abound in economic history about the global trade in Indian textiles that flourished from the seventeenth to the nineteenth centuries they rarely engage with the material itself and are less concerned with the artistic and much less the literary and social significance of the taste for cloth This book is richly illustrated with images of textiles garments and paintings that are held in little known collections and have rarely if ever been published Rather than rely solely on records of European trading companies Houghteling draws upon poetry in local languages and integrates archival research from unpublished royal Indian inventories to tell a new history of this material culture one with a far more balanced view of its manufacture and use as well as its purchase and trade
