Perception and Artistic Style D.M. Parker, J.B. Derégowski, 1991-01-14

Perception and Artistic Style explores the role of visual processes in the creation and perception of painting and drawing. By looking at the relationship between perception and representation, evidence is provided that purely visual processes are a richer source of artistic inspiration than is commonly realised. Many of the obvious variations in artistic style are firmly rooted in visual perception and visual cognition. This book looks at a range of fundamental visual processes and investigates their contribution to major stylistic features of works of art. A wide selection of pictures is considered: ancient, medieval, renaissance, nineteenth and twentieth century, and primitive. Both well known and relatively obscure works are examined. The volume includes 86 figures, 13 grey scale illustrations of artworks and 43 line drawings. This book will be of value to students of perception, students of art and art history, and since the more technical aspects have been confined to the notes, the general reader who wishes to increase his/her appreciation and understanding of pictorial art.

Parables of Sun

Light Rudolf Arnheim, 1990-07-17 For many years Rudolf Arnheim, known as the leading psychologist of art, has been keeping notebooks in which to jot down observations, ideas, questions, and even after a stay in Japan for a year, poems in the haiku pattern. Some of these notes found their way into his books, known and prized the world over such as *Art and Visual Perception*, *Visual Thinking*, and *The Power of the Center* (see list below). Now he has selected from the remaining riches of his notebooks the items in this volume. The book will be a joy to ramble through for all lovers of Arnheim's work, and indeed for anyone who shares Arnheim's contagious interest in the order that lies behind art, nature, and human life. It is a seedbed of ideas and observations in his special fields of psychology and the arts. I have avoided mere images and I have avoided mere thoughts, says Arnheim in the Introduction, but whenever an episode observed or a striking sentence read yielded a piece of insight I had not met before, I wrote it down and preserved it. There are also glimpses of his personal life: his wife, his cats, his students, his neighbors, and colleagues. He is always concrete in the manner that has become his trademark: often witty and sometimes a bit wicked. In the blend of life and thought caught in these jottings, psychology and the arts are of course prominent. But philosophy, religion, and the natural sciences add to the medley of topics, always addressed in a way to sharpen the senses of the reader who shares Arnheim's cue from Dylan Thomas: may accompany him through the parables of sun, light, and the legends of the green chapels and the twice-told fields of childhood. All of Rudolf Arnheim's books have been published by the University of California Press.

The Power of the Center Rudolf Arnheim, 2009-10-19 Rudolf Arnheim has been known since the publication of his groundbreaking *Art and Visual Perception* in 1974 as an authority on the psychological interpretation of the visual arts. Two anniversary volumes celebrate the landmark anniversaries of his works. In 2009, in *The Power of the Center*, Arnheim uses a wealth of examples to consider the factors that determine the overall organization of visual form in works of painting, sculpture, and architecture. *The Dynamics of Architectural Form* explores the unexpected perceptual consequences of architecture with Arnheim's customary clarity and precision.
