Blood Feuds : AIDS, Blood, and the Politics of Medical Disaster Eric Feldman Associate Director New York University's Institute for Law and Society, Columbia University Ronald Bayer Professor Joseph L. Mailman School of Public Health, 1999-03-05 In the mid 1980s public health officials in North America Europe Japan and Australia discovered that almost half of the hemophiliac population as well as tens of thousands of blood transfusion recipients had been infected with HIV tainted blood This book provides a comparative perspective on the political legal and social struggles that emerged in response to the HIV contamination of the industrialized worlds blood supply It describes how eight nations responded to the first signs that AIDS might be transmitted through blood and how they falteringly arrived at and finally implemented measures to secure the blood supply The authors detail the remarkable saga of the mobilization of hemophiliacs who challenged the state the medical establishment and even their own caregivers as they sought recompense and justice In the end the blood establishments in almost every advanced industrial nation were shaken In Canada the Red Cross was forced to withdraw from blood collection and distribution In Japan pharmaceutical firms that manufactured clotting factor agreed to massive compensation 500 000 per hemophiliac infected In France blood officials went to prison Even in Denmark where the number of infected hemophiliacs was relatively small the struggle and litigation surrounding blood has resulted in the most protracted legal and administrative conflict in modern Danish history Blood Feuds brings together chapters on the experiences of the United States Japan France Canada Germany Denmark Italy and Australia with four comparative essays that shed light on the cultural institutional and economic dimensions of the HIV blood disaster **The Politics of Blood** Anne-Maree Farrell, 2012-05-24 How best to manage risk involving multi valued human biological materials is the overarching theme of this book which draws on the sourcing and supply of blood as a case study Blood has ethical social scientific and commercial value This multi valuing process presents challenges in terms of managing risk therefore making it ultimately a matter for political responsibility This is highlighted through an examination of the circumstances that led to HIV blood contamination episodes in the US England and France as well as their consequences The roles of scientific expertise and innovation in managing risks to the blood system are also analysed as is the increased use of precautionary and legal strategies in the post HIV blood contamination era Finally consideration is given to a range of policy and legal strategies that should underpin effective risk governance involving multi valued human biological materials **Cost Analysis of Blood Banking Alternatives** Ted Miller, Institute for Applied Technology (U.S.). Technical Analysis Division, 1973 **Leading Works in Health Law and Ethics** Sara Fovargue, Craig Purshouse, 2023-07-20 Health and healthcare are vitally important to all of us and academic interest in the law regulating health has over the last 50 years become an important field of academic study An analysis of the development of changes in and scope of health law and ethics to date is both timely and of interest to students and scholars alike along with an exploration of its likely future development This work brings together

contributions from leading and emerging scholars in the field Each contributor has been invited to select and analyse a leading work which has for them shed light on the way that health law and ethics has developed The chapters are both autobiographical reflecting upon the works that have proved significant to contributors and also critical analyses of the current state of the field This collection also includes a specially written Introduction and Conclusion which critically reflect upon the development of health law and ethics and its likely future developments in the light of the reflections by contributors on their chosen leading works The book will be of interest to students teachers and researchers in health law and ethics as it provides critical discussions and assessments of some of the leading scholarship in the field **The U.S.**

Spencie Love, 2000-11-09 One Blood traces both the life of the famous black surgeon and blood plasma pioneer Dr Charles Drew and the well known legend about his death On April 1 1950 Drew died after an auto accident in rural North Carolina Within hours rumors spread the man who helped create the first American Red Cross blood bank had bled to death because a whites only hospital refused to treat him Drew was in fact treated in the emergency room of the small segregated Alamance General Hospital Two white surgeons worked hard to save him but he died after about an hour In her compelling chronicle of Drew's life and death Spencie Love shows that in a generic sense the Drew legend is true throughout the segregated era African Americans were turned away at hospital doors either because the hospitals were whites only or because the black beds were full Love describes the fate of a young black World War II veteran who died after being turned away from Duke Hospital following an auto accident that occurred in the same year and the same county as Drew's African Americans are shown to have figuratively bled to death at white hands from the time they were first brought to this country as slaves By preserving their own stories Love says they have proven the enduring value of oral history General Interest Race Relations

National Water Commission, 1972 *Blood Policy* David B. Johnson, 1977 Last Best Gifts Kieran Healy, 2010-08-15 More than any other altruistic gesture blood and organ donation exemplifies the true

spirit of self sacrifice Donors literally give of themselves for no reward so that the life of an individual often anonymous may be spared But as the demand for blood and organs has grown the value of a system that depends solely on gifts has been called into question and the possibility has surfaced that donors might be supplemented or replaced by paid suppliers Last Best Gifts offers a fresh perspective on this ethical dilemma by examining the social organization of blood and organ donation in Europe and the United States Gifts of blood and organs are not given everywhere in the same way or to the same extent contrasts that allow Kieran Healy to uncover the pivotal role that institutions play in fashioning the contexts for donations Procurement organizations he shows sustain altruism by providing opportunities to give and by producing public accounts of what giving means In the end Healy suggests successful systems rest on the fairness of the exchange rather than the purity of a donor s altruism or the size of a financial incentive
