Blss The Berkeley Interactive Statistical System:

BLSS, the Berkeley Interactive Statistical System D. Mark Abrahams, Fran Rizzardi, 1988 *Design of BLSS Statistical Software* David Mark Abrahams, 1995 Proceedings of the Statistical Computing Section American Statistical Association. Statistical Computing Section, 1988 **Computing Science and Statistics** Connie Page, Raoul LePage, 2012-12-06

Interface 90 is the continuation of an extremely successful symposium series. The series has provided a forum for the interaction of professionals in statistics, computing science, and in numerical methods wherein they may discuss a wide range of topics at the interface of these disciplines. This is the 22nd Symposium on the Interface Computing Science and Statistics, which was held 16-19 May 1990 at the Kellogg Center on the campus of Michigan State University and is the third Symposium to be held under the recently organized Interface Foundation of North America. The Interface Board of Directors consists of the nine most recent Symposium Chairs: James E. Gentle, Lynne Billard, David M. Allen, Thomas J. Boardman, Richard M. Heiberger, Edward J. Wegman, Linda Malone, Raoul LePage, and Jon Kettenring. The officers of the Interface are William Eddy, Board Chairman and Executive Director, Edward Wegman, President, and Treasurer, Lynne Billard, Secretary. My valued colleague, Connie Page, Editor of this Proceedings Volume, and generally a bright and hardworking person, has organizational skills of a higher order which were successfully brought into play during many critical junctures not strictly connected with the Proceedings. Edward Wegman, Barbara Barringer, Bill Eddy, and George Styan all pitched in with useful information on numerous occasions. Our Keynote Speaker, Peter G. Hall, and Plenary Speakers, David L. Donoho, Jerome H. Friedman, who also gave a short course, Bruce Hajek, John Skilling, and C. F. The Humanities Computing Yearbook 1989-1990 Ian Lancashire, 1991. This is the second in a series of comprehensive annual reference guides to the use of computers in all the disciplines of the humanities. Like its predecessor, this volume provides a taxonomy of the field and an annotated survey of publications, research centers, text archives, and termbanks, electronic communications software, and hardware relevant to the humanities. It also includes special larger entries for important software that offer up-to-date information and practical help in applying that information to research projects and instruction in colleges and universities. For the 1989-1990 edition, Lancashire has for the first time appointed an international advisory board of specialists to assist in discovering, assembling, and evaluating materials for inclusion and to keep up with the rapidly developing nature of the field and its international constituency. Lancashire has included many completely new or revised sections, including a major new chapter on computing in Law. A monumental work of current and enduring value, The Humanities Computing Yearbook will prove invaluable to a wide range of students, teachers, and researchers in humanities and social sciences, computational linguistics, and related fields in computer science. **Proceedings of the American Statistical Association Sesquicentennial Invited Paper Sessions** American Statistical Association, 1989 IEEE/SEMI International Semiconductor Manufacturing Science Symposium IEEE/SEMI International Semiconductor Manufacturing Science Symposium, 1991 **Selecting Models from**

Data P. Cheeseman, R.W. Oldford, 1994-05-27 This volume is a selection of papers presented at the Fourth International Workshop on Artificial Intelligence and Statistics held in January 1993 These biennial workshops have succeeded in bringing together researchers from Artificial Intelligence and from Statistics to discuss problems of mutual interest The exchange has broadened research in both fields and has strongly encouraged interdisciplinary work The theme of the 1993 AI and Statistics workshop was Selecting Models from Data The papers in this volume attest to the diversity of approaches to model selection and to the ubiquity of the problem Both statistics and artificial intelligence have independently developed approaches to model selection and the corresponding algorithms to implement them But as these papers make clear there is a high degree of overlap between the different approaches In particular there is agreement that the fundamental problem is the avoidance of overfitting Le where a model fits the given data very closely but is a poor predictor for new data in other words the model has partly fitted the noise in the original data Preliminary Papers of the Fourth International Workshop on Artificial Intelligence and Statistics, 1993 **Journal of International Money and Finance**, 1991 Probabilistic Dependence and Logistic Inference in Information Retrieval Fredric Cheek Gey, 1993 *Software Mechanisms for Multiprocessor TLB Consistency* Shin-Yuan Tzou, 1989 To this end we describe mechanisms for tolerating TLB inconsistency and classify them according to three fundamental types of tolerable inconsistency safe transient and trusted inconsistency We also discuss how to fit these mechanisms into the software architecture of the virtual memory system Biophysical and Genetic Aspects of Light-potentiated Gravitropic Curvature in the Maize Primary Root Dennis M.
