Book In Technological Society:

The Technological Society Jacques Ellul, 1964 A penetrating analysis of our technical civilization and of the effect of an increasingly standardized culture on the future of man

The Technological System Jacques Ellul, 2018-06-11 Some 20 years after writing *The Technological Society* Jacques Ellul realized how the totalistic dimensions of our modern technological milieu required an additional treatment of the topic Writing amidst the rise of books in the 1970s on pollution over population and environmental degradation Ellul found it necessary once again to write about the global presence of technology and its far reaching effects *The Technological System* represents a new stage in Ellul's research Previously he studied technological society as such in this book he approaches the topic from a systems perspective wherein he identifies the characteristics of technological phenomena and technological progress in light of system theory This leads to an entirely new approach to what constitutes the most important event of our society which has decisive bearing on the future of our world Ellul's analysis touches on all aspects of modern life not just those of a scientific or technological order In the end readers are compelled to formulate their own opinions and make their own decisions regarding the way a technique based value system affects every level of human life

Technology and Society, second edition Deborah G. Johnson, Jameson M. Wetmore, 2021-08-24 Writings by thinkers ranging from Rokeya Sakhawat Hossain to Bruno Latour that focus on the interconnections of technology society and values Technological change does not happen in a vacuum decisions about which technologies to develop fund market and use engage ideas about values as well as calculations of costs and benefits In order to influence the development of technology for the better we must first understand how technology and society are inextricably bound together These writings by thinkers ranging from Bruno Latour to Francis Fukuyama help us do just that examining how people shape technology and how technology shapes people This second edition updates the original significantly offering twenty one new essays along with fifteen from the first edition The book first presents visions of the future that range from technological utopias to cautionary tales and then introduces several major STS theories It examines human and social values and how they are embedded in technological choices and explores the interesting and subtle complexities of the technology society relationship Remedying a gap in earlier theorizing in the field many of the texts illustrate how race and gender are intertwined with technology Finally the book offers a set of readings that focus on the sociotechnical challenges we face today treating topics that include cybersecurity geoengineering and the myth of neutral technology

Jacques Ellul and the Technological Society in the 21st Century Helena M. Jerónimo, José Luís García, Carl Mitcham, 2013-07-08 This volume rethinks the work of Jacques Ellul 1912 1994 on the centenary of his birth by presenting an overview of the current debates based on Ellul's insights As one of the most significant twentieth century thinkers about technology Ellul was among the first thinkers to realize the importance of topics such as globalization terrorism communication technologies and ecology and study them from a technological perspective The book is divided into three

sections The first discusses Ellul's diagnosis of modern society and addresses the reception of his work on the technological society the notion of efficiency the process of symbolization de symbolization and ecology The second analyzes communicational and cultural problems as well as threats and trends in early twenty first century societies Many of the issues Ellul saw as crucial such as energy propaganda applied life sciences and communication continue to be so In fact they have grown exponentially on a global scale producing new forms of risk Essays in the final section examine the duality of reason and revelation They pursue an understanding of Ellul in terms of the depth of experience and the traditions of human knowledge which is to say on the one hand the experience of the human being as contained in the rationalist sociological and philosophical traditions On the other hand there are the transcendent roots of human existence as well as revealed knowledge in the mystical and religious traditions The meeting of these two traditions enables us to look at Ellul's work as a whole but above all it opens up a space for examining religious life in the technological society

The technological society, tr Jacques Ellul, *Technologies & Society* Ron Westrum, 1991 The shaping of people and things Theory Marx's theory of technology The Ogburn generation Recent theoretical approaches Originators and managers of technology Inventors and inventions Invention as a social process The role of designers in technology Innovation inventions and institutions The sponsorship of technology How sponsors evolve Users of technology The technology user interface Adapting and tinkering Technological accidents The distancing effects of technology Monitoring technology shaping the present and the future social control of technologies Technology assessment Foresight and social intelligence Index The Technological Society Anatole Beck, 1972 *The End of Ethics in a Technological Society* Lawrence E. Schmidt, Scott Marratto, 2008-02-06 A critical assessment of the failure of liberal ethics to meet the challenges posed by techno science

