Art Of Architectural Drawing Imagination And Technique:

The Art of Architectural Drawing Thomas Wells Schaller,1997-03-18 Lavishly illustrated this book thoughtfully presents and discusses architectural images which both derive from and inspire the act of building Beautiful illustrations fill the pages paying tribute to the process of image making as an exercise of the imagination Also covered are techniques for composing architectural images including how to employ the best media and graphic devices and more 157 b w illus 50 color illus

Eleven Exercises in the Art of Architectural Drawing Marco Frascari,2011-03-08 This text offers 11 servings of slow food for the architectural imagination as opposed to the tasteless fast food that dominates many drawing tables or digital tablets

In-Between: Architectural Drawing and Imaginative Knowledge in Islamic and Western Traditions Hooman Koliji,2016-03-09 Contemporary technical architectural drawings in establishing a direct relationship between the drawing and its object tend to privilege the visible physical world at the expense of the invisible intangible ideas and concepts including that of the designer s imagination As a result drawing may become a utilitarian tool for documentation devoid of any meaningful value in terms of a kind of knowledge that could potentially link the visible and invisible This book argues that design drawings should be recognized as intermediaries mediating between the world of ideas and the world of things spanning the intangible and tangible The notion of the Imaginal as an intermediary between the invisible and visible is discussed showing how architectural drawings lend themselves to this notion by performing as creative agents contributing not only to the physical world but also penetrating the realm of concepts The book argues that this in between quality to architectural drawing is essential and that it is critical to perceive drawings as subtle bodies that hold physical attributes for example form proportion color highly evocative yet with no matter Focusing on Islamic geometric architectural drawings both historical and contemporary it draws on key philosophical and conceptual notions of imagination from the Islamic tradition as these relate to the creative act In doing so this book not only makes important insights into the design process and act of architectural representation but more broadly it adds to debates on philosophies of the imagination linking both Western and Islamic traditions

Architecture as a Performing Art Marcia Feuerstein, Gray Read, 2016-04-15 How do buildings act with people and among people in the performances of life This collection of essays reveals a deep alliance between architecture and the performing arts uncovering its roots in ancient stories and tracing a continuous tradition of thought that emerges in contemporary practice With fresh insight the authors ask how buildings perform with people as partners rather than how they look as formal compositions They focus on actions the door that offers the possibility of making a dramatic entrance the window that frames a scene and the city street that is transformed in carnival The essays also consider the design process as a performance improvised among many players and offer examples of recent practice that integrates theater and dance This collection advances architectural theory history and criticism by proposing the lens of performance as a way to engage the multiple roles that buildings can play without reducing them to functional categories By casting architecture as spatial action rather than as static form these essays open a promising avenue for future investigation For architects the essays propose integrating performance into design through playful explorations that can reveal intense relationships between people and place and among people in place Such practices develop an architectural imagination that intuitively asks How might people play out their stories in this place and How might this place spark new stories Questions such as these reside in the heart of all of the essays presented here Together they open a position in the intersection between everyday life and staged performance to rethink the role of architectural design

The Innovative Use of Materials in Architecture and Landscape Architecture Caren Yglesias, 2014-02-21 This book is about materials The fundamental properties and technical aspects are reviewed within a context of a material's history the theories of its meaning and making and its use Information about the sustainability aspects of each material is included as a critical necessity in construction Innovative design comes from an understanding of materials for what they are how they have been used in the past and how they can support human activity The author provides essential information to students and professionals concerned with advancing their design at a time when the consumption of natural resources and the consequences of wasteful practices are of urgent concern Instructors considering this book for use in a course may request an examination copy here

IMAGINARIES ON MATTER: TOOLS, MATERIALS, ORIGINS Thomas Bo Jensen, Carolina Dayer, Jonathan Foote, 2023-11-21 Imaginaries on Matter Tools Materials Origins promotes an innovative architectural research agenda that connects historical cultural written research with digitally led material explorations The common thread is the notion of the material imagination disclosed in the reverie or material daydream which challenges overly pragmatic or unreflective material choices within current architectural practice In bonding our imagination directly with matter while also confronting new technologies this book promotes strategies by which architects and builders future relations with materials can stay

