Justus Ludewig von Uslar, and the First Book on Allelopathy R.J.  career of the widely read cultural historian Johannes Scherr and his development of a new kind of historical writing for the
 increasingly globalized 19th century world The German nineteenth century saw a boom in publishing and reading that
 created opportunities not only for Dichter creators of great literature but also for Schriftsteller authors of the second rank
 Among the latter were cultural mediators who helped readers negotiate the ever expanding galaxy of print Few achieved
 greater prominence than Johannes Scherr whose remarkable career as a critic anthologist and historian of German and world
 literature began in the turbulent Vormärz era and continued during years of exile in the unlikely setting of the Zurich
 Polytechnic He wrote from the vantage point of Switzerland but his books were published in Germany where his polemical
 style found favor Andrew Cusack's study traces the process of Scherr's literary socialization as mediator in the contact zone
 formed by the Kingdom of Württemberg and Switzerland whose liberal project of Volksbildung inspired him It considers how
 his liminal position between nations and between the humanities and the sciences led him to develop a form of historical
 authorship for the increasingly globalized nineteenth century The book considers Scherr's engagement with the totalizing
 paradigms of cultural history and world literature and sets his pessimistic worldview in the context of the materialism and
 violent political agitation that threatened democratic values in Switzerland and elsewhere Württemberg and Switzerland whose

Memory Rudolf Steiner, 2020-05-07. What is the meaning of memory in the information age? When all knowledge is seemingly digitised and available for reference at any time, do we actually need human memory? One consequence of the proliferation of digitization is the deterioration of our capacity to remember, a symptom that is apparent in a steady increase in dementia within contemporary society. Rudolf Steiner indicates that memory is the determining factor in awareness of oneself. Even a partial loss of memory leads to loss of self-consciousness and the sense of our I. Thus memory is crucial for the development of I-consciousness not only for the individual but for humanity as a whole. Rudolf Steiner's research on memory, recollection, and forgetting has many implications for the way we learn, for inner development, and spiritual growth. This unique selection of passages from his works offers insights into how consciousness can remain autonomous and creative in a digital environment. It also provides ideas for improving education and emphasizes the importance of life-long learning. Chapters include: The Development of Memory Throughout Human History; The Formation of Memory; Remembering and Forgetting in the Human Individual; Remembering and Forgetting in Connection with Education; How Remembering and Forgetting are Transformed by the Schooling Path; Imagination and Inspiration; Remembering Backwards; Rückschau and Memory Exercises; Subconscious Memories of the Pre-birth Period and of Life Between Death and a New Birth; Memory and Remembering after Death; The Development of Memory in the Future.
