The Business of Alchemy Pamela H. Smith,2016-09-20 In *The Business of Alchemy* Pamela Smith explores the relationships among alchemy the court and commerce in order to illuminate the cultural history of the Holy Roman Empire in the sixteenth and seventeenth centuries In showing how an overriding concern with religious salvation was transformed into a concentration on material increase and economic policies Smith depicts the rise of modern science and early capitalism In pursuing this narrative she focuses on that ideal prey of the cultural historian an intellectual of the second rank whose career and ideas typify those of a generation Smith follows the career of Johann Joachim Becher 1635 1682 from university to court his projects from New World colonies to an old world Pansophic Panopticon and his ideas from alchemy to economics Teasing out the many meanings of alchemy for Becher and his contemporaries she argues that it provided Becher with not only a direct key to power over nature but also a language by which he could convince his princely patrons that their power too must rest on liquid wealth Agrarian society regarded merchants with suspicion as the nonproductive exploiters of others labor however territorial princes turned to commerce for revenue as the cost of maintaining the state increased Placing Becher s career in its social and intellectual context Smith shows how he attempted to help his patrons assimilate commercial values into noble court culture and to understand the production of surplus capital as natural and legitimate With emphasis on the practices of natural philosophy and extensive use of archival materials Smith brings alive the moment of cultural transformation in which science and the modern state emerged

Promethean Ambitions William R. Newman,2005-10-01 In an age when the nature of reality is complicated daily by advances in bioengineering cloning and artificial intelligence it is easy to forget that the ever evolving boundary between nature and technology has long been a source of ethical and scientific concern modern anxieties about the possibility of artificial life and the dangers of tinkering with nature more generally were shared by opponents of alchemy long before genetic science delivered us a cloned sheep named Dolly In *Promethean Ambitions* William R Newman ambitiously uses alchemy to investigate the thinning boundary between the natural and the

artificial Focusing primarily on the period between 1200 and 1700 Newman examines the labors of pioneering alchemists and the impassioned and often negative responses to their efforts By the thirteenth century Newman argues alchemy had become a benchmark for determining the abilities of both men and demons representing the epitome of creative power in the natural world Newman frames the art nature debate by contrasting the supposed transmutational power of alchemy with the merely representational abilities of the pictorial and plastic arts a dispute which found artists such as Leonardo da Vinci and Bernard Palissy attacking alchemy as an irreligious fraud The later assertion by the Paracelsian school that one could make an artificial human being the homunculus led to further disparagement of alchemy but as Newman shows the immense power over nature promised by the field contributed directly to the technological apologetics of Francis Bacon and his followers By the mid seventeenth century the famous father of modern chemistry Robert Boyle was employing the arguments of medieval alchemists to support the identity of naturally occurring substances with those manufactured by chymical means In using history to highlight the art nature debate Newman here shows that alchemy was not an unformed and capricious precursor to chemistry it was an art founded on coherent philosophical and empirical principles with vocal supporters and even louder critics that attracted individuals of first rate intellect The historical relationship that Newman charts between human creation and nature has innumerable implications today and he ably links contemporary issues to alchemical debates on the natural versus the artificial

Alchemy in Contemporary Art analyzes the manner in which twentieth century artists beginning with French Surrealists of the 1920s have appropriated concepts and imagery from the western alchemical tradition This study examines artistic production from c 1920 to the present with an emphasis on the 1970s to 2000 discussing familiar names such as Andre Breton Salvador Dali Yves Klein Joseph Beuys and Anselm Kiefer as well as many little known artists of the later twentieth century It provides a critical overview of the alchemical tradition in twentieth century art and of the use of occultist imagery as a code for political discourse and polemical engagement The study is the first to examine the influence of alchemy and the

Surrealist tradition on Australian as well as on Eastern European and Mexican art In addition the text considers the manner in which women artists such as Leonora Carrington Remedios Varo and Rebecca Horn have critically revised the traditional sexist imagery of alchemy and occultism for their own feminist purposes
