Bombing 1939 45 The Air Offensive Against Land Targets In Ww11:

Air Power at the Battlefield Dr Ian Gooderson, 2013-05-13 Ian Gooderson presents a study of close air support in World War II with the analysis focusing on the use of tactical air power by British and American forces during the campaigns in Italy and northwestern Europe between 1943 and 1945 ULTRA and the Army Air Forces in World War II: An Interview with Associate Justice of the U.S. Supreme Court Lewis F. Powell, Jr. Lewis F. Powell, 1987 ULTRA and the Army Air Forces in World War II Lewis F. Powell (Jr.), 1987 **Beyond Victor's Justice? The Tokyo War Crimes Trial Revisited** Yuki Tanaka, Timothy L.H. McCormack, Gerry Simpson, 2011-06-09 The aim of this new collection of essays is to engage in analysis beyond the familiar victor's justice critiques. The editors have drawn on authors from across the world including Australia, Japan, China, France, Korea, New Zealand, and the United Kingdom with expertise in the fields of international humanitarian law, international criminal law, Japanese studies, modern Japanese history, and the use of nuclear, chemical, and biological weapons. The diverse backgrounds of the individual authors allow the editors to present essays which provide detailed and original analyses of the Tokyo Trial from legal, philosophical, and historical perspectives. Several of the essays in the collection are based on the authors' extensive archival research in Japan, Australia, the United States, and New Zealand, providing rich insights into Japanese societal attitudes towards the Trial, biological experimentation by the Japanese Army in China, as well as the trial of Korean prison guards and prosecutions for rape and sexual assault in the post-war period. Some of the essays deal with particular participants in the Trial, examining the role of individual judges and the selection of defendants and the decision not to prosecute the Emperor. Other essays analyse the Trial from a legal perspective and address its impact on concepts such as command responsibility, conspiracy, and war crimes. The majority of the essays seek to identify and address some of the forgotten crimes in the Tokyo Trial. These include crimes committed in China and Korea, particularly the activities of the infamous Unit 731, crimes committed against comfort women, and crimes associated with the atomic bombings of Hiroshima and Nagasaki, the conventional firebombing of other Japanese cities, and the illicit drug trade in China. Finally, the collection includes a number of essays which consider the importance of studying the Tokyo Trial and its contemporary relevance. These issues include an examination of the way in which academics have written the Trial over the last 60 years and an analysis of some of the lessons that can be drawn for international trials in the future. After the Map William Rankin, 2016-07-01 For most of the twentieth century, maps were indispensable. They were how governments understood, managed, and defended their territory, and during the two world wars they were produced by the hundreds of millions. Cartographers and journalists predicted the dawning of a map-minded age where increasingly state-of-the-art maps would become everyday tools. By the century's end, however, there had been a decisive shift in mapping practices as the dominant methods of land surveying and print publication were increasingly displaced by electronic navigation systems. In After the Map, William Rankin argues that although this shift did not render traditional maps obsolete, it did radically change

our experience of geographic knowledge from the God's eye view of the map to the embedded subjectivity of GPS Likewise older concerns with geographic truth and objectivity have been upstaged by a new emphasis on simplicity reliability and convenience After the Map shows how this change in geographic perspective is ultimately a transformation of the nature of territory both social and political

Ill-Made Alliance

Brock Millman, 1998 In 1939 faced with the German invasion of Czechoslovakia and a growing Italian threat in the Balkans Turkey and Britain and later France signed an alliance in which Turkey linked itself politically and militarily with Britain and France in exchange for financial assistance for its rearmament program Despite the agreement however when the war came to the Mediterranean Turkey did not become involved Presenting a new interpretation of why the alliance failed Brock Millman explores Anglo Turkish relations leading up to the alliance of 1939 taking into account the broader economic military and strategic issues While previous accounts suggest that Turkey entered into the alliance reluctantly Millman contends that it not only wanted an alliance but sought as close a relationship as Britain would concede in the prewar years He attributes the failure of the alliance mainly to Britain's lack of support namely its inability to fit Turkey into its strategy in the Mediterranean its failure to produce a coherent operational plan that could encompass Turkish military co operation and its unwillingness to provide Turkey with timely and much needed financial material and industrial assistance Divided into three parts The Ill Made Alliance examines the roots and course of the Anglo Turkish rapprochement in the years 1934-38 the economic military and politic factors in 1938-39 that inhibited development of the emerging alliance to the point where it might have been fully functional and the collapse of the alliance in 1939-40

