Descubra el mundo de la artesanía en cuero con *El Arte del Cuero Técnicas y Proyectos para Artesanos*. Este libro le guiará a través de los conocimientos fundamentales y las técnicas avanzadas necesarias para transformar el cuero en piezas de gran calidad. La obra comienza sentando las bases del trabajo en cuero desde la selección y preparación de las pieles hasta la configuración de un taller funcional y seguro. Aprenderá a identificar el material adecuado para cada proyecto y a manejar la dotación de herramientas esenciales para el corte, el marcado y la preparación de las costuras. A continuación, el libro profundiza en las técnicas de elaboración. Se abordan métodos de corte manual, el moldeado en húmedo para dar forma tridimensional al cuero y la preparación de los bordes. Además, se exploran diversas técnicas decorativas como el punzonado, el teido y el envejecido, así como métodos de unión sin costuras mediante adhesivos, remaches o trenzados. La sección práctica se enfoca en la aplicación de estas habilidades. Recibirá instrucciones detalladas sobre la ejecución de la emblemática costura de guarnicionero, un pilar de la marroquinería de calidad. Los proyectos prácticos incluyen la construcción de artículos de pequeña marroquinería como carteras y cinturones, y la confección de piezas más grandes como bolsos, abarcando desde la creación de patrones hasta el montaje final y la incorporación de forros. Finalmente, el libro ofrece una introducción a campos de especialización como la talabartería con la confección y reparación de artículos de equitación y orientaciones para quienes deseen desarrollar una producción en pequeña escala. Se tratan temas como el trabajo con cueros gruesos, la optimización de procesos y técnicas de acabado avanzadas para la restauración o creación de objetos complejos. Esta guía le proporcionará una sólida comprensión del arte y la técnica del trabajo en cuero. Para este libro hemos apostado por tecnologías innovadoras incluyendo Inteligencia Artificial y soluciones de software a medida. Estas nos apoyaron en numerosos pasos del proceso: la búsqueda de ideas y la investigación, la redacción y la edición, el control de calidad, así como la creación de ilustraciones decorativas. Nuestro objetivo es ofrecerle una experiencia de lectura especialmente armoniosa y contemporánea.

concretamente del curtido al vegetal expuestas de manera didáctica y adecuada para las personas interesadas en este arte desde una vertiente práctica. Se tratan sólo las pieles conseguidas a partir de animales domésticos que son fuente de alimentación obviando las pieles de animales no domésticos y de los que son criados en cautividad a causa de su piel. En sus páginas se enseñan tras un breve repaso a la historia y al curtido las principales pieles y sus características para identificarlas los materiales y herramientas que se emplean y los procesos de las diferentes técnicas. En el último capítulo se muestra paso a paso la confección de ocho proyectos originales con las distintas técnicas de trabajo.

Management and Inter/Intra Organizational Relationships in the Textile and Apparel Industry Margalina, Vasilica-Maria, Lavín, José M., 2019-12-27

Numerous clothing industries face highly dynamic environments and growth in this environment depends upon both external and internal factors. External factors are represented by aggressive competition and volatile product demand. Internally the industry must face an increasingly shorter life cycle of the product and the need to innovate both product and organizational development. The competitive advantage of the industry lies in its ability to design a value creating system based on the management of both external and internal relationships. The successful management of these relationships relies not only on successful customer relationship management but also on effective product supply and demand upkeep.

Management and Inter/Intra Organizational Relationships in the Textile and Apparel Industry provides emerging research exploring relevant theoretical frameworks and the latest empirical research underlining the complexity of management applications within the textile industry. Featuring coverage on a broad range of topics such as consumer relationships, cultural identity and organizational culture, this book is ideally designed for researchers, academicians, professionals and students working in various disciplines including management, industrial organization, organizational behavior, human resource management, decision science, design science and information and communication. Moreover, the book will provide insights and support executives and managers of the textile and apparel industry concerned with the ethical design, contamination and the management relationships with workers, customers, suppliers, the community and organizational development.