rooted within the deeper concerns of cultural meaning Imaginaries on Matter includes interviews with Aulets Architectes Alibi Studio Ensamble Studio Geometria Helen Hard Kieran Timberlake Supermoeuvre and Vandkunsten as well as a postscript by David Leatherbarrow Edited by Thomas Bo Jensen Carolina Dayer Jonathan Foote **Design Media** Ron Kasprisin, 1999-05-04 Mastery of a full range of media is essential in order to develop and communicate design ideas effectively Each of the four major media watercolor pen and ink pastel and colored markers offers a different avenue for exploring a design concept with dramatically different results *Design Innovations for Contemporary Interiors and Civic Art* Crespi, Luciano, 2016-09-08 In some post industrial areas re designing structural interiors in an attractive way is becoming increasingly important to community members as it helps promote local pride and a higher quality of life Design Innovations for Contemporary Interiors and Civic Art examines novel techniques in structural designs in various cultural and social scenarios Featuring innovative application methods emergent trends and research on tools being utilized in the field this publication is a pivotal reference source for designers researchers practitioners and professionals interested in interior design urban culture and structural aesthetics Art & Design Education in Times of Change Ruth Mateus-Berr, Luise Reitstätter, 2017-05-08 It has always been the case that the teaching of art has had to deal with social changes We are currently facing historic challenges and phenomena which we could never have imagined the global financial crisis the massive migration flows and the ubiquitous spread of new technologies in our everyday life Creative competence is needed for overcoming the disciplinary boundaries and in order to make equal opportunities for education possible in a diverse society This publication takes a critical look at the role of art and design education amidst these social changes using theoretical reflection practical experience and empirical analysis **Nexus Network Journal 14,1** Kim Williams, 2014-05-15 The Winter 2012 vol 14 no 1 issue of the Nexus Network Journal is dedicated to the theme Architecture Systems Research and Computational Sciences This is an outgrowth of the session by the same name which took place during the eighth international interdisciplinary conference Nexus 2010 Relationships between Architecture and Mathematics held in Porto Portugal in June 2010 Today computer science is an integral part of even strictly historical investigations such as those concerning the construction of vaults where the computer is used to survey the existing building analyse the data and draw the ideal solution What the papers in this issue make especially evident is that information technology has had an impact at a much deeper level as well architecture itself can now be considered as a manifestation of information and as a complex system The issue is completed with other research papers conference reports and book reviews

idea journal: interior technicity: unplugged and/or switched on Julieanna Preston, 2020-10-07 Interior Technicity Unplugged and or Switched On invites reflection on how interiors have always been augmenting entities and how they continue to be so in other words extending facilitating and consolidating bodies within socio cultural environments Rather than seeing an interior as an inside in opposition to a world beyond it asks what modes of folding inward have equipped and

enabled the spatial environment Technicity the world of tools and technical objects that extend and mediate memory as Bernard Steigler 1998 describes it has never been what inside ness in its sheltering of life keeps at bay mediation is from the start technical indexed to inscribing practices rich in temporal and embodied implications By this reading interiors have always been augmented and augmenting in the sense of the Latinaugmentare to increase enlarge or enrich This IDEA Journal issue considers this mode of folding inward as a condition of an interior specificity Whether it be a small structure such as a tramping hut or a tiny house a large complex interior environment such as an airport or shopping mall handmade with local materials such as Samoan fale or the result of manufacturing processes assembling artificial and prefabricated elements as in the case of a spacecraft boat or train interiors are augmented mediated generated or embellished by technologies The effect of these technologies is not neutral one s experience of an interior is significantly influenced by the affective resonance of its technologies

Envisioning Architecture Eugenio Morello, Barbara E. A. Piga, 2013

The Value of Drawing Instruction in the Visual Arts and Across Curricula Seymour Simmons III, 2021-03-29 By applying philosophical and historical perspectives to drawing instruction this volume demonstrates how diverse teaching methods contribute to cognitive and holistic development applicable within and beyond the visual arts Offering a new perspective on the art and science of drawing this text reveals the often unrecognized benefits that drawing can have on the human mind and thus argues for the importance of drawing instruction despite and even due to contemporary digitalization Given the predominance of visual information and digital media visual thinking in and through drawing may be an essential skill for the future As such the book counters recent declines in drawing instruction to propose five Paradigms for teaching drawing as design as seeing as experience and experiment as expression and as a visual language with exemplary curricula for pre K12 art and general education pre professional programs across the visual arts and continuing education With the aid of instructional examples this volume dispels the misconception of drawing as a talent reserved for the artistically gifted and posits it as a teachable skill that can be learned by all This text will be of primary interest to researchers scholars and doctoral students with interests in drawing theory and practice cognition in the arts positive psychology creativity theory as well as the philosophy and history of arts education Aligning with contemporary trends such as Design Thinking STEAM and Graphicacy the text will also have appeal to visual arts educators at all levels and other educators involved in arts integration
