Bomber Raid:

The Bomber Command War Diaries Martin Middlebrook, Chris Everitt, 2014-04-02 The essential WWII historical reference detailing RAF Bomber Command's extensive campaign of strategic bombings across occupied Europe. The Royal Air Force Bomber Command's strategic bombing campaign started on the first day of the Second World War and ended five and a half years later with the final victory in Europe. It was a campaign of such enormous scale that historians have only recently begun to piece together the finer details of the individual raids. Aviation historian Martin Middlebrook and his research colleague Chris Everitt were the first to compile a complete review of all the raids and their background stories. The Bomber Command War Diaries not only documents every Bomber Command operation but also details their effects on the ground, drawing on local archives from Germany, Italy, and the occupied countries. It is a groundbreaking work on historical research bringing together the two sides of Bomber Command's war. This edition includes retrospective observations and a new appendix.

RAF Bomber Command at War, 1939-1945 Craig Armstrong, 2021-04-28 The Royal Air Force had placed a great deal of faith in its force of bombers. Bomber Command, in the event of a future war, the belief in the ability of formations of bombers flying in daylight and unescorted, protecting themselves from enemy fighter attack, informed early tactics but led to bloody losses. Hampered by government restrictions on targets, by late 1941 Bomber Command was in crisis. As a result and coupled with the growing dire war situation, a new and forceful commander, Sir Arthur Harris, was appointed and new strategies allowed Bomber Command to broaden its attacks despite some opposition. The result was the area bombing strategy which focussed attacks upon enemy-held towns and cities. This Main Offensive period lasted throughout 1943-1944 and saw both victories and defeats. It was also the period that saw a limited number of precision attacks on Augsburg, Peenemünde, and most famously the Ruhr dams. Bomber Command also aided in tactical and strategic support for the invasion of Europe and the subsequent fight to push inland. New technological developments allowed Bomber Command to hit V-Weapons sites and to focus more on precision bombing, but Harris remained determined to hit German towns and cities whenever possible while the Command's growing power allowed it to rain devastation upon its targets, culminating at Dresden. Much has been written about Bomber Command, but this book focusses largely on those who took part in the raids and on public attitudes towards the campaign in Britain. Using accounts from national and local archives, newspapers, and existing historiography, the book seeks to shed light on untold stories from Bomber Command's war.

The Heavy Bomber Offensive of WWII Martin W. Bowman, 2015-05-31 This book contains fourteen stirring accounts, each conveying an authentic sense of what it was really like to fly as a member of air crew during the various bombing operations of the Second World War. The storytellers are an eclectic mix of pilots, navigators, bomb aimers, wireless operators, and gunners who flew on operations in heavy bombers. It conveys the terror of being coned by German searchlights over the target, attacks by Luftwaffe night fighters, often catastrophic damage to aircraft, and the ensuing struggle to keep the machine airborne on the

return trip to base It tells of the comradeship between the crew and the humour between them often borne of fear The gentle and unassuming narratives include Millennium One of Our Aircraft Is Missing Bomber s Moon Bombing Berlin The Ordeal Of Pilot Officer Romans DFC Last Man Out operations on Whitleys and Halifaxes Flying Officer X Stirlings Rescue At Sea The Incendiary Load s Alight The Night Of The Bombs and The Kassel Raids of 1943 as well as BBC Broadcasts and stories by Allied war correspondents Each of these accounts conveys the sense of purpose that these men felt in doing one of the most dangerous jobs of the war It is a fitting tribute to those that survived and the many thousands who died in the struggle against Hitler s dreadful ambitions in Europe

Terror From the Sky Igor Primoratz, 2010-06-01 In this first interdisciplinary study of this contentious subject leading experts in politics history and philosophy examine the complex aspects of the terror bombing of German cities during World War II The contributors address the decision to embark on the bombing campaign the moral issues raised by the bombing and the main stages of the campaign and its effects on German civilians as well as on Germany s war effort The book places the bombing campaign within the context of the history of air warfare presenting the bombing as the first stage of the particular type of state terrorism that led to Hiroshima and Nagasaki and brought about the Cold War era balance of terror In doing so it makes an important contribution to current debates about terrorism It also analyzes the public debate in Germany about the historical moral and political significance of the deliberate killing of up to 600 000 German civilians by the British and American air forces This pioneering collaboration provides a platform for a wide range of views some of which are controversial on a highly topical painful and morally challenging subject

The Terror Raids of 1942 Jan Gore, 2020-12-02 Meticulous research provides the fullest insight yet into the impact of this bombing campaign on Britain s home front during the Second World War We shall go out and bomb every building in Britain marked with three stars in the Baedeker Guide the German Foreign Office announced in April 1942 as the Luftwaffe attacked Exeter Bath Norwich York and Canterbury Over a thousand people died These raids were direct retaliation for RAF raids on equally historic German cities Hitler had ordered that Preference is to be given where attacks are likely to have the greatest possible effect on civilian life and in this narrow aim as Jan Gore shows in the first full history of the raids to be published for over twenty years they certainly succeeded She explains the Luftwaffe s tactics the types of bombs that were used high explosive parachute mines and incendiaries and records the devastating damage they caused Her main focus is on the effect of the bombing on the ground In graphic detail she describes the air raid precautions the role of the various civil defense organizations and the direct experience of the civilians Their recollections many of which have not been published before as well as newspaper articles and official reports give us a vivid impression of the raids themselves and their immediate aftermath One can never understand what either side hoped to achieve by destroying historic cities and killing and maiming their citizens during a conflict such as the second world war Jan Gore attempts to explain the thinking behind it and the awful consequences A terrific account Books Monthly

The Wellington Bomber Martin W.

