Art Of General Practice:

The Art of General Practice David Bartlett, 2018-08-20 A collection of life experiences anecdotes and suggestions from an experienced GP and GP trainer focusing on the emotional intelligence required to be a great GP The Art of General Practice is a short text written by an experienced GP and GP trainer It is a book which will help focus the mind of the reader GPs of all descriptions young GPs returners to general practice and even jaded GPs on what it means to be a GP Too often general practice focuses on guidelines ever changing targets incentives or the academic side of medicine and the art and craft of being a GP is forgotten The book aims to redress the balance it helps the reader refocus on the emotional intelligence needed to be a great GP The book consists of a number of short chapters so the busy GP can dip in and out of it as time allows each chapter helps the reader re centre on the core skills and techniques needed to be a great GP and the benefits these skills will bring to both GPs and patients alike There is almost no medicine in this book it is a book of life experiences anecdotes and suggestions all aimed to help you survive the increasing pressures of general practice and make your life as a GP more interesting and less stressful *A History of the Royal College of General Practitioners* John Fry, R.J.F.H.

Pinsent, 2012-12-06 John P Horder President 1980-82 The first 30 years of the College have been an exciting experience for those most closely involved Some have already passed on but this account has been written soon enough for many of the actors to be historians Future members of the College will be grateful to them for what they have written as well as for what they did as a remarkably determined and harmonious team Students of twentieth century medicine in this country will also be grateful for a first hand account of the development of an institution which has been closely associated with and partly responsible for important changes in medical care and education Those who read these pages may wonder how the builders of this young College could have found time to do much general practice They did The three editors of this history which covers 25 years and the general practitioner members of the Steering Committee all ran large practices in which they worked very hard throughout that time Most of their work for the College was done during off duty hours weekends and holidays The College could not have developed as it did had they not been personally concerned with the practical problems and needs of clinical medicine This is also true of many of the contributors It is impossible to mention everyone who deserves credit The editors hope that they may be forgiven for any serious omissions **Index-catalogue of the Library of the**

The Evolution of British General Practice, 1850-1948 Anne Digby, 1999-06-24 This book focuses on a formative period in the development of modern general practice The foundations of present day health care in Britain were created in the century before the National Health Service of 1948 when medicine was transformed in its structure professional status economic organization and therapeutic power In the first full length study of general practice for these years Anne Digby

deploys an impressive range of hitherto unused archival material and oral testimony to probe the character of general practitioners careers and practices and to assess their relationships with local communities a wider society and the state An evolutionary approach is adopted to explain the origins and nature of the many changes in medical practice and the lives of ordinary doctors The study also explores the gendered nature of medical practice as reflected in the experience of a golden band of women GPs and examines the hidden role of the doctors wife in the practice *The Lancet* ,1891 **The**

Reconstructing Medical Practice Christine Jorm,2016-04-08 *Reconstructing Medical Practice* examines how doctors see health care and their place in it why they remain in medicine and why they are limited in their ability to lead change in the current system Doctors are beset by doubts and feel rejected by systems where they should be leaders some see their role as flog ging a derelict system to get the last breath of workability out for their patients Others simply turn away Rigorous studies carried out at large public teaching hospitals in Australia found that doctors were reluctant to increase safety in the wider health system despite making every effort for their own patients Doctors self esteem was found to be delicate due to the uncertain nature of their work colleagues provide the support doctors need to deliver good care However these essential relationships and their cherished connections with patients have disadvantages reducing doctors ability to admit to error On top of this senior doctors predict a future bereft of professional values one where medicine is just a job While the loss of professional identity introduces new risks for patients and doctors the repercussions of the more self serving attitudes of younger doctors are unknown *Reconstructing Medical Practice* concludes that regulation despite its recent proliferation is a clumsy and limited approach to ensuring good care It presents original and much needed ideas for ways to rebuild the critical relationship between doctors and the system By better valuing communicative interactions and workplace relationships safe and satisfying medical practice can be reconstructed General Practitioner ,1961-07
