**Unmeasured Information and the Methodology of Social Scientific Inquiry** Donald W. Katzner,2012-12-06 I have three reasons for bringing out the ensuing collection of essays First since analysis without measurement this is generally not the same thing as what is commonly referred to as qualitative methods or qualitative research in the social science literature is a relatively new scholarly endeavor I am striving to enhance its visibility by attracting a wider audience than what would normally be possible with single narrowly focused essays published in scattered journals Second several of these essays may in the minds of potential readers appear to have been published in places that if not obscure are at least inconvenient to locate Collecting them in a single anthology then will help to increase their accessibility Third I am trying to suggest as strongly as I can that analysis without measurement is a viable intellectual enterprise that ought to be taken seriously in social science This last point will clearly be enhanced if the whole that follows turns out as I hope and suspect it does to be greater than the sum of its parts All the same each reader will have to judge for himself or herself the extent to which I have through the present collection successfully made the case for taking up analysis without measurement The partitioning of these essays into two groups is somewhat though by no means completely arbitrary      *Encyclopedia of Government and Politics* Mary Hawkesworth,Maurice Kogan,2013-11-07 This is a brand new edition of the critically acclaimed Encyclopedia of Government and Politics which has been fully revised and updated to provide a systematic account of politics and political studies at the beginning of the new millennium Providing a penetrating analysis of government and politics at a global regional and nation state level the Encyclopedia assesses both traditional and contemporary approaches and projects the paths of future research The articles provide a degree of critical analysis far beyond a simple descriptive outline of the subject Internationally respected contributors have been carefully selected to present contending approaches to related topics both to clarify the political implications of the various methodologies and to enrich the portrayal of political life With its expanded revised and updated coverage Encyclopedia of Government and Politics is more than ever an indispensable tool for students teachers professional analysts and policy makers      *Political Order* V. **Islamic Liberalism** Leonard Binder, 1988-08-15 The resurgence of Islamic fundamentalism in the 1980s influenced many in the Islamic world to reject Western norms of liberal rationality and to return instead to their own tradition for political and cultural inspiration This rejection of foreign thought threatens to end the centuries long dialogue between Islam and the West a dialogue that has produced a nascent Middle Eastern liberalism along with many less desirable forms of discourse With Islamic Liberalism Leonard Binder hopes to reinvigorate that dialogue asking whether political liberalism can take root in the Middle East without a vigorous Islamic liberalism But Binder asks is an Islamic liberalism possible The Islamic political community presents special problems to the development of an indigenous liberalism That community is conceived of as divinely ordained and its notions of the good are to be derived from scriptural revelation not arrived at through rational discourse Liberal politics would seem to stand little chance of surviving in such an atmosphere let alone thriving Binder responds to the challenge of Edward Said's critique of Orientalism of a range of neo Marxian development theorists of Sayyid Qutb's fundamentalist vision of Samir Amin's vision of Egypt's role in the Arab awakening of Tariq al Bishri's new populism of Zaki Najib Mahmud's pragmatism and the structuralism of Arkoun and Laroui The deconstruction of these varied texts produces a number of persuasive hermeneutical conclusions that are sequentially woven together in a critical argument that refocuses our attention on the central question of political freedom and democracy In the course of constructing this argument Binder reopens the dialogue between Western modernity and Islamic authenticity and reveals the surprising extent to which there is a convergent interest in liberal democratic civil society Finally in a concluding chapter he addresses the prospects for liberalism in the three major bourgeois states of Islam Egypt Turkey and Iran

**Political Protest and Social Change** Charles F. Andrain, David Ernest Apter, 1995 At the close of the twentieth century political protests have erupted throughout the world While the collapse of communism was certainly one of the most spectacular protest related events smaller protests have become ubiquitous In Los Angeles labor activists campaign against commercial real estate owners to unionize janitors mainly Latina immigrants In the People's Republic of China peasants revolt against tax collectors Amazonian Indians protest public and economic policies that destroy their culture and rainforest habitat This book analyzes the reciprocal impact of cultural beliefs sociopolitical structures and individual behaviors on protests throughout the world Why do individuals participate in protest activities How do cultural beliefs personal attitudes and subjective perception influence the potential protester Addressing the issue of agency in protest the authors also examine why protestors enlist different tactics to achieve their goals Why are some protests violent and others nonviolent When and why do activists conclude that it is better to accommodate than confront

Finally and crucially what are the consequences of protest movements      **The Annals of the American Academy of Political and Social Science** ,1971-11      **Comparative Socialist Systems** Carmelo Mesa-Lago,Carl Beck,2010-11-23 The editors have merged work from two disciplines economics and political science in a summary conclusion a sociologist suggests possible extensions in the comparison of socialist systems for the future contributes generously to the field Slavic Review      **Handbook of Regional Growth and Development Theories** Roberta Capello,Peter Nijkamp,2019 Regional economics an established discipline for several decades has undergone a period of rapid change in the last ten years resulting in the emergence of several new perspectives At the same time the methodology of regional economics has also experienced some surprising developments This fully revised and updated Handbook brings together contributions looking at new pathways in regional economics written by many well known international scholars The aim is to present the most cutting edge theories explaining regional growth and local development The authors highlight the recent advances in theories the normative potentialities of these theories and the cross fertilization of ideas between regional and mainstream economists It will be an essential source of reference and information for both scholars and students in the field
