Doing a Research Project in English Studies Louisa Buckingham, 2015-08-27 Doing a Research Project in English Studies is the essential guide to undertaking research and developing academic English literacy skills for students new to research. With a particular focus on the needs of students in contexts where English is used as a foreign or an additional language, this accessible textbook takes the reader through the research process in five main sections: getting started, arriving at a topic, interacting with a supervisor, finding bibliographic resources, collecting data, developing academic writing skills, preparing for the oral defence. Each chapter contains exercises that answer key questions and facilitate independent study throughout. Extracts from published research articles provide invaluable illustration of the features of academic writing. This is a must-have resource for advanced undergraduate and postgraduate students embarking on a research project in English studies.

Global Perspectives on Project-Based Language Learning, Teaching, and Assessment Gulbahar Beckett, Tammy Slater, 2019-10-08 This volume provides a comprehensive account of project-based language learning (PBL) which showcases key theoretical approaches, empirical research, technological tools, and research-based frameworks to help further PBL implementation and research. Taking its cue from the conclusions drawn from project-based learning more broadly, which point to the impact of project-based work on learning and development, discourse, socialization, subject engagement, and collaborative skills, the book highlights how these discussions might be extended and enhanced within the context of language learning. The volume begins with discussions of philosophical and theoretical models of PBL and is followed by case studies from contributors from a range of learning contexts and geographic regions which demonstrate these models in practice, with a focus on the implementation of technology in such instances. The book also introduces resources for aligning projects with government standards in the classroom but also frameworks for researching and assessing PBL. This comprehensive collection is essential reading for students and researchers in language learning and teaching, language education, curriculum design, and applied linguistics. Writer's Choice GLENCOE, Jacqueline Jones Royster, 1996 An elementary-level language arts textbook which develops good writing skills through exercises in reading, writing, and grammar.

Teaching College Writing to Diverse Student Populations Dana Ferris, 2009-06-02 Statistical and anecdotal evidence documents that even states with relatively little ethnic or cultural diversity are beginning to notice and ask questions about long-term resident immigrants in their classes. As shifts in student population become more widespread, there is an even greater need for second-language specialists, composition specialists, program administrators, and developers in colleges and universities to understand and adapt to the needs of the changing student audience. This book is designed as an introduction to the topic of diverse second-language student audiences in U.S. post-secondary education. It is appropriate for those interested in working with students in academic settings, especially those students who are transitioning from secondary to post-secondary education.
