The Power of Silence Robert Cardinal Sarah, Nicolas Diat, 2017-04-15 In a time when technology penetrates our lives in so many ways and materialism exerts such a powerful influence over us, Cardinal Robert Sarah presents a bold book about the strength of silence. The modern world generates so much noise; he says that seeking moments of silence has become both harder and more necessary than ever before. Silence is the indispensable doorway to the divine, explains the cardinal in this profound conversation with Nicolas Diat. Within the hushed and hallowed walls of the La Grande Chartreuse, the famous Carthusian monastery in the French Alps, Cardinal Sarah addresses the following questions: Can those who do not know silence ever attain truth, beauty, or love? Do not wisdom, artistic vision, and devotion spring from silence where the voice of God is heard in the depths of the human heart? After the international success of *God or Nothing*, Cardinal Sarah seeks to restore to silence its place of honor and importance. Silence is more important than any other human work, he says, for it expresses God. The true revolution comes from silence; it leads us toward God and others so as to place ourselves humbly and generously at their service.

White Men's Magic Vincent L. Wimbush, 2014 Characterizing Olaudah Equiano's eighteenth-century narrative of his life as a type of scriptural story that connects the Bible with identity formation, Vincent L. Wimbush's *White Men's Magic* probes not only how the Bible and its reading played a crucial role in the first colonial contacts between black and white persons in the North Atlantic but also the process and meaning of what he terms scripturalization. By this term, Wimbush means a social, psychological, political, discursive structure or semiosphere that creates a reality and organizes a society in terms of relations and communications. Because it is based on the particularities of Equiano's narrative, Wimbush's theoretical work is not only grounded but inductive and shows that scripturalization is bigger than either the historical or the literary. Equiano's scripturalization was not invented by Equiano, he says, but it is not quite the same after Equiano.

The Way of All Fish Martha Grimes, 2014-10-07 Includes excerpt from *Vertigo* 42 also by Martha Grimes.

Thomas Merton and the Noonday Demon Donald Grayston, 2015-05-19 How did Thomas Merton become Thomas Merton? Starting out from any one of his earlier major life moments: wealthy orphan boy, big man on campus, fervent Roman Catholic convert, new and obedient monk, we find ourselves asking how, by his life's end, he had grown from who he was then into a transcultural and transreligious spiritual teacher. Read

by millions This book takes another such starting point his attempt in the mid 1950s to move from his abbey of Gethsemani in Kentucky a place that had become in his view noisy beyond bearing to an Italian monastery Camaldoli which he idealized as a place of monastic peace The ultimate irony Camaldoli at that time bucolic and peaceful outwardly was inwardly riven by a pre Vatican II culture war whereas Gethsemani which he tried so hard to leave became when he was given his hermitage there in 1965 his place to recover Eden In walking with Merton on this journey and reading the letters he wrote and received at the time we find ourselves asking as he did with so much energy and honesty the deep questions that we may well need to answer in our own lives

Your Stone Age Brain in the Screen Age Richard E. Cytowic, 2024-10-01 An award winning neurologist on the Stone Age roots of our screen addictions and what to do about them The human brain hasn't changed much since the Stone Age let alone in the mere thirty years of the Screen Age That's why according to neurologist Richard Cytowic who Oliver Sacks observed changed the way we think of the human brain our brains are so poorly equipped to resist the incursions of Big Tech They are programmed for the wildly different needs of a prehistoric world In *Your Stone Age Brain in the Screen Age* Cytowic explains exactly how this programming works from the brain's point of view What he reveals in this book shows why we are easily addicted to screen devices why young developing brains are particularly vulnerable why we need silence and what we can do to push back In the engaging storytelling style of his popular TED Talk Cytowic draws an easily comprehensible picture of the Stone Age brain's workings the function of neurotransmitters like dopamine in basic instincts for survival such as desire and reward the role of comparison in emotion and emotion in competition and most significantly the orienting reflex one of the unconscious circuits that automatically focus shift and sustain attention Given this picture the nature of our susceptibility to digital devices becomes clear along with the possibility of how to break their spell Full of practical actions that we can start taking right away *Your Stone Age Brain in the Screen Age* offers compelling evidence that we can change the way we use technology resist its addictive power over us and take back the control we have lost

Windows into the Light Michael Sullivan, 2008-10-01 Focuses on the journey from darkness to light inherent in Lent By using an easily accessible liturgical format the book provides a pathway for those who walk from Ash Wednesday to the empty tomb of Easter Chapters begin with a prayer or poetic excerpt followed by scripture for the day or week A narrative then expands on the themes introduced by the prayer

and scripture Exercises following the narratives are simple mostly collage exercises using differing techniques and are accessible to a wide audience Soul Questions guide the spiritual exercise following the narrative and Thoughts for the Journey complete each chapter with suggestions for further reflection
