**Extending Virtual Worlds** Ann Latham Cudworth, 2018-09-03. Written as the successor to *Virtual World Design: Creating Immersive Virtual Environments*, this book carries the ideas brought forward in its predecessor to new levels of virtual world design exploration and experimentation. Written by an Emmy award winning designer with 22 years of experience creating virtual environments for television and online communities, *Extending Virtual Worlds: Advanced Design for Virtual Environments* explores advanced topics such as multi-regional design, game-based sims, and narrative structure for environments. The book provides bedrock knowledge and practical examples of how to leverage design concepts within the intertwined structures of physics engines, level of detail (LOD) systems, and advanced material editors. It also shows designers new ways to influence the experience of virtual world visitors through immersive narrative and storytelling. With over 150 illustrations and 10 step-by-step projects that include the necessary 3D models and modular components, it delivers hours of stimulating creative challenges for people working in public virtual worlds or on private grids. By using this book, novices and advanced users will deepen their understanding of game design and how it can be applied to creating game-based virtual environments. It also serves as a foundational text for class work in distance learning, simulation, and other learning technologies that use virtual environments.

**Virtual Reality and Virtual Environments in 10 Lectures** Stanislav Stanković, 2022-06-01. The book is based on the material originally developed for the course on Virtual Reality which the author was teaching at Tampere University of Technology, as well as a course on Virtual Environments that the author had prepared for the University for Advancing Studies at Tempe, Arizona. This original purpose has influenced the structure of this book as well as the depth to which we explore the presented concepts. Therefore, our intention in this book is to give an introduction into the important issues regarding a series of related concepts of Virtual Reality, Augmented Reality, and Virtual Environments. We do not attempt to go into any of these issues in depth but rather outline general principles and discuss them in a sense broad enough to provide sufficient foundations for a further study. In other words, we aim to provide a set of keywords to the reader in order to give him a good starting point from which he could go on and explore any of these issues in detail.
