[Must Love Trees](#) Tobin Mitnick, 2023-03-28. Tobin Mitnick, *JewsLoveTrees* creator and shameless tree lover, leads you the tree curious through the wonderful world of North American trees with fact, opinion, and humor. In *Must Love Trees*, Mitnick invites you to share his deeply personal connection to our forest companions in ways that expand the storied genre of nature writing. From an imagined dialogue with the world's oldest bristlecone pine to the minutiae of tree huggability to the emotional toll of taking up the practice of bonsai, this fresh take into the world of trees is divided into three equally humorous and insightful sections. The first section discusses Mitnick's personal opinions and relationship with trees, while the second section describes the science behind trees from tree botany to tree biology to tree ecology. In the final section, Mitnick answers the question: Who would these trees be if they all attended high school together? Tobin's detailed description of a tree in action and his thorough run-down of our most treasured North American trees, all 100 of whom happen to be classmates at Tree High North America, makes this compilation an original and occasionally outlandish guide for both the budding and seasoned tree lover. *Must Love Trees* features beautiful drawings of a vast selection of North American trees, including renowned icons like the Coast Redwood, Sequoia sempervirens, beloved favorites like the Southern Magnolia, Magnolia grandiflora, historical tragedies like the American Chestnut, Castanea dentata, menacing creepers like Poison Sumac, Toxicodendron vernix, unsung wonders like the Common Paw Paw, Asimina triloba. Part textbook, part memoir, and part comedy, *Must Love Trees* is the most complete and most unconventional story of our forest pals ever told.

The world today is undergoing the most rapid environmental transformation in human history, from climate change to deforestation. Scientists, ethnobotanists, indigenous peoples, and collectives of all kinds are closely studying trees and their biology to understand how and why trees function individually and collectively in the ways they do. In *Twelve Trees*, Daniel Lewis, curator and historian at one of the world's most renowned research libraries, travels the world to learn about these trees in their habitats. Lewis takes
