Of Diogenes Laertius Its Spirit I:

The Book of Diogenes Laertius Richard Hope,1930 *A Book of Diogenes Laertius: Its Spirit and Its Method, A Thesis with a Bibliography.* Richard HOPE (Philosophical Writer.),1930 Humanism and the Church Fathers Charles L. Stinger,1977-06-30 This study of the foremost patristic scholar in 15th century Florence is based almost exclusively on manuscript letters and incunabula in Greek Latin and Italian The influence of the revival of patristic studies on the meaning and purpose of Renaissance learning emerges as one of the original considerations in this book which should be of interest to humanists generally but also to art historians intellectual history researchers theologians and philosophers **Aufstieg und Niedergang der römischen Welt: Principat. v** Hildegard Temporini,Wolfgang Haase,1990 **Traditions of the Magi** Albert F. de Jong,2015-08-27 This is the first full treatment of the Greek and Latin references to Zoroastrianism since the pioneering works of Benveniste Bidez Cumont and Clemen It focuses on the possibilities offered by the classical reports on Zoroastrianism to reconstruct the history of that faith The book is divided into three sections The first section deals with introductory problems concerning ancient religious ethnography and current views of the history of Zoroastrianism The second section consists of commentaries on five selected passages The third section offers a thematical overview of the materials and their relevance for the history of Iranian religions Apart from offering introductions to a wide range of debates and topics in Classics and Iranian studies the book aims to illustrate the diversity of beliefs and practices in ancient Zoroastrianism **Greek and Latin authors on Jews and Judaism** Menahem Stern,2024-04-08 *The History and Poetics of Scientific Biography* Thomas Söderqvist,2016-03-03 Biographies of scientists carry an increasingly prominent role in today s publishing climate Traditional historical and sociological accounts of science are complemented by narratives that emphasize the importance of the scientific subject in the production of science Not least is the realization that the role of science in culture is much more accessible when presented through the lives of its practitioners Taken as a genre such biographies play an important role in the public understanding of science In recent years there has been an increasing number of monographs and collections about biography in general and literary biography in particular However biographies of scientists engineers and medical doctors have rarely been the topic of scholarly inquiry As such this volume of essays will be welcomed by those interested in the genre of science biography and who wish to re examine its history foundational problems and theoretical implications Borrowing approaches and methods from cultural studies and the history philosophy and sociology of science the contributions cover a broad range of subjects periods and locations By presenting such a rich diversity of essays the volume is able to chart the reoccurring conceptual problems and devices that have influenced scientific biographies from classical antiquity to the present day In so doing it provides a compelling overview of the history of the genre suggesting that the different valuations given scientific biography over time have been largely fuelled by vested professional interests **Studies in Classical Satire and Related Literary Theory** Ch. A. van Rooy,1965 **Studies in**

Classical Satire and Related Literary Theory Charles August van Rooy, 1965 **Studies in Empirical Philosophy** John Anderson, 2005-01-03 *Studies in Empirical Philosophy* was published in 1962 shortly after Anderson's death and had been prepared by him to include most of his published articles from the Australasian Journal of Philosophy and Psychology. It also includes a couple of articles written especially for the book. It remains the main published source of material on Anderson's systematic philosophy. John Passmore has kindly granted permission for his introduction to be included in this new release. John Anderson 1893-1962 was Challis Professor of Philosophy at the University of Sydney from 1927 until 1958. He is generally regarded as the most important philosopher to have worked in Australia. His students included not only academic philosophers but also important figures in politics, law, and journalism. His impact upon Sydney's social and cultural life was enormous. *The Book of Diogenes Laertius, Its Spirit and Its Method*, by Richard Hope. [A Thesis.]. Richard Hope, 1930

The Art of Living John Sellars, 2018-01-18 This title was first published in 2003. Presenting philosophy as an art concerned with one's way of life, Sellars draws on Socratic and Stoic philosophical resources and argues for the ancient claim that philosophy is primarily expressed in one's behaviour. The book considers the relationship between philosophy and biography and the bearing that this relationship has on debates concerning the nature and function of philosophy. Questioning the premise that philosophy can only be conceived as a rational discourse, Sellars presents it instead as an art, *techné*, that combines both *logos* (rational discourse) and *askesis* (training) and suggests that this will make it possible to understand better the relationship between philosophy and biography. The first part of this book outlines the Socratic conception of philosophy as an art and the Stoic development of this idea into an art of living, as well as considering some of the ancient objections to the Stoic conception. Part Two goes on to examine the relationship between philosophical discourse and exercises in Stoic philosophy. Taking the literary form of such exercises as central, the author analyses two texts devoted to philosophical exercises by Epictetus and Marcus Aurelius. *Religious and Philosophical Conversion in the Ancient Mediterranean Traditions*, 2022-03-07 The interest in interdisciplinary research on the experience of religious conversion or spiritual transformation grows progressively. In light of this burgeoning area of study, this volume explores conversion or converting experience in the ancient Mediterranean with attention to early Judaism, early Christianity, and philosophy in the Roman empire. The contributions include both historical and philological reconstructions relying on source material and utilizing interdisciplinary approaches. Similarly, the authors analyze the literary use of the motif of conversion, the topic of philosophical conversion, as well as ritual, social, and embodied aspects of spiritual transformation. *Science in the Archives* Lorraine Daston, 2022-12-22 Archives bring to mind rooms filled with old papers and dusty artifacts. But for scientists, the detritus of the past can be a treasure trove of material vital to present and future research: fossils collected by geologists, data banks assembled by geneticists, weather diaries trawled by climate scientists, libraries visited by historians. These are the vital collections assembled and maintained over decades, centuries, and even millennia which define the sciences of the archives.