Bowman,2020-01-31 The Wellington Bomber was omnipresent during the Second World War employed in a variety of contexts in the fight against the Axis powers The pilots who flew this aircraft did so with an immense amount of pride and there is perhaps no one better placed to tell the story of this incredible aircraft than these men Martin Bowman has drawn together a selection of first hand pilot testimonies in an effort to record authentically the experience of flying the much mythologised Wellington during one of the most challenging eras of aviation history The book is supplemented by two plate sections of stirring black and white images *Bomber Command's War Against Germany* An Official History,2020-12-14 The internal RAF analysis of the different phases of the air war and what lessons could be learnt from those campaigns Royal Aeronautical Society website When the RAF s Bomber Command analyzed the results of their precision bombing efforts during the early years of World War II a growing body of evidence indicated that the great knockout blow expected to be delivered from the air was a fantasy It would only be through a prolonged campaign of attrition that the enemy could be worn down to such a degree that morale the means of production and the infrastructure of the enemy would be degraded to the point where its fighting ability was crippled The result of this assessment was a change of policy from precision bombing of carefully identified key installations to area bombing with the declared intent of striking at the homes of the German workers the factories where they worked regardless of the nature of such establishments or of the civilian casualties that would be the inevitable consequence In compiling this official analysis of the effectiveness of the RAF s strategic bombing campaign the author was granted unrestricted access to Air Ministry Cabinet and other relevant departmental documents that were maintained for internal government use enabling him to gain a complete and unbiased assessment of the contribution made by Bomber Command to the defeat of Germany The conclusion he draws fully justifies the decisions taken by both Britain and the USA to bomb the German people into surrender Bombing Hitler T.I. Bomb Aimer Over Berlin Les Bartlett, Peter Jacobs, 2007-09-20 The English pharmacist turned RAF aircrew member recounts his missions fighting against the Third Reich during World War II Les Bartlett has become one of the great characters of World War II history He flew as bomb aimer with the then Flying Officer Michael Beetham who later became Marshal of the Royal Air Force At that time he was a sergeant but gained his commission in April 1944 and flew his tour including twenty seven raids over Germany and France between November 1943 and May 1944 On his second operation his aircraft was attacked by a Ju 88 leaving it with no flaps or brakes a crash landing at Wittering ensued At the end of his third mission they found the whole of Lincolnshire fogbound and eventually landed at RAF Melbourne in Yorkshire just before that airfield was closed also because of the fog His aircraft was hit in the wing by a 30lb incendiary bomb dropped by another Lancaster flying above them on his sixth operation but they survived On his twelfth operation to Leipzig he used the nose guns to destroy a Ju 88 night fighter for which he was awarded the DFM In February 1944 the port outer engine caught fire and the crew baled out Les was then posted as Assistant Adjutant to RAF Thornaby

The RAF's Youngest Bomber Pilot of WW2 Graham Waterton, 2024-08-30 Having left his grammar school just before his 16th birthday Brian Slade falsified his age to pursue his dream of becoming a pilot Within a few days of his 17th birthday he was awarded his wings It was the start of this teenager's remarkable wartime career Soon after being awarded his pilot's brevet Brian was posted to his first squadron Flying the venerable Vickers Wellington he found himself experimenting with early target marking techniques It was also there that Brian gained the nickname The Boy Slade Though Brian's journey through the wartime RAF mirrored the experiences of tens of thousands of young men what was different if not unique was the fact before he had turned 18 which was the minimum age to begin aircrew training Brian had already completed thirty four operations more than was needed for a tour This tally included the three 1 000 bomber raids against Cologne Essen and Bremen He was awarded a Distinguished Flying Cross for nursing his badly damaged Wellington which sustained flak and night fighter damage home after a raid on Bremen Undaunted Brian soon after volunteered for his second tour of operations It was at this stage that he joined the Lancaster equipped 83 Squadron in the newly formed 8 Group becoming an experienced Pathfinder skipper It was a role in which he marked targets in the Battle of the Ruhr the bombing of Hamburg Operation Gomorrah and the Peenemünde raid The RAF's Youngest Bomber Pilot of WW2 told by his nephew a former officer in the British Army details all of Brian's fifty nine missions and captures his compelling progress with Bomber Command alongside the technological advances in aircraft pathfinder strategy and tactics Sadly Brian's Lancaster was shot down over Berlin in August 1943 The details of its loss remained shrouded in mystery until the puzzle of his aircraft's demise was eventually solved by tracing the family of the only survivor The relentless dangers not just in operations but also in training and the continuous loss of life are drawn into sharp
