Recreating Africa James H. Sweet, 2004-07-21 Exploring the cultural lives of African slaves in the early colonial Portuguese world with an emphasis on the more than one million Central Africans who survived the journey to Brazil James Sweet lifts a curtain on their lives as Africans rather than as incipient Brazilians Focusing first on the cultures of Central Africa from which the slaves came Ndembu Imbangala Kongo and others Sweet identifies specific cultural rites and beliefs that survived their transplantation to the African Portuguese diaspora arguing that they did not give way to immediate creolization in the New World but remained distinctly African for some time Slaves transferred many cultural practices from their homelands to Brazil including kinship structures divination rituals judicial ordeals ritual burials dietary restrictions and secret societies Sweet demonstrates that the structures of many of these practices remained constant during this early period although the meanings of the rituals were often transformed as slaves coped with their new environment and status Religious rituals in particular became potent forms of protest against the institution of slavery and its hardships In addition Sweet examines how certain African beliefs and customs challenged and ultimately influenced Brazilian Catholicism Sweet's analysis sheds new light on African culture in Brazil's slave society while also enriching our understanding of the complex process of creolization and cultural survival

Peek, 2022-08-23 Divination is an important feature of cultures all over the world While some may still question the efficacy of divination systems they continue to serve their communities by diagnosing ailments prescribing healing treatments and solving problems Yet despite their universality there are relatively few comprehensive studies of divination systems This volume seeks to fill this gap regarding the use of divination in healing Here some of the world's leading authorities draw on their own fieldwork and participation in ritual to present detailed case studies demonstrating that divination rituals can have therapeutic effects As the contributors examine the systems of knowledge that divination articulates and survey the varieties of divinatory experience they seek to analyze divination as an epistemological system as a social process and as a therapeutic endeavor While some of their findings reinforce traditional assumptions about the importance of social control spirit relations and community support in the divination process the authors place these considerations within new epistemological frameworks that emphasize the use of alternative modes of knowing In this wide ranging volume readers will find coverage of classic Ifa systems Buddhist influenced shamanic practices in the former Soviet Union the reconciliation of Muslim beliefs and divinatory practices in Thailand Native American divination used in diagnosis Maya calendrical divination in Guatemala mediumistic and chicken oracle divination among the Sukuma of Tanzania Ndembu divination focusing on the process of collective healing and divination among the Samburu Maasai of Kenya featuring dialogues from actual healing sessions Together these contributions argue for new perspectives on the study of divination that emphasize not only the epistemological roots of these systems but also their multifaceted therapeutic functions Divination and Healing is a rich source of both data and insight for scholars of ritual religion medical anthropology and the psychology of altered states of consciousness *The Palgrave Handbook of African Traditional Religion* Igbolade S. Living the City in Africa Brigit Obrist, Veit Arlt, Elisio Macamo, 2013. Research on cities worldwide still takes its cue from cities in Europe and the US which are seen as the standard model. However cities in the global South are undergoing a much more rapid transformation including multiple interlinked transitions with Africa featuring the highest urbanization rates world wide. Scholars therefore call for a new approach to urban studies which examines cities from a more global comparative perspective. This book discusses the new approach which pays added attention to the role that societal creativity plays in processes of urbanization instead of concentrating exclusively on expert driven planning and intervention. Especially in fast growing cities with weaker institutional capacity for interventions the interplay between intervention and invention between expert and societal agency becomes more tangible and all the more significant.

Divination's Grasp Richard Werbner, 2015-11-15. A work of rare depth and profound insight that is destined to become a classic in African Studies and the anthropology of religion. Paul Stoller author of *Yaya's Story: The Quest for Well Being in the World*. Richard Werbner takes readers on a journey through contemporary charismatic wisdom, divination in southern Africa. Beginning with the silent language of the divinatory lots, Werbner deciphers the everyday metaphorical and poetic language that is used to reveal their meaning. Through Werbner's skillful interpretations of the language of divination a picture of Tswana moral imagination is revealed. Concerns about dignity and personal illumination, witchcraft, pollution, the anger of dead ancestors as well as the nature of life, truth, cosmic harmony, being and becoming emerge in this charged African setting. Werbner's *Divination's Grasp* documents a long and distinguished career in the service of anthropology. It will be a touchstone for anthropological studies of divination for years to come.

American Ethnologist Richard Werbner's superb account of moral imagination and the poetics of divination grasps the density of its subject matching the insights of the diviner with those of the ethnographer. The book takes its place among the very best works of Africanist anthropology as a new classic in the tradition of ethnographic divination and a necessary reminder of live and deep traditions of African wisdom.

Art and Religion in Africa Rosalind Hackett, 1998-10-01. Africa's religious and artistic traditions constitute a primary example of its intellectual and cultural vitality. Artistic works play a vital role especially where oral traditions dominate in communicating ideas about the relationship between the human, spiritual and natural worlds. This work is a comparative study of Africa's visual and performing arts concentrating on their geographical material and gendered diversity and focusing on the relation of these arts to African religion. The author combines ethnographic and art historical methodology but does not assume any prior knowledge of African art or African religion. The text seeks a greater understanding of the philosophical and religious aspects of African art thus challenging western perceptions of what is important in terms of artistic representation. This approach reveals the transformative capacities and multi dimensionality of African art. The work also

highlights the changes brought about by Christianity Islam and the newer religious movements in post colonial Africa

African Magic Heidi Holland, 2012-09-26 Africa's traditional beliefs including ancestor worship divination and witchcraft continue to dominate its spiritual influences Readers in search of a better understanding of the continent will be enriched by this book's timely exploration of sub Saharan Africa's natural philosophy The author's meticulous research reveals that whereas technology driven Western societies prefer to rely largely on logical explanations many Africans continue to obey their intuition trusting in images dreams and divination to rationalise misfortune and illness African Magic explains why so many Africans understand the relationship between people and unfortunate events not through the Western concept of chance in the case of accidents or germ theory in the case of illness but through belief in witchcraft The book records a collection of true stories which illustrate this traditional belief system Included are the famous Malawian diviner whose prophecies were considered so accurate that people flocked from neighbouring countries to consult him a group of Western trained Mozambican psychologists who successfully refined cross cultural therapy by working with traditional healers to combat post traumatic stress syndrome among child soldiers Ghanaian and Zimbabwean witches living in a nightmare world where popular belief becomes their reality and a Zambian archbishop whose attempt to embrace traditional African beliefs provoked serious conflict within his Christian church
