The Knowledge Creation Potential of Management Consulting Francesco Ciampi, 2008 The Knowledge Creation Potential of Management Consulting interprets management consulting from a knowledge perspective and proposes a general conceptual framework for investigating and interpreting that potential To begin with the main dynamics of change that characterize today's demand for management consulting is outlined and it is suggested that firms are becoming increasingly aware of the real cognitive rather than only the economic value generation potential that can be activated through the consulting relationship Also the possible pathways for evolutionary transformation of consulting practices models and roles that consulting firms could follow if they want to take advantage of the important changes that are taking place are looked at Next a definition of management consulting is proposed which aims to identify the distinctive ontological real essential and relatively stable features of this particular service and emphasizes the mainly cognitive nature of its value creation potential Furthermore two approaches to interpreting management consulting are discussed the diachronic approach and the synchronic approach To conclude the theories interpreting knowledge creation processes as knowledge conversion processes are explained and applied to the specific context of management consulting relationships

EBOOK: Managing Consultants Timothy Clark, 1995-11-16 Managers are increasingly being convinced from all sides that traditional structures systems and cultures are no longer appropriate to today's competitive conditions and that organizations must change fundamentally It is in the context of these pressures that managers feel it increasingly necessary to seek external support by turning to those who offer some solution to these dilemmas the management consultants This book argues that the initial selection of a management consultancy and the subsequent evaluation of the quality of service they deliver are inherently problematic Two root causes are identified the structure and dynamics of the management consultancy industry and the characteristics of the management consultancy service Timothy Clark examines how these problems are overcome by revealing the foundations of a successful and long term client consultant relationship In a departure from previous analyses of management consultancy he argues that the key to understanding consultancy and its success is to appreciate that successful consultancy in its methods at least emphasizes the active management of the client consultant relationship At the core of successful consultancy is the art of impression management A consultant seeks to create a reality which persuades the client that they have purchased a high quality service The work of consultants is analysed and understood in terms of the theatrical analogy or dramaturgical metaphor A consultancy intervention is therefore conceived of as a dramatic event This is illustrated with reference to two types of consultancy work executive search i.e. headhunting and the work of management gurus