With *Science in the Archives* Lorraine Daston and her co authors offer the first study of the important role that these archives play in the natural and human sciences Reaching across disciplines and centuries contributors cover episodes in the history of astronomy geology genetics philology climatology medicine and more as well as fundamental practices such as collecting retrieval and data mining Chapters cover topics ranging from doxology in Greco Roman Antiquity to NSA surveillance techniques of the twenty first century Thoroughly exploring the practices politics economics and potential of the sciences of the archives this volume reveals the essential historical dimension of the sciences while also adding a much needed long term perspective to contemporary debates over the uses of Big Data in science

The Letter of Mara bar Sarapion in Context

Annette Merz, Teun L Tieleman, 2012-09-14 The Letter of Mara bar Sarapion to his son preserved in a single Syriac manuscript 7th cent CE still speaks to its readers evocatively depicting the dramatic situation of a nobleman imprisoned after the Roman capture of Samosata capital of Commagene The letter is best known today for a passage on the wise king of the Jews which may be one of the earliest pagan testimonies concerning Jesus Christ Ongoing controversy over the letter's date nature and purpose has however led to the widespread neglect of this intriguing document In the present volume Merz and Tieleman have brought together cutting edge research from an interdisciplinary team of leading experts that significantly advances our appreciation of the letter and its historical context

Tibull und Delia: Tibulls Elegie, 1,1

Walter Wimmel, 1976

A History of Ancient Philosophy III Giovanni Reale, 1985-01-01 Reale's volume supplies a synthesis previously lacking a synthesis in the historical treatment of the great philosophies of the Hellenistic Age the Academy the Peripatos the Stoa the Garden of Epicurus Scepticism and Eclecticism Reale's extensive and fully documented treatment of the major schools of the period is unified by his thesis that the ethics developed by these major schools were secular faiths that sprang from intuitions about the meaning of life first emotionally grasped and then systematically and rationally developed It is for this reason that the teachings of these schools endured almost continuously for about 500 years It is for the same reason that the founders of the schools were considered gods and were actually in a certain sense the saints of secular faiths and religions In this book Reale traces the decline of the philosophical schools of the classical period the post Platonic Academy the post Aristotelian Peripatos and the minor Socratic schools The destruction of the polis and the incapacity of the schools to address the concerns of the new age were the fertile grounds from which the new schools developed The Garden of Epicurus the Porch of Zeno and the sceptical movement initiated by Pyrrho form the core of the volume The volume contains a select bibliography and an index of names and Greek terms as well as an index of citations

Great Women of Imperial Rome Jasper Burns, 2006-11-22 A lively and engaging account of the leading ladies of imperial Rome from the foundation of the Empire to the third century AD and a postscript on the fourth century. It is illustrated by 416 coin photographs as well as a dozen striking portraits by the author and will thus be an indispensable resource for historians, art historians and numismatists in addition to its wider appeal.

Lectures on the History of Philosophy 1825-6: Greek philosophy Georg Wilhelm Friedrich Hegel, 2006 The Hegel Lectures Series. Series Editor Peter C. Hodgson. Hegel's lectures have had as great a historical impact as the works he himself published. Important elements of his system are elaborated only in the lectures, especially those given in Berlin during the last decade of his life. The original editors conflated materials from different sources and dates, obscuring the development and logic of Hegel's thought. The Hegel Lectures series is based on a selection of extant and recently discovered transcripts and manuscripts. The original lecture series are reconstructed so that the structure of Hegel's argument can be followed. Each volume presents an accurate new translation accompanied by an editorial introduction and annotations on the text which make possible the identification of Hegel's many allusions and sources.

Lectures on the History of Philosophy, Volume II: Greek Philosophy Hegel's Lectures on the History of Philosophy offer one of the best points of entry to his philosophical system. The second volume, dating from 1825-6, covers a thousand years of ancient Greek philosophy, the period to which Hegel devoted by far the most attention and which he saw as absolutely fundamental for all that came after it. This edition sets forth clearly and for the first time for the English reader what Hegel actually said. It forms part of OUP's Hegel Lectures series, presenting accurate new translations accompanied by editorial introductions and annotations. These lectures challenged the antiquarianism of Hegel's contemporaries by boldly contending that the history of philosophy is itself philosophy, not just history. It portrays the journey of reason or spirit through time as reason or spirit comes in stages to its full development and self-conscious existence through the successive products of human intellect and activity. Hegel's Lectures on the History of Philosophy proved to be extremely influential on the intellectual history of the past two centuries. These lectures are crucial to understanding Hegel's own systematic philosophy in its constructive aspect as well as his views on the centrality of reason in human history and culture. The volume on Greek Philosophy covers the first one thousand years, the period to which Hegel devoted by far the most attention and which he saw as absolutely fundamental for all that came after it. This edition adapts the considerable editorial resources of the German edition that it translates to the needs of the general reader as well as the serious scholar so as to constitute an unparalleled resource on this topic in the English language.
