Bischoff,David Z. Piper,2013-03-08 Deep sea manganese nodules once an obscure scientific curios ity have in the brief span of two decades become a potential mineral resource of major importance Nodules that cover the sea floor of the tropical North Pacific may represent a vast ore de posit of manganese nickel cobalt and copper Modern technology has apparently surmounted the incredible problem of recovering nodules in water depths of 5000 meters and the extraction of metals from the complex chemical nodule matrix is a reality Both the recovery and the extraction appear to be economically feasible Exploitation of this resource is however hindered more by the lack of an international legal structure allowing for recognition of mining sites and exploitation rights than by any other factor Often when a mineral deposit becomes identified as an ex ploitable resource scientific study burgeons Interest in the nature and genesis of the deposit increases and much is learned from large scale exploration The case is self evident for petrol eum and ore deposits on land The study of manganese nodules is just now entering this phase What was the esoteric field of a few scientists has become the subject of active exploration and research by most of the industrialized nations Unfortunately for our general understanding of manganese nodules exploration results remain largely proprietary However scientific study has greatly increased and the results are becoming widely available

*The A4 Pacifics After Gresley* Ronald Hillier, Tim Hillier-Graves, 2023-11-23 In their book *Gresley's Silver Link* the authors analyzed the evolution of the A4s *Gresley's* and their service up to *Gresley's* death in 1941 This book takes this compelling story from the early years of the war up to their demise in the 1960s After four years of service pulling the LNER's most prestigious trains the A4s took on a more utilitarian role and for six years worked hard to support Britain's war effort From this they emerged bowed but unbeaten although in an extremely jaded condition Once restored they took up where they had left off in 1939 and did exceptional service for the rest of their days With the help of previously unpublished material the authors analyze the second phase of the A4s careers first as LNER engines then from 1948 under British Railways management Without a diesel or electric fleet of engines to replace them they entered a second golden age of fast running in the 50s Then in the Swinging Sixties they faced as some thought a premature end as part of a much delayed modernization program Until withdrawn from service they continued to astound their footplate crew and performed exceptionally well even when maintenance standards had slipped and their condition had deteriorated They were thoroughbreds and have become a fitting memorial to the master engineers who produced and sustained them for 30 years or more Reports of the Government Directors of the Union Pacific Railroad Company, Made to the Secretary of the Interior Union Pacific Railroad Company, 1886 **Proceedings Of The 3rd Asia-Pacific Bioinformatics Conference** Limsoon Wong, Phoebe Yi-ping Chen, 2005-01-06 High throughput sequencing and functional genomics technologies have given us a draft human genome sequence and have enabled large scale genotyping and gene expression profiling of human populations Databases containing large number of sequences polymorphisms and gene expression profiles of normal and diseased tissues in different clinical states are rapidly being generated for human and model organisms Bioinformatics is thus rapidly growing in importance in the annotation of genomic sequences in the understanding of the interplay between genes and proteins in the analysis the genetic variability of species etc The 3rd APBC brings together researchers professionals and industrial practitioners for interaction and exchange of knowledge and ideas The proceedings contains the latest results that address conceptual and practical issues of bioinformatics Papers presented at APBC 05 and included in this proceedings volume span the following Novel Applications in Bioinformatics Computational Analysis of Biological Data Data Mining Statistical Modeling of Biological Data Modeling and Simulation of Biological Processes Visualization of Biological Processes and Data Management Migration and Integration of Biological Databases Access Indexing and Search in Biological Databases **Ocean dumping of radioactive waste off the Pacific coast** United States.