Handbook of Research on Technoself: Identity in a Technological Society Luppicini, Rocci, 2012-10-31 This book provides insights to better enhance the understanding of technology's widespread intertwinement with human identity within an advancing technological society Provided by publisher **Technology and Values** Craig Hanks, 2009-05-04 This anthology features essays and book excerpts on technology and values written by preeminent figures in the field from the early 20th century to the present It offers an in depth range of readings on important applied issues in technology as well Useful in addressing questions on philosophy sociology and theory of technology Includes wide ranging coverage on metaphysics ethics and politics as well as issues relating to gender biotechnology everyday artifacts and architecture A good supplemental text for courses on moral or political problems in which contemporary technology is a unit of focus An accessible and thought provoking book for beginning and advanced undergraduates yet also a helpful resource for graduate students and academics **Democracy in a Technological Society** L. Winner, 2013-03-09 This ninth volume is one of the

most ambitious in the Philosophy and Technology series Edited by technopolitical philosopher Langdon Winner it assembles an impressive collection of philosophers and political theorists to discuss one of the most important topics of the end of the twentieth century the bearing of technology in all its ramifications on the practice of democratic politics in the developed world When set beside the previous volume in the series Europe America and Technology the two together open a philosophical dialogue of great significance about the ways technology challenges democracy at its very roots Some philosophers think the attack is fatal Others are optimistic that democratic means can be discovered or invented for the control of technology Still others object to an optimism versus pessimism formulation of the issue But all agree that the issue is highly significant one that demands serious philosophical inquiry The Society for Philosophy and Technology was fortunate in being able to draw this group of writers to Bordeaux France in 1989 along with a large number of others whose contributions to the debate could not be included here It is equally fortunate to have chosen Langdon Winner as president when the time came to select the best of the papers to fashion this volume University of Delaware PAUL T *Democratic Theory and Technological Society* Richard B. Day, Ronald Beiner, Joseph Masciulli, 2017-07-05 What are the chief challenges posed to contemporary democracy by modern technology and how can democratic theory best respond to or at least reflect on those challenges Inhabiting the kind of technologically advanced era in which we live what sources are available within political theory for theoretical insight concerning the problem of democratic engagement with technology The purpose of this volume is to canvas a broad range of theorists and theoretical traditions in order to address these questions including Hegel and Marx Rousseau and John Dewey Heidegger and Simone Weil Habermas and Walter Benjamin Hannah Arendt and Hans Jonas Commentaries on all these important thinkers focused on the issue of contemporary technology as posing unique social and political challenges for democratic political life yields rich and ambitious resources for theoretical reflection

Questioning Technology with Jacques Ellul David W. Gill, Lisa Richmond, 2025-10-07 Twenty first century technology is an ever expanding powerful force in virtually every aspect of human life and every corner of the globe So much of modern technology has resulted in positive improvements in communication work health and other domains Technology's promises and possibilities for the future are often glowing But it is one thing for technology to function as a tool serving human purpose and flourishing and quite another for it to be granted the position of unquestioned master All technologies deserve to be questioned What are their costs trade offs and potential or real negative impact And how do we create limits and controls for technological invasion when these would be wise and necessary Questioning Technology with Jacques Ellul addresses these questions in both the big picture and in their relevance to specific arenas such as art politics work and religion with voices from not just the academy but also the workplace and society Science, Technology, and Public Policy: Books, monographs, documents, and articles in journals, 1968 through 1970 Lynton Keith Caldwell, William B. DeVille, Hedvah L. Shuchman, 1968 **The Technological Society**, 1973 **Power and Technology** Jan van

Dijk,2024-09-11 The definition of power varies across disciplines Social scientists tend to deal with social power philosophers of technology with the relation between technology and society and ecologists with the relation between natural and social power Concepts of power and technology are freely used but this relationship is complex and multifaceted In this analytic and ambitious textbook Jan van Dijk brings these perspectives together to provide a more comprehensive answer In attempting to integrate social technical and natural power into one framework he develops a general concept of power which unites all three the first time such an attempt has been made The author argues that it is important to look at these concepts together natural power is not simply a resource for technology and society and its inclusion is crucial given the ecological impact of technologies Overall nine forms of power which comprise the framework are discussed in each chapter force construction coercion domination discipline dependency information persuasion and authority and at all levels individuals organizations and societies Van Dijk concludes with some practical implications and asks two key questions how can automatic and autonomous technology such as AI be controlled by humans And how can we find a more sustainable and less exploitive technology Power and Technology contains many figures tables and illustrations and is suitable for students and scholars of technology studies and the sociology philosophy and history of technology *College Scence Technology and Socety* , *New Business Perspectives on the Older Worker* United States. Congress. House. Select Committee on Aging,1982
