other settings, inside and outside, have a scientific basis, and it is through these early experiences that children formulate their ideas about the world in which we live. This accessible book introduces the simplest form of the principles and the big ideas of science and provides a starting point for encouraging children to have an interest and experiential understanding of basic science and engineering. It shows you how you can support young children in exploring everyday phenomena and develop their scientific language skills through readily available resources and hands-on experiences. Each chapter focuses on a different aspect of science and includes a summary of the big ideas to refresh your own scientific knowledge, numerous activities that encourage young children to observe, question and carry out their own investigations, a useful list of everyday resources and relevant vocabulary. Providing a wealth of exciting, meaningful ways to promote scientific experiences and learning, this highly practical book will help you to build on children's natural curiosity about the world and develop their understanding through your everyday provision in early years settings and at home. *Encyclopedia of World Climatology* John E.
