The Regime of Islands in International Law Hiran Wasantha Jayewardene, 1990-05-18 **The Discovery of Islands** J. G. A. Pocock, 2005-09-08 The Discovery of Islands consists of a series of linked essays in British history written by one of the world's leading historians of political thought and published over the past three decades Its purpose is to present British history as that of several nations interacting with and sometimes seceding from an imperial state The commentary presents this history as that of an archipelago expanding across oceans to the Antipodes Both New Zealand history and the author's New Zealand heritage inform this vision presenting British history as oceanic and global complementing and occasionally criticising the presentation of that history as European Professor Pocock's interpretation of British history has been hugely influential in recent years making The Discovery of Islands a resource of immense value for historians of Britain and the world

fisheries The fact that they all belong to the European Union is a very important common feature which amply justifies the choice made to study them together The book's aim is to give through essays prepared by well known specialists a detailed survey of the attitudes and practice concerning the law of the sea of the member States of the European Union and of the European Community as such The common positions of the member States and the results of their coordinated action also emerge from these essays The fact that the member States and the European Community are now actively engaged in the process of becoming parties to the Law of the Sea Convention is certainly a major contribution to the consolidation of the Convention as a universal instrument or at least as an instrument widely ratified by States of all continents and economic and political interests *Light List*, 1941 Parliamentary Debates New Zealand.
