Chinese Dialectics From Yijing To Marxism:

Chinese Dialectics Chenshan Tian, 2005-01-01 The history of Chinese Marxist thought is intimately intertwined with ancient autochthonous philosophical texts In Chinese Dialectics the complete intellectual history of Chinese Marxism is laid bare *Marxism, Religion, and Emancipatory Politics* Graeme Kirkpatrick, Peter McMylor, Simin Fadaee, 2022-08-24 This edited collection evaluates the relationship between Marxism and religion in two ways Marxism's treatment of religion and the religious aspects of Marxism Its aim is to complicate the superficial understanding of Marxism as a simple rejection of religion both in theory and practice Divided into two parts Theory and Praxis this book brings together the three different themes of Marxism religion and emancipation for the first time The first part explores the more theoretical discussions regarding the relationship between Marxism and various themes or currents within religious thought to highlight points of compatibility as well as incompatibilities conflicts The studies in the second part of the collection refer to how Marxist ideas are received in different parts of the world They show that as soon as Marxism arrives in a new place the theory interacts and bonds with a pre existing stock of ideas each changing the other reciprocally **Urban Revolution Now** Christian Schmid, 2016-12-05 When Henri Lefebvre published *The Urban Revolution* in 1970 he sketched a research itinerary on the emerging tendency towards planetary urbanization Today when this tendency has become reality Lefebvre's ideas on everyday life production of space rhythm analysis and the right to the city are indispensable for the understanding of urbanization processes at every scale of social practice This volume is the first to develop Lefebvre's concepts in social research and architecture by focusing on urban conjunctures in Barcelona Belgrade Berlin Budapest Copenhagen Dhaka Hong Kong London New Orleans Nowa Huta Paris Toronto S o Paulo Sarajevo as well as in Mexico and Switzerland With contributions by historians and theorists of architecture and urbanism geographers sociologists political and cultural scientists *Urban Revolution Now* reveals the multiplicity of processes of urbanization and the variety of their patterns and actors around the globe **Tianxia in Comparative Perspectives** Roger T. Ames, Sor-hoon Tan, Steven Y. H.

Yang, 2023-10-31 *Tianxia* conventionally translated as all under Heaven in everyday Chinese parlance simply means the world But *tianxia* is also a geopolitical term found in canonical writings that has a deeper historical and philosophical significance Although there are many understandings of *tianxia* in this literature interpretations within the Chinese process cosmology generally begin with an ecological understanding of intra national relations that acknowledge the mutuality and interdependence of all economic and political activity This volume contextualizes the *tianxia* vision of geopolitical order within a variety of strategies drawn from a broad spectrum of cultures and peoples The conversation among the contributors is guided by several central questions Is *tianxia* the only model of cosmopolitanism Are there ideas and ideals comparable to *tianxia* that exist in other cultures What alternative perspectives of global justice have inspired Western Indian Islamic Buddhist and African cultural traditions The fundamental premise here is that in order for a planetary *tianxia* system to be

relevant and significant for the present time and for our vision of the future it must acknowledge the plurality of moral ideals defining the world's cultures while at the same time seek practical ways to formulate a minimalist morality that can provide the solidarity needed to bring the world's people together

modern world *China's Rise to Power in the Global Order* Nicolai S. Mladenov, 2021-02-13 This book examines the foundations of China's grand strategy as it is critical to any assessment of current and future Chinese regional and global strategic behavior especially Beijing's policies toward the USA This eclectic study aims to analyze the current Chinese and American flexible grand strategies based on present complexity and disorder It identifies the major building blocks of both strategies their major material and ideational drivers and assesses how they might evolve in the future Additionally the author looks at China's relations with important international players such as Russia ASEAN UN EU and BRICS *The Chinese Dream and Law* Shiping Hua, 2025-08-01 Analyzes the major laws promulgated during the Xi Jinping era against a background of the politics and ideology of the Xi regime in general The Chinese Dream and Law study situates the Chinese Dream in the modern utopianism discourse since the Late Qing following Kang Youwei and Mao Zedong As a tool to promote the Chinese Dream the legal reforms during the period depart from the thin constitutionalism of the first three decades of the post Mao era and resemble aspects of Legalism Although the current regime has made some progress in protecting people's socioeconomic rights through law it has retreated on upholding judicial independence to protect people's civil and political rights especially those vis vis the state The first three decades since post Mao reform are an aberration that deviates from the normal trajectory of modern Chinese political development The decade long efforts by the current regime have slowed the growing official corruption and have slightly narrowed the growing income gap although economic growth was cut in half The Chinese style of utopianism could mean a better place as in the country's ancient past It could also become a no place in the modern diverse world because this human hope that has a universal claim is often built on authoritarian means **The Politics and Philosophy of Chinese Power** R. James Ferguson, Rosita Dellios, 2016-12-12 This book provides a timely analysis of the politics philosophy and history of Chinese power focusing on social strategic and diplomatic trends that have shaped China for over three thousand years Chinese elites have used the past to inform the present but have also mobilized new ideas to address the country's rapid transition to global power China's intellectual world can draw on a surprisingly pluralist legacy When Chinese thinkers assess power they bring to bear their classical legacy the military classics Chinese socialism and Western political thought There are also a number of intriguing formulations that give shape to the exercise of Chinese power Among these are comprehensive national strength stability preservation soft power asymmetric conflict and counter intervention strategies This book looks at key periods in Chinese history when attitudes to power evolved and at their current expressions These include China's expanded use of think tanks to chart the future efforts at creating an eco civilization to balance growth and an extended set of security and information capabilities From observing the centrality of power in today's international affairs the book moves to the foundational concepts of Chinese governance its belief in a strategic configuration of power as understood in military contexts as well as its growing diplomatic and maritime engagement abroad This analysis culminates in new ideas of functional multipolarity Power is also deployed internally China

s use of nationalism as a major tool for state building and cohesion the ongoing role of socialism and the People s Liberation Army are all examined in this light China s current strategic culture has shaped President Xi Jinping s search for a new model of power for China in the twenty first century an endeavor that will have serious implications for the future global order This book provides an alternative perspective on China s trajectory towards a revised international system Chinese Hegemony Feng Zhang,2015-06-03 Chinese Hegemony Grand Strategy and International Institutions in East Asian History joins a rapidly growing body of important literature that combines history and International Relations theory to create new perspectives on East Asian political and strategic behavior The book explores the strategic and institutional dynamics of international relations in East Asian history when imperial China was the undisputed regional hegemon focusing in depth on two central aspects of Chinese hegemony at the time the grand strategies China and its neighbors adopted in their strategic interactions and the international institutions they engaged in to maintain regional order including but not limited to the tribute system Feng Zhang draws on both Chinese and Western intellectual traditions to develop a relational theory of grand strategy and fundamental institutions in regional relations The theory is evaluated with three case studies of Sino Korean Sino Japanese and Sino Mongol relations during China s early Ming dynasty when a type of Confucian expressive strategy was an essential feature of regional relations He then explores the policy implications of this relational model for understanding and analyzing contemporary China s rise and the changing East Asian order The book suggests some historical lessons for understanding contemporary Chinese foreign policy and considers the possibility of a more relational and cooperative Chinese strategy in the future