International Humanitarian Law Facing New Challenges Wolff Heintschel von Heinegg, Volker Epping, 2007-03-06 Recent armed conflicts whether international or non international in character are in many respects characterized by a variety of asymmetries These asymmetries may be overstressed sometime even abused and ultimately virtually meaningless Still either as such or in conjunction with other developments they seem to challenge the law of armed conflicts or international humanitarian law These challenges may very well compromise the very function of that body of law which is to mitigate as far as possible the calamities of war Thus the law of armed conflict may be deprived of its fundamental function as an order of necessity because its legally binding directives will increasingly be disregarded for the sake of allegedly superior values In order to discuss these and other questions a most distinguished group of experts in the field of the law of armed conflicts gathered in Berlin in June 2005 The goal of that colloquium which marked the 70th birthday of Knut Ipsen was to find operable solutions for problems and challenges the contemporary law of armed conflict is confronted with With contributions by Bill Boothby Michael Bothe Yoram Dinstein Knut D rmann Charles J Dunlap Jr Volker Epping Dieter Fleck Steven Haines Wolff Heintschel von Heinegg Hans Joachim Heintze Rainer Hofmann Frits Kalshoven Stefan Oeter W Hays Parks Michael Schmitt Torsten Stein and Andreas Zimmermann

The Precision Revolution Michael Russell Rip, James M. Hasik, 2002 Ever since so called smart bombs debuted in the Vietnam War precision weapons have been an expected part of modern warfare While most Americans are aware of the use of these technological wonders frequently viewing images of pinpoint accuracy on their television screens few understand how the weapons work In this very readable explanation Michael Rip and James Hasik not only clarify the complex technology but chronicle the use of these modern marvels and elaborate on the promises and the pitfalls behind them At the root of today s precision weapons is the Global Positioning System GPS the same system used by professional marine and aerial navigators and even by modern hikers drivers of

upscale automobiles and sailboat owners The authors remove much of the mystery of this satellite based system explaining how it has revolutionized the art and science of navigation and overturned many of the solutions to the age old problems of targeting Relevant examples taken from today s headlines demonstrate both the capabilities and the limitations of these weapons Their use in Bosnia Kosovo and the stand off engagements in the no fly zones of Iraq make a great deal more sense with this book in hand Many of the emerging debates spawned by a mandated review of U S defense policy are clarified From the details of the weapons systems and their employment to their political implications this sweeping analysis of the effects of a revolutionary technology on military operations and strategy is without parallel A wealth of illustrations help the reader understand how technologies work and fit together how they are practically used and what they mean for the future The Bomb Beatrice Heuser,2014-09-25 This tightly argued and profoundly thought provoking book tackles a huge subject the coming of the nuclear age with bombing of Hiroshima and Nagasaki in August 1945 and the ways in which it has changed our lives since Dr Heuser sets these events in their historical context and tackles key issues about the effect of nuclear weapons on modern attitudes to conflict and on the ethics of warfare Ducking nothing she demystifies the subject seeing the bomb not as something unique and paralysing but as an integral part of the strategic and moral context of our time For a wide multidisciplinary and general readership *The Culture of Military Organizations* Peter R. Mansoor,Williamson Murray,2019-10-17 Examines how military culture forms and changes as well as its impact on the effectiveness of military organizations *Drones and US Grand Strategy in the Contemporary World* Francis N. Okpaleke,2023-12-23 This book makes a compelling case that lethal drone deployment as a counterterrorism tool and instrument of statecraft in targeted states engenders far reaching consequences for US grand strategy By examining how successive US administrations since 9 11 have deployed drones in pursuant of different typologies of US grand strategic objectives the book probes the putative political and strategic goals drones supposedly advance and the impact of its continued proliferation for US for international security The book provides a powerful base of evidence for policy makers and researchers by pointing to the perils of deployment of drone technology beyond their immediate or short term objectives It also explores how non state actors and authoritarian regimes such as armed groups are harnessing armed drone technologies for their own political and military ends as well as the underlying implications for US grand strategy and international security at large *Cooperation under Fire* Jeffrey W. Legro,2013-09-12 Why do nations cooperate even as they try to destroy each other Jeffrey Legro explores this question in the context of World War II the total war that in fact wasn t During the war combatant states attempted to sustain agreements limiting the use of three forms of combat considered barbarous submarine attacks against civilian ships strategic bombing of civilian targets and chemical warfare Looking at how these restraints worked or failed to work between such fierce enemies as Hitler s Third Reich and Churchill s Britain Legro offers a new understanding of the dynamics of World War II and the sources of international cooperation While traditional explanations of cooperation focus on the relations between

actors Cooperation under Fire examines what warring nations seek and why they seek it the preference formation that undergirds international interaction Scholars and statesmen debate whether it is the balance of power or the influence of international norms that most directly shapes foreign policy goals Critically assessing both explanations Legro argues that it was rather the organizational cultures of military bureaucracies their beliefs and customs in waging war that decided national priorities for limiting the use of force in World War II Drawing on documents from Germany Britain the United States and the former Soviet Union Legro provides a compelling account of how military cultures molded state preferences and affected the success of cooperation In its clear and cogent analysis this book has significant implications for the theory and practice of international relations **MTS/PFE Study Guide** ,1982 **Case Studies in Strategic Bombardment** R. Cargill Hall,Air Force History and Museums Program (U.S.),1998 A Democracy at War William L.
