Highlighting the value of networks, collaboration and archives, the companion sets out new ways of reading women's contributions to the production and circulation of global print cultures. With an international intergenerational set of contributors using diverse methodologies, essays explore women working in publishing transatlantically on the continent and beyond the Anglosphere. The book combines new work on high profile women publishers and editors alongside analysis of women's work as translators, illustrators, booksellers, advertisers, patrons and publisher's readers, complemented by new oral histories and interviews with leading women in publishing today. The first collection of its kind, the companion helps establish and shape a thriving new research field.

Ensouling Language Stephen Harrod Buhner, 2010-08-23 The first comprehensive work on nonfiction as an art form. Shows how nonfiction, especially how to and self-help, can take on the same power and luminosity as great fiction. Develops processes to reliably induce the dreaming state from which all writing comes. Teaches the skill of analogical thinking that is the core perceptual tool for writers. Explores the subtle techniques of powerful writing from inducing associational dreaming in the reader to language symmetry, sound patterning, foreshadowing, feeling flow and more. Approaching writing as a sacred art, Stephen Buhner explores the core of the craft: the communication of deep meaning that feeds not just the mind but also the soul of the reader. Tapping into the powerful archetypes within language, he shows how to enrich your writing by following golden threads of inspiration while understanding the crucial invisibles essential to the art of both fiction and nonfiction: how to craft language with feeling and vision, employ altered states of mind to access the writing trance, clear your work by recognizing the powerful sway of clichéd thinking and hidden baggage, and intentionally generate duende—that physical/emotional response to art that gives you chills, opens up unrecognized aspects of reality or simply resonates in your soul. Covering some very practical aspects of writing such as layering and word symmetry, the author also explores the inner world of publishing: what you really will encounter when you become a writer. He then shows how to develop a powerful and engaging book proposal based on understanding the proposal as a work of fiction: the map is never the territory, nor is the proposal the book that it will become. This book, written using all the techniques discussed within it, offers a powerful experiential journey into the heart of writing. It does for nonfiction what John Gardner's books on writing did for fiction. It is one of the most significant works on writing published in our time.

Reluctant Capitalists Laura J. Miller, 2008-09-15 Over the past half century bookselling like many retail industries has evolved from an arena dominated by independent bookstores to one in which chain stores have significant market share And as in other areas of retail this transformation has often been a less than smooth process This has been especially pronounced in bookselling argues Laura J Miller because more than most other consumer goods books are the focus of passionate debate What drives that debate And why do so many people believe that bookselling should be immune to questions of profit In *Reluctant Capitalists* Miller looks at a century of book retailing demonstrating that the independent chain dynamic is not entirely new It began one hundred years ago when department stores began selling books continued through the 1960s with the emergence of national chain stores and exploded with the formation of superstores in the 1990s The advent of the Internet has further spurred tremendous changes in how booksellers approach their business All of these changes have met resistance from book professionals and readers who believe that the book business should somehow be above market forces and instead embrace more noble priorities Miller uses interviews with bookstore customers and members of the book industry to explain why books evoke such distinct and heated reactions She reveals why customers have such fierce loyalty to certain bookstores and why they identify so strongly with different types of books In the process she also teases out the meanings of retailing and consumption in American culture at large underscoring her point that any type of consumer behavior is inevitably political with consequences for communities as well as commercial institutions

The Rise of Corporate Publishing and Its Effects on Authorship in Early Twentieth Century America Kim Becnel,2012-12-06 This study examines the way that the modernization and incorporation of the American publishing industry in the early twentieth century both helped to foment the emerging late industrial cultural hierarchy and capitalized on that same hierarchy to increase readership and profits More importantly however it attempts to trace the ways in which recently introduced marketing techniques reconceived ideas of audience and new paradigms in author publisher relations affected American writers of the 1930s and the literature they produced Using case studies of authors chosen from various points on the spectrum of so called high middle and lowbrow literature the author demonstrates that contrary to popular critical opinion this new publishing landscape dominated by big business practices and strict categorizations of audiences writers and works did not ruin or corrupt literature but in fact enriched our literary heritage by providing authors with inspiration and opportunity that they may not otherwise have had
