Art Imagery and the Mythic Process Dorothea Johnson Blom,1977 *Caring as Healing* Delores A. Gaut,Anne Boykin,1994 Papers presented at the 15th International Human Caring Research Conference in Portland Oregon May 1993

Material Imagination Natalie Adamson,Steven Harris,2017-07-24 Material Imagination examines the interrelated concepts of matter materialism and materiality in postwar European art from 1946 1972 Provides a unique perspective on European art by prioritizing material dimensions over concept or context while also paying attention to theoretical and historical concerns Explores artists methods and materials in order to better understand the social and cultural environments in which their works of art were made Demonstrates how materials can be harnessed to affect the critical interpretation of artwork Brings together exceptional illustrations and new research in eight essays by art historians and scholars The Art of Image Processing with Java Kenny A. Hunt,2016-04-19 This introductory image processing text is ideal for college students studying computer science or software engineering With an emphasis on software design the text builds on an accessible mathematical foundation and on extensive sample Java code to teach students the fundamentals of image processing The text is accompanied by rich illustrations that demonstrate the results of performing processing on famous art pieces This approach gives readers real world examples of ways they may use image processing Each chapter includes problems for students and an online supplement offers instructor resources **The Routledge Companion to African Diaspora Art History** Eddie Chambers,2024-10-31 This is an authoritative companion that is global in scope recognizing the presence of African Diaspora artists across the world It is a bold and broad reframing of this neglected branch of art history challenging dominant presumptions about the field Diaspora pertains to the global scattering or dispersal of in this instance African peoples as well as their patterns of movement from the mid twentieth century onwards Chapters in this book emphasize the importance of cross fertilization interconnectedness and intersectionality in the framing of African Diaspora art history The book stresses the complexities of artists born within or living and working within the African continent alongside the complexities of Africa born artists who have migrated to other parts of the world The group of international contributors emphasizes and accentuates the interplay between for example Caribbean art and African Diaspora art or Latin American art and African Diaspora art or Black British art and African Diaspora art The book will be of interest to scholars and students working in art history the various branches of African studies African American studies African Diaspora studies Caribbean studies and Latin American studies Greek Myth and Western Art Karl Kilinski,2013 This richly illustrated book examines the legacy of Greek mythology in Western art from the classical era to the present Tracing the emergence survival and transformation of key mythological figures and motifs from ancient Greece through the modern era it explores the enduring importance of such myths for artists and viewers in their own time and over the millennia that followed **The Art and Politics of Asger Jorn** Karen Kurczynski,2017-07-05 A leading figure of the postwar avant garde Danish artist Asger Jorn

has long been recognized for his founding contributions to the Cobra and Situationist International movements yet art historical scholarship on Jorn has been sparse particularly in English This study corrects that imbalance offering a synthetic account of the essential phases of this prolific artists career It addresses his works in various media alongside his extensive writings and his collaborations with various artists groups from the 1940s through the mid 1960s Situating Jorn s work in an international post Second World War context Karen Kurczynski reframes our understanding of the 1950s away from the Abstract Expressionist focus on individual expression toward a more open ended conception of art as a public engagement with contemporary culture and politics Kurczynski engages with issues of interest to twenty first century artists and scholars highlighting Jorn s proposition that the sensory address of art and its complex relationship to popular media can have a direct social impact Perhaps most significantly this study foregrounds Jorn s assertion that creativity is crucial to subjectivity itself in our increasingly mediated Society of the Spectacle *The Grotesque in Art and Literature* James Luther Adams, Wilson Yates, 1997 The authors focus on the religious and theological significance of grotesque imagery in art and literature exploring the religious meaning of the grotesque and its importance as a subject for theological inquiry **Pendle Hill Pamphlet[s].** , 1995 *The Advaita of Art* Harsha V. Dehejia, **Keepers of the Sacred Chants** Jonathan David Hill, 1993 The Wakuenai of the upper Rio Negro region in southern Venezuela a form of singing called malikai for ceremonies of childbirth initiation and healing This ritual chanting a rich amalgam of myth and music serves as a means of integrating individuals into a vertical hierarchy of powers relations between mythic ancestors and human descendants In *Keepers of the Sacred Chants* Jonathan Hill shows how the musical and semantic transformations of everyday discourse in malikai integrate the everyday world into a poetic process of empowerment He interprets malikai through mythic narratives that explain the cosmos as an ongoing process of musically naming into being the species objects and activities that define individual humanness and society and he further shows how semantic and musical meanings are joined to construct each chant and how these chants are manipulated in different contexts Hill explains how the musical elements of malikai contribute to the success of performance comparing different genres for which different musical criteria are appropriate He considers the integration of speech and song through a close analysis of such elements as microtonal pitch rise rhythm and timbre showing how these features are linked to poetic speech and imbued with social power Hill s penetrating study of malikai is made within the context of Wakuenai history and cosmology and considers influences resulting from contact with the outside world Because Northern Arawakan speaking peoples have received less attention than others of the region his book thus makes a significant contribution to Amazonian ethnography It is the author s focus on malikai however that commends *Keepers of the Sacred Chants* to all interested in the multitextured uses of song and story by peoples of the world *Catalog of Copyright Entries, Fourth Series* Library of Congress. Copyright Office, 1978 **The Cambridge Companion to the Modernist Novel** Morag Shiach, 2007-04-19 The novel is modernism s most vital and experimental genre In this 2007

Companion leading critics explore the very significant pleasures of reading modernist novels but also demonstrate how and why reading modernist fiction can be difficult No one technique or style defines a novel as modernist Instead these essays explain the formal innovations stylistic preferences and thematic concerns which unite modernist fiction They also show how modernist novels relate to other forms of art and to the social and cultural context from which they emerged Alongside chapters on prominent novelists such as James Joyce and Virginia Woolf as well as lesser known authors such as Dorothy Richardson and Djuna Barnes themes such as genre and geography time and consciousness are discussed in detail With a chronology and guide to further reading this is the most accessible and informative overview of the genre available

Creating Ourselves Anthony B. Pinn, Benjamin Valentin, 2009-12-02 Analyzes the religious and theological significance of African American and Hispanic American popular culture structured in part as a dialogue between scholars from both ethnic groups *The Uncoiling Python* Harold Scheub, 2010-08-10 The oral and written traditions of the Africans of South Africa have provided an understanding of their past and the way the past relates to the present These traditions continue to shape the past by the present and vice versa From the time colonial forces first came to the region in 1487 oral and written traditions have been a bulwark against what became 350 years of colonial rule characterized by the racist policies of apartheid *The Uncoiling Python* South African Storytellers and Resistance is the first in depth study of how Africans used oral traditions as a means of survival against European domination Africans resisted colonial rule from the beginning They participated in open insurrections and other subversive activities in order to withstand the daily humiliations of colonial rule Perhaps the most effective and least apparent expression of subversion was through indigenous storytelling and poetic traditions Harold Scheub has collected the stories and poetry of the Xhosa Zulu Swati and Ndebele peoples to present a fascinating analysis of how the apparently harmless tellers of tales and creators of poetry acted as front line soldiers
